Artisan Developing World Fund

Investor: ARTYX | Advisor: APDYX | Institutional: APHYX

Investment Objective

The Fund seeks long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	1.02%	1.02%	1.02%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses ¹	0.28	0.11	0.03
Total Annual Fund Operating Expenses	1.30	1.13	1.05

¹ “Other Expenses” include “Acquired Fund Fees and Expenses,” which were less than 0.01% of the average net assets of the Fund. “Acquired Fund Fees and Expenses” are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds and other investment companies (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$132	\$412	\$713	\$1,568
Advisor	\$115	\$359	\$622	\$1,375
Institutional	\$107	\$334	\$579	\$1,283

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 77.88% of the average value of its portfolio.

Principal Investment Strategies

The Fund’s investment team employs a fundamental investment process to construct a diversified portfolio of securities that offers exposure to developing world economies. In pursuit of this goal, the team generally invests substantially in equity securities of issuers domiciled in or economically tied to countries the team considers to have characteristics typical of the developing world, including companies based in developed markets. The team believes a portfolio of companies with these characteristics will be well positioned to deliver attractive risk-adjusted returns over the long term.

Under normal circumstances, the Fund invests substantially in equity securities of issuers domiciled in or economically tied to one or more markets in the developing world. The team generally considers developing world to include countries that are included in any one of the Morgan Stanley Capital Index (“MSCI”) emerging or frontier markets indices, or that are classified under a similar corresponding classification, by organizations such as the World Bank, United Nations, International Finance Corporation or the International Monetary Fund. For purposes

of the Fund's investments, a determination that an issuer is economically tied to one or more countries in the developing world is based on factors including, but not limited to: domicile or principal office location, sources of its revenues or customers, countries in which a product is used, and/or whether the issuer is indirectly exposed to the risks or economic fortunes of a developing market.

The Fund may invest in US and non-US companies of all market capitalizations.

The Fund may invest in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers).

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts and participation certificates) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Developing Markets Risks**—Investment risks typically are greater in developing markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in developing market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Developing market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain developing markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many developing market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight.

China-Related Risks: Because the Fund typically invests a significant portion of its assets in equity securities of Chinese companies, it is particularly affected by events or factors related to China, which may increase risk and volatility.

- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any

hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.

- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund's service providers, the Fund's counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund's Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	38.34	June 30, 2020
Lowest Quarter	-24.50	June 30, 2022

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

The "Return after taxes on distributions and sale of Fund shares" for the five-year period ended 31 December 2025 is greater than the "Return before taxes" because you are assumed to be able to use any capital loss realized on the sale of Fund shares to offset other taxable gains.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	5-Year	10-Year	Since Inception	Inception Date
Return before taxes	7.82%	-1.13%	11.93%	9.95%	June 29, 2015
Return after taxes on distributions	7.82%	-1.64%	11.35%	9.41%	
Return after taxes on distributions and sale of Fund shares	4.63%	-0.97%	9.78%	8.07%	
MSCI Emerging Markets Index (reflects no deduction for fees, expenses or taxes)	33.57%	4.20%	8.42%	6.19%	
Advisor					
Return before taxes	7.95%	-0.97%	12.12%	10.14%	June 29, 2015
MSCI Emerging Markets Index (reflects no deduction for fees, expenses or taxes)	33.57%	4.20%	8.42%	6.19%	
Institutional					
Return before taxes	8.08%	-0.87%	12.23%	10.25%	June 29, 2015
MSCI Emerging Markets Index (reflects no deduction for fees, expenses or taxes)	33.57%	4.20%	8.42%	6.19%	

Updated performance information, including current NAV per share, may be obtained by calling 800.344.1770 or visiting www.artisanpartners.com.

Portfolio Management

Investment Adviser: Artisan Partners Limited Partnership ("Artisan Partners")

Portfolio Manager	Title	Length of Service
Lewis S. Kaufman, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since June 2015 (inception)

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Emerging Markets Debt Opportunities Fund

Investor: APFOX | Advisor: APDOX | Institutional: APHOX

Investment Objective

The Fund seeks to provide total return through a combination of current income and long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder's financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.75%	0.75%	0.75%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses	1.48	0.73	0.55
Total Annual Fund Operating Expenses	2.23	1.48	1.30
Fee Waiver and Expense Reimbursement ¹	0.97	0.32	0.19
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement	1.26	1.16	1.11

¹ Artisan Partners Limited Partnership, the Fund's investment adviser ("Artisan Partners"), has contractually agreed to bear certain expenses and waive its management fees to the extent necessary to cause total annual fund operating expenses (excluding taxes, interest, all commissions and other normal charges incident to the purchase and sale of portfolio securities, acquired fund fees and expenses, borrowing costs such as dividends on securities sold short, and extraordinary charges such as litigation costs, but including management fees paid to Artisan Partners) not to exceed 1.25% of the average daily net assets of Investor Shares, 1.15% of the average daily net assets of Advisor Shares and 1.10% of the average daily net assets of Institutional Shares. This contract continues through 31 January 2027.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund's operating expenses are equal to Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the first year and Total Annual Fund Operating Expenses thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$128	\$604	\$1,106	\$2,489
Advisor	\$118	\$437	\$778	\$1,741
Institutional	\$113	\$393	\$695	\$1,551

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 91.58% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental investment process to construct a differentiated portfolio of securities, derivatives and other instruments that offer long and short exposures to emerging markets. The team seeks to identify emerging market countries that are undergoing or poised for strong economic growth or structural changes, such as political, legislative and/or economic reforms. The team seeks to invest in corporate and sovereign debt instruments that offer exposures to those emerging market countries at attractive absolute

and relative credit risk premium. As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

Under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in emerging market debt securities or instruments that have similar economic characteristics. These securities and other instruments include instruments issued or guaranteed by companies, financial institutions and government entities and/or their agencies and instrumentalities domiciled in or with exposure to emerging market countries, as well as derivatives or similar instruments used to gain or manage exposure to emerging market debt securities and/or manage related risk factors. The Fund considers emerging market countries to include any country other than Canada, Luxembourg, the US and the countries comprising the MSCI EAFE Index (currently, Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom).

The Fund is non-diversified, which means that it may invest a greater portion of its assets in a more limited number of issuers than a diversified fund. The Fund may have significant investment in a particular geographic region or country.

The Fund may invest in debt instruments of all types, including, without limitation, sovereign issues, treasury obligations, bonds, loans, commercial paper, credit linked notes, covered bonds, convertible bonds and other fixed-, variable- and floating-rate securities that are either secured or unsecured, and, either senior or subordinated. The Fund may invest, without limitation, in debt instruments of any credit rating, including instruments that are rated below investment grade (below BBB- by Standard & Poor's Rating Service or Fitch, Inc. or below Baa3 by Moody's Investors Service, Inc.), or comparably rated by another nationally recognized statistical rating organization, or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds." The Fund may invest in debt instruments that are non-performing at the time of purchase. The Fund may invest in debt securities of any maturity. The Fund's investments are not subject to any restrictions with respect to duration.

The Fund expects to achieve certain exposures primarily through derivative transactions. These derivatives include, without limitation, forward foreign currency exchange contracts; futures on securities, indices, currencies, commodities, swaps and other investments; options; and swaps, including interest rate swaps, cross-currency swaps, total return swaps and credit default swaps, which may have the effect of creating investment leverage. The Fund may use derivatives to seek to enhance total return, to hedge against fluctuations in securities prices, interest rates or currency exchange rates, to change the effective duration of its portfolio, to manage certain investment risks, for speculation purposes to gain certain types of exposures and/or as a substitute for the purchase or sale of securities, currencies or commodities. The Fund may also utilize derivatives to take short positions in underlying assets and non-USD currencies to hedge certain risk factors. The Fund intends to use all or a portion of the proceeds from its short positions to take additional long positions or otherwise use in a manner consistent with its investment guidelines. The Fund may engage in repurchase agreements, reverse repurchase agreements and forward commitments.

The Fund expects to hold US Treasury, government agency securities and agency mortgage-backed securities (and derivatives thereon), and stripped securities to use as collateral for its derivatives positions and to help manage duration.

The Fund is permitted to invest in equity securities and exchange-traded funds ("ETFs"). The Fund may invest in private placements and other restricted securities (i.e., securities that are purchased in private placements and, accordingly, are subject to restrictions on resale as matter of contract or under federal securities laws).

The Fund may have investment exposure to the commodities markets and/or Regulation S securities primarily through investments in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands (the "Subsidiary"). The Fund may invest up to 25% of its total assets in its Subsidiary.

The Fund may borrow up to the amount allowed by applicable law to enhance total return, fund redemptions, post collateral for hedges, or to purchase investments prior to settlement of pending sale transactions.

In addition to instruments issued by emerging market issuers, the Fund may also invest in securities and other instruments of US and other non-emerging market issuers, and securities denominated in currencies other than emerging market currency.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when

the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers environmental, social and governance factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider environmental, social and governance factors.

- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates, unfavorable economic practices, political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.

China-Related Risks: Because the Fund may have a significant exposure to China, it is particularly affected by events or factors relating to China, which may increase risk and volatility.

- **Debt Securities Risks**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. In general, the value of a debt security will fall in response to increases in interest rates. The Fund may invest in debt securities without considering the maturity of the instrument. The value of a security with a longer duration will be more sensitive to changes in interest rates than a similar security with a shorter duration. As a result, changes in interest rates in the US and outside the US may affect the Fund's debt investments unfavorably.
Debt securities in which the Fund invests may be rated below investment grade or unrated securities that are determined by Artisan Partners to be of comparable quality. Debt securities of below investment grade quality are high yield, high risk bonds, commonly known as "junk bonds." These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk, may be less liquid and may be subject to greater price volatility than higher-rated bonds.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Credit Risks**—An issuer or counterparty may fail to pay its obligations to the Fund when they are due. Financial strength and solvency (or the perceived financial strength or solvency) of an issuer are the primary factors influencing credit risk. Changes in the financial condition of an issuer or counterparty, changes in specific economic, social or political conditions that affect a particular type of security or other instrument or an issuer, and changes in economic, social or political conditions generally can increase the risk of default by an issuer or counterparty, which can affect a security's or other instrument's credit quality or value and an issuer's or counterparty's ability to pay interest and principal when due. The values of lower quality debt, including loans, tend to be particularly sensitive to these changes.

- **Interest Rate Risks**—Interest rate risk is the risk that fixed income securities and other instruments in the Fund's portfolio will fluctuate in value because of changes, or the anticipation of changes, in interest rates. In particular, during periods of rising interest rates, the values of such securities may decline and may result in losses to the Fund. Factors including central bank monetary policy, rising inflation rates, and changes in general economic conditions may cause interest rates to rise, which could cause the value of the Fund's investments to decline. Interest rate changes can be sudden and unpredictable, and the Fund may experience losses as a result of movements in interest rates. The Fund may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile in response to changing interest rates.
- **Derivatives Risks**—A derivative is a financial contract whose value depends on changes in the value of one or more underlying assets, reference rates or indexes. These instruments include, among others, forward foreign currency exchange contracts; futures on securities, indices, currencies, commodities, swaps and other investments; options; swaps, including interest rate swaps, cross-currency swaps, total return swaps and credit default swaps and similar instruments. The Fund's use of derivatives may involve risks different from, or greater than, the risks associated with investing in more traditional investments, such as stocks and bonds. Derivatives can be highly complex and may perform in ways unanticipated by Artisan Partners.
In addition to the risks of an adverse change in the value of the underlying reference asset, the Fund's use of derivatives, including, but not limited to, over-the-counter ("OTC") derivatives, involves the risk that the other party to the derivative contract will fail to make required payments or otherwise to comply with the terms of the contract. Derivatives transactions can create investment leverage and may be highly volatile, and the Fund could lose more than the amount it invests, especially in unusual or extreme market conditions. Derivatives may be difficult to value and highly illiquid, and the Fund may not be able to close out or sell a derivative position at a particular time or at an anticipated price.
US and non-US legislative and regulatory reforms, including those related to the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), have resulted in, and may in the future result in, new regulation of derivative instruments and the Fund's use of such instruments. New regulations could, among other things, restrict the Fund's ability to engage in derivative transactions (for example, by making certain types of derivative instruments or transactions no longer available to the Fund) and/or increase the costs of such transactions, and the Fund may as a result be unable to execute its investment strategies in a manner Artisan Partners might otherwise choose.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Foreign Sovereign Debt Risks**—The Fund's investments in debt obligations of sovereign governments may lose value due to the government entity's unwillingness or inability to repay principal and interest when due in accordance with the terms of the debt or otherwise in a timely manner. Sovereign governments may default on their debt obligations for a number of reasons, including social, political, economic and diplomatic changes in countries issuing sovereign debt.
- **Futures Contract Risks**—The Fund may enter into futures contracts, in which the Fund agrees to buy or sell a security or other asset on a specified future date at a specified price or rate. There are risks associated with futures contracts, including that the success of such an investment strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; there may be an imperfect or no correlation between the changes in market value of the securities held by the Fund and the prices of futures; there may not be a liquid secondary market for a futures contract; trading restrictions or limitations may be imposed by an exchange; and government regulations may restrict trading in futures contracts.
- **Credit Default Swaps Risks**—A credit default swap enables an investor to buy or sell protection against a credit event with respect to an issuer. Credit default swaps may have as reference obligations one or more securities that are not currently held by the Fund. The protection "buyer" may be obligated to pay the protections "seller" an up-front payment or a periodic stream of payments over the term of the contract, provided generally that no credit event on a reference obligation has occurred. When the Fund acts as a buyer of a credit default swap, it may lose its investment and recover nothing should no credit event occur and the swap is held to its termination date. When the Fund acts as a seller of a credit default swap, it must pay a buyer the full notional value of the reference obligation, and the Fund may not be profitable if no secondary market exists or the Fund is otherwise unable to close out these transactions at advantageous time. Credit default swaps involve special risks because they are difficult to value, are highly susceptible to liquidity and credit risk, and generally pay a return to the party that has paid the premium only in the event of an actual default by the issuer of the underlying obligation (as opposed to a credit downgrade or other indication of financial difficulty).
- **Short Position Risks**—The risk that an increase in the value of an instrument with respect to which the Fund has established a short position for investment and/or risk management purposes will result in a loss to the Fund.
- **Leverage Risks**—Certain transactions, including, for example, the use of certain derivatives and borrowing money, can result in leverage. Leverage generally has the effect of increasing the amounts of loss or gain the Fund might realize and creates the likelihood of greater volatility of the value of the Fund's investments. There is risk of loss in excess of invested capital.
- **High Yield Securities ("Junk Bond") Risks**—Fixed income instruments rated below investment grade, or unrated securities that are determined by Artisan Partners to be of comparable quality, are high yield, high risk bonds, commonly known as "junk bonds." These bonds

are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk and may be less liquid than higher-rated bonds. These securities may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity, negative perceptions of junk bonds generally and less secondary market liquidity. This potential lack of liquidity may make it more difficult for the Fund to accurately value these securities.

- **Mortgage-Related and Other Asset-Backed Instruments Risks**—Mortgage-related and other asset-backed securities typically provide a monthly payment which consists of both principal and interest. In times of declining interest rates, there is a greater likelihood that a Fund's higher yielding securities will be pre-paid with the Fund being unable to reinvest the proceeds in an investment with as great a yield. Pools created and guaranteed by non-governmental issuers, including government-sponsored corporations, may be supported by various forms of insurance or guarantees, but there can be no assurance that private insurers or guarantors can meet their obligations under the insurance policies or guarantee arrangements. Many of the risks of investing in mortgage-related securities secured by commercial mortgage loans ("CMBS") reflect the effects of local and other economic conditions on real estate markets, the ability of tenants to make lease payments, and the ability of a property to attract and retain tenants. These securities may be less liquid and may exhibit greater price volatility than other types of mortgage-related or other asset-backed securities.
- **Government Securities Risks**—The Fund invests in securities issued or guaranteed by the US Government or its agencies and instrumentalities (such as the Government National Mortgage Association ("Ginnie Mae"), the Federal National Mortgage Association ("Fannie Mae"), or the Federal Home Loan Mortgage Corporation ("Freddie Mac")). Unlike Ginnie Mae securities, securities issued or guaranteed by US Government-related organizations, such as Fannie Mae and Freddie Mac, are not backed by the full faith and credit of the US Government and no assurance can be given that the US Government would provide financial support.
- **Counterparty Risks**—The Fund will be subject to credit risk with respect to the counterparties to the derivative contracts and other instruments entered into by the Fund. If a counterparty becomes bankrupt or insolvent or otherwise fails to perform its obligations to the Fund due to financial difficulties, the Fund may experience significant losses or delays in obtaining any recovery (including recovery of any collateral it has provided to the counterparty) from the counterparty.
- **Loan Risks**—Investments in loans, including floating or adjustable rate loans, are generally subject to the same risks as investments in other types of debt obligations, including, among others, the credit risk of nonpayment of principal and interest. In addition, in many cases loans are subject to the risks associated with below investment grade securities. The Fund may invest in loans made in connection with highly leveraged transactions, which are subject to greater credit and liquidity risks than other types of loans. Although the loans in which the Fund invests may be secured by specific collateral, there can be no assurance that liquidation of such collateral would satisfy the borrower's obligation in the event of nonpayment of scheduled interest or principal, or that such collateral could be readily liquidated. In the event of the bankruptcy of a borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a loan or could recover nothing of what it is owed on the loan. Uncollateralized (i.e., non-secured) loans are subject to greater risk of loss (i.e., nonpayment) in the event of default than secured loans since they do not afford the Fund recourse to collateral. Investments in loans may be difficult to value and may be illiquid, including due to legal or contractual restrictions on resale. Transactions in many loans settle on a delayed basis, and the Fund may not receive the proceeds from the sale of a loan for a substantial period after the sale. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or meet redemption obligations until a substantial period after the sale of the loans.
- **Convertible Securities Risks**—Investing in convertible securities subjects the Fund to the risks of debt, but also the risks associated with an investment in the underlying equity security. Convertible securities are frequently issued with a call feature that allows the issuer to choose when to redeem the security, which could result in the Fund being forced to redeem, convert, or sell the convertible security under circumstances unfavorable to the Fund.
- **Stressed and Distressed Instruments Risks**—Investments in the securities of financially stressed or distressed issuers involve substantial risks, including the risk that all or a portion of principal will not be repaid. These securities may present a substantial risk of default or may be in default at the time of investment. The Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal or interest on its portfolio holdings. As with any issuer, the team's judgments about the credit quality of a financially stressed or distressed issuer and the relative value of its securities may prove to be wrong.
- **Liquidity Risks**—Liquidity risk is the risk that the Fund may be unable to sell a portfolio investment at a desirable time or at the value the Fund has placed on the investment. It may be more difficult for the Fund to determine a fair value of an illiquid investment than that of a more liquid comparable investment.
- **Non-Diversification Risks**—As a non-diversified fund, the Fund may invest a larger portion of its assets in securities of a smaller number of issuers than a diversified fund, which means a single issuer's performance may affect Fund performance more than if the Fund were invested in a larger number of issuers.
- **LIBOR Replacement Risks**—The coupons on variable and floating rate investments in which the Fund may invest are not fixed and may fluctuate based upon changes in market rates. The coupon on a floating rate investment is generally based on an interest rate, such as the Secured Overnight Financing Rate ("SOFR"). Some floating or variable rate obligations or investments of a Fund may have previously referenced the London Interbank Offered Rate ("LIBOR"). As a result of benchmark reforms, publication of all LIBOR settings has ceased. Public and private sector actors have worked to establish alternative reference rates, like SOFR or Term SOFR (a forward-looking

measurement of market expectations of SOFR implied from certain derivatives markets), to be used in place of LIBOR, but it remains uncertain which alternative benchmarks will ultimately emerge as the most prevalent successors and the transition process may lead to an increase in market, operational and valuation uncertainties and volatility.

- **Investment in Exchange-Traded Funds (“ETF”) Risks**—ETFs generally expose their shareholders to the risks associated with the assets in which the ETF invests. Additionally, as exchange-traded investment vehicles, ETFs may involve market risk, management risk and (for index funds) tracking risk. If the Fund acquires shares of an ETF, shareholders bear both their proportionate share of expenses in the Fund (including management and advisory fees) and, indirectly, the expenses of the ETF.
- **Private Placement and Restricted Securities Risks**—In addition to the general risks to which all securities are subject, securities acquired in a private placement generally are subject to strict restrictions on resale, and there may be no liquid secondary market or ready purchaser for such securities, and a liquid secondary market may never develop. Therefore, the Fund may be unable to dispose of such securities when it desires to do so or at a favorable time or price. This potential lack of liquidity may make it more difficult for the Fund to accurately value these securities. Issuers of private placements or other restricted securities may include special purpose vehicles (“SPVs”) that hold underlying assets to which the Fund wants to gain exposure. The Fund may have the right to receive payments only from the SPV, and may not have direct rights against the issuer of the underlying assets. Investors in such SPVs generally pay their share of the SPV’s administrative and other expenses, including management fees.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Valuation Risks**—The Fund’s investments are valued in accordance with Artisan Partners’ valuation policies. The valuation of any investment involves inherent uncertainty. The value of a security determined in accordance with the valuation policies may differ materially from the value that could have been realized in an actual sale or transfer for a variety of reasons, including the timing of the transaction and liquidity in the market.
- **High Portfolio Turnover Risks** —The Fund may engage in active and frequent trading of its portfolio securities. High portfolio turnover may result in increased transaction costs to the Fund, including brokerage commissions, dealer mark-ups and other transaction costs on the sale of the securities and on reinvestment in other securities. The sale of Fund portfolio securities may result in the realization and/or distribution to shareholders of higher capital gains or losses as compared to a fund with a less active trading strategy. These effects of higher than normal portfolio turnover may adversely affect Fund performance.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund’s distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund’s shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund’s service providers, the Fund’s counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund’s Investor Shares has varied over time. On 2 January 2025, the fair value methodology used to value emerging market debt, as determined by a third party vendor, held by the Fund was changed from using bid pricing to using the midpoint between the bid and ask price. The change resulted in a one-time increase of less than 0.40% in the net asset value for the Fund.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	5.47	December 31, 2023
Lowest Quarter	-0.80	September 30, 2023

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	Since Inception	Inception Date
Return before taxes	15.48%	11.81%	April 7, 2022
Return after taxes on distributions	11.93%	7.98%	
Return after taxes on distributions and sale of Fund shares	9.02%	7.42%	
JP Morgan EMB Hard Currency / Local Currency 50/50 Index (reflects no deduction for fees, expenses or taxes)	15.34%	6.19%	
JP Morgan EMBI Global Diversified Index (reflects no deduction for fees, expenses or taxes)	14.30%	6.24%

Portfolio Management

Investment Adviser: Artisan Partners

Portfolio Managers	Title	Length of Service
Michael A. Cirami, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since April 2022 (inception)
Sarah C. Orvin, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since April 2022 (inception)

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by

express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Floating Rate Fund

Investor: ARTUX | Advisor: APDUX | Institutional: APHUX

Investment Objective

The Fund seeks to provide total return through a combination of current income and long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee (as a percentage of amount redeemed or exchanged within 90 days or less)	2.00%	2.00%	2.00%

Annual Fund Operating Expenses¹ (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.68%	0.68%	0.68%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses	0.87	0.68	0.56
Acquired Fund Fees and Expenses ²	0.02	0.02	0.02
Total Annual Fund Operating Expenses	1.57	1.38	1.26
Fee Waiver and Expense Reimbursement ³	0.50	0.41	0.34
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement	1.07	0.97	0.92

¹ The Fund’s operating expenses have been restated to reflect a reduction in the expense limit that was effective as of 1 December 2025.

² “Acquired Fund Fees and Expenses” shown are for the fiscal year ended 30 September 2025 and are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses and Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

³ Artisan Partners Limited Partnership, the Fund’s investment adviser (“Artisan Partners”), has contractually agreed to bear certain expenses and waive its management fees to the extent necessary to cause total annual fund operating expenses (excluding taxes, interest, all commissions and other normal charges incident to the purchase and sale of portfolio securities, acquired fund fees and expenses, borrowing costs such as dividends on securities sold short, and extraordinary charges such as litigation costs, but including management fees paid to Artisan Partners) not to exceed 1.05% of the average daily net assets of Investor Shares, 0.95% of the average daily net assets of Advisor Shares and 0.90% of the average daily net assets of Institutional Shares. This contract continues through 31 January 2027. Prior to 1 December 2025, the expense limit, as a percentage of average daily net assets, was 1.20%, 1.10% and 1.05% for Investor Shares, Advisor Shares and Institutional Shares, respectively.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses are equal to Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the first year and Total Annual Fund Operating Expenses thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$109	\$447	\$808	\$1,825
Advisor	\$99	\$397	\$716	\$1,622
Institutional	\$94	\$366	\$659	\$1,493

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 92.03% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to invest in issuers with high quality business models that have compelling risk-adjusted return characteristics. The Fund employs a fundamental investment process to construct a diversified portfolio comprised primarily of floating rate debt instruments that are attractively valued, including, without limitation, floating rate leveraged loans, which could include, among other types of loans, senior secured loans, unsecured loans, second lien loans, bridge loans and junior loans.

The Fund's investment team's research process has four primary pillars:

- **Business Quality**—The team uses a variety of sources to understand the resiliency of an issuer's business model. The team analyzes the general health of the industry in which an issuer operates, the issuer's competitive position, barriers to entry, the dynamics of industry participants, and the decision-making history of the issuer's management and, when applicable, financial equity sponsor. As part of the team's analysis of a company's business quality, among other factors, the team considers certain environmental, social and governance ("ESG") factors relating to the company. These ESG factors may include the impact of environmental regulatory change, the use of human, natural and physical resources and corporate governance structures and practices. When the team deems a factor material to the value of a company, the team incorporates it into its decision-making process.
- **Financial Strength and Flexibility**—The team believes that analyzing the history and trend of free cash flow generation is critical to understanding an issuer's financial health. The team's financial analysis also considers an issuer's capital structure, refinancing options, asset or collateral coverage, financial covenants, amortization schedules and overall financial transparency.
- **Downside Analysis**—The team believes that credit instruments by their nature have an asymmetric risk profile. The risk of loss is often greater than the potential for gain, particularly when looking at below investment grade issuers. The team seeks to manage this risk with what it believes to be conservative financial projections that account for industry position, competitive dynamics and positioning within the capital structure.
- **Value Identification**—The team uses multiple metrics to determine the value of an investment opportunity. The team looks for credit improvement potential, relative value within an issuer's capital structure and against industry peers, catalysts for business improvement and potential value stemming from market or industry dislocations and/or mergers and acquisitions ("M&A").

Under normal circumstances, the Fund will invest no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in floating rate debt instruments and other investments that are the economic equivalent of floating rate debt instruments or enable the Fund to achieve a floating rate of income. Floating rate debt instruments for this purpose are those debt obligations of companies or other entities that have (a) interest at rates that adjust periodically, often, though not necessarily, based on a benchmark rate plus a premium or spread over the benchmark rate, or (b) maturities of six months or less even if the interest rates do not adjust periodically. The benchmark rate usually is the Prime Rate, Secured Overnight Funding Rate ("SOFR"), the Federal Reserve federal funds rate, or other base lending rates used by commercial lenders. In addition, fixed-rate investments with respect to which the Fund has entered into derivative instruments, such as, for example, interest rate swaps, to effectively convert the fixed-rate interest payments into floating or adjustable rate interest payments; exchange-traded funds ("ETFs") or notes that provide exposure to floating or adjustable rate loans or obligations; and cash and cash equivalents (for example, money market funds) are examples of other investments considered by the Fund to be eligible for the purpose of satisfying the 80% policy.

Under normal circumstances, the Fund will invest primarily in instruments that are rated, at the time of purchase, below investment grade (below BBB- by Standard & Poor's Rating Services ("S&P") or Fitch, Inc. ("Fitch") or below Baa3 by Moody's Investors Service, Inc. ("Moody's")), or comparably rated by another nationally recognized statistical rating organization ("NRSRO"), or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds." Although the Fund expects to primarily invest in instruments that are rated below investment grade (or unrated but determined by Artisan Partners to be of comparable quality) at the time of purchase, the Fund may invest without limit in instruments of any credit quality, including investment grade instruments and securities of stressed or distressed issuers. The Fund may invest in debt securities of any maturity.

The Fund may invest without limit in securities and other instruments of US and non-US issuers, including issuers economically tied to "emerging market" countries, securities traded principally outside of the United States, and securities denominated in currencies other than the US dollar. The Fund usually seeks (but is not required) to hedge against the risk of loss resulting from currency fluctuation.

In addition to floating rate debt instruments, the Fund also may invest in other corporate fixed income instruments of varying maturities, including fixed-rate instruments, debentures, notes, commercial paper and other types of corporate debt instruments across the credit quality spectrum, such as stressed and distressed debt securities. The Fund may invest in private placements and other restricted securities (i.e., securities that are purchased in private placements and, accordingly, are subject to restrictions on resale as a matter of contract or under federal securities laws). The Fund also may invest in ETFs.

The Fund may use derivatives for investment, duration management or hedging purposes, or with the purpose or effect of creating investment leverage. The Fund may also use derivatives to manage liquidity risk. The Fund's investments in derivative instruments may include investments in, among other instruments, futures contracts, swap contracts and certain currency instruments such as currency forward contracts and currency swap contracts.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers ESG factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider ESG factors.
- **Loan Risks**—Investments in loans, including floating or adjustable rate loans, are generally subject to the same risks as investments in other types of debt obligations, including, among others, the credit risk of nonpayment of principal and interest. In addition, in many cases loans are subject to the risks associated with below investment grade securities. The Fund may invest in loans made in connection with highly leveraged transactions, which are subject to greater credit and liquidity risks than other types of loans. Although the loans in which the Fund invests may be secured by specific collateral, there can be no assurance that liquidation of such collateral would satisfy the borrower's obligation in the event of nonpayment of scheduled interest or principal, or that such collateral could be readily liquidated. In the event of the bankruptcy of a borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a loan or could recover nothing of what it is owed on the loan. Uncollateralized (i.e., non-secured) loans are subject to greater risk of loss (i.e., nonpayment) in the event of default than secured loans since they do not afford the Fund recourse to collateral. Investments in loans may be difficult to value and may be illiquid, including due to legal or contractual restrictions on resale. Transactions in many loans settle on a delayed basis, and the Fund may not receive the proceeds from the sale of a loan for a substantial period after the sale. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or meet redemption obligations until a substantial period after the sale of the loans.
- **Credit Risks**—An issuer or counterparty may fail to pay its obligations to the Fund when they are due. Financial strength and solvency (or the perceived financial strength or solvency) of an issuer are the primary factors influencing credit risk. Changes in the financial condition of an issuer or counterparty, changes in specific economic, social or political conditions that affect a particular type of security or other instrument or an issuer, and changes in economic, social or political conditions generally can increase the risk of default by an issuer or counterparty, which can affect a security's or other instrument's credit quality or value and an issuer's or counterparty's ability to pay interest and principal when due. The values of lower quality debt, including loans, tend to be particularly sensitive to these changes.
- **High Yield Securities ("Junk Bond") Risks**—Fixed income instruments rated below investment grade, or unrated securities that are determined by Artisan Partners to be of comparable quality, are high yield, high risk bonds, commonly known as "junk bonds." These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk and may be less liquid than higher-rated bonds. These securities may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity, negative perceptions of junk bonds generally and less secondary market liquidity. This potential lack of liquidity may make it more difficult for the Fund to accurately value these securities.
- **Interest Rate Risks**—Interest rate risk is the risk that fixed income securities and other instruments in the Fund's portfolio will fluctuate in value because of changes, or the anticipation of changes, in interest rates. In particular, during periods of rising interest rates, the values of such securities may decline and may result in losses to the Fund. Factors including central bank monetary policy, rising inflation rates, and changes in general economic conditions may cause interest rates to rise, which could cause the value of the Fund's investments to decline. Interest rate changes can be sudden and unpredictable, and the Fund may experience losses as a result of movements in interest rates. The Fund may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile in response to changing interest rates.
- **Debt Securities Risks**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. Investments in debt securities are subject to, among other risks, credit risk, interest rate risk and high yield securities ("junk bond") risk, as described above.
- **Liquidity Risks**—Liquidity risk is the risk that the Fund may be unable to sell a portfolio investment at a desirable time or at the value the Fund has placed on the investment. It may be more difficult for the Fund to determine a fair value of an illiquid investment than that of a more liquid comparable investment.
- **Valuation Risks**—The Fund's investments are valued in accordance with Artisan Partners' valuation policies. The valuation of any investment involves inherent uncertainty. The value of a security determined in accordance with the valuation policies may differ materially from the value that could have been realized in an actual sale or transfer for a variety of reasons, including the timing of the transaction and liquidity in the market.

- **Stressed and Distressed Instruments Risks**—Investments in the securities of financially stressed or distressed issuers involve substantial risks, including the risk that all or a portion of principal will not be repaid. These securities may present a substantial risk of default or may be in default at the time of investment. The Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal or interest on its portfolio holdings. As with any issuer, the team's judgments about the credit quality of a financially stressed or distressed issuer and the relative value of its securities may prove to be wrong.
- **Futures Contract Risks**—The Fund may enter into futures contracts, in which the Fund agrees to buy or sell a security or other asset on a specified future date at a specified price or rate. There are risks associated with futures contracts, including that the success of such an investment strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; there may be an imperfect or no correlation between the changes in market value of the securities held by the Fund and the prices of futures; there may not be a liquid secondary market for a futures contract; trading restrictions or limitations may be imposed by an exchange; and government regulations may restrict trading in futures contracts.
- **Counterparty Risks**—The Fund will be subject to credit risk with respect to the counterparties to the derivative contracts and other instruments entered into by the Fund. If a counterparty becomes bankrupt or insolvent or otherwise fails to perform its obligations to the Fund due to financial difficulties, the Fund may experience significant losses or delays in obtaining any recovery (including recovery of any collateral it has provided to the counterparty) from the counterparty.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates, unfavorable economic practices, political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Private Placement and Restricted Securities Risks**—In addition to the general risks to which all securities are subject, securities acquired in a private placement generally are subject to strict restrictions on resale, and there may be no liquid secondary market or ready purchaser for such securities, and a liquid secondary market may never develop. Therefore, the Fund may be unable to dispose of such securities when it desires to do so or at a favorable time or price. This potential lack of liquidity may make it more difficult for the Fund to accurately value these securities. Issuers of private placements or other restricted securities may include special purpose vehicles ("SPVs") that hold underlying assets to which the Fund wants to gain exposure. The Fund may have the right to receive payments only from the SPV, and may not have direct rights against the issuer of the underlying assets. Investors in such SPVs generally pay their share of the SPV's administrative and other expenses, including management fees.
- **Leverage Risks**—Certain transactions, including, for example, the use of certain derivatives and borrowing money, can result in leverage. Leverage generally has the effect of increasing the amounts of loss or gain the Fund might realize and creates the likelihood of greater volatility of the value of the Fund's investments. There is risk of loss in excess of invested capital.
- **LIBOR Replacement Risks**—The coupons on variable and floating rate investments in which the Fund may invest are not fixed and may fluctuate based upon changes in market rates. The coupon on a floating rate investment is generally based on an interest rate, such as the Secured Overnight Financing Rate ("SOFR"). Some floating or variable rate obligations or investments of a Fund may have previously referenced the London Interbank Offered Rate ("LIBOR"). As a result of benchmark reforms, publication of all LIBOR settings has ceased. Public and private sector actors have worked to establish alternative reference rates, like SOFR or Term SOFR (a forward-looking

measurement of market expectations of SOFR implied from certain derivatives markets), to be used in place of LIBOR, but it remains uncertain which alternative benchmarks will ultimately emerge as the most prevalent successors and the transition process may lead to an increase in market, operational and valuation uncertainties and volatility.

- **Investment in Exchange-Traded Funds (“ETF”) Risks**—ETFs generally expose their shareholders to the risks associated with the assets in which the ETF invests. Additionally, as exchange-traded investment vehicles, ETFs may involve market risk, management risk and (for index funds) tracking risk. If the Fund acquires shares of an ETF, shareholders bear both their proportionate share of expenses in the Fund (including management and advisory fees) and, indirectly, the expenses of the ETF.
- **Convertible Securities Risks**—Investing in convertible securities subjects the Fund to the risks of debt, but also the risks associated with an investment in the underlying equity security. Convertible securities are frequently issued with a call feature that allows the issuer to choose when to redeem the security, which could result in the Fund being forced to redeem, convert, or sell the convertible security under circumstances unfavorable to the Fund.
- **Derivatives Risks**—A derivative is a financial contract whose value depends on changes in the value of one or more underlying assets, reference rates or indexes. These instruments include, among others, participation certificates, credit default swaps, currency forward contracts, currency swap contracts and other swap agreements and similar instruments. The Fund’s use of derivatives may involve risks different from, or greater than, the risks associated with investing in more traditional investments, such as stocks and bonds. Derivatives can be highly complex and may perform in ways unanticipated by Artisan Partners.

In addition to the risks of an adverse change in the value of the underlying reference asset, the Fund’s use of derivatives, including, but not limited to, over-the-counter (“OTC”) derivatives, involves the risk that the other party to the derivative contract will fail to make required payments or otherwise to comply with the terms of the contract. Derivatives transactions can create investment leverage and may be highly volatile, and the Fund could lose more than the amount it invests, especially in unusual or extreme market conditions. Derivatives may be difficult to value and highly illiquid, and the Fund may not be able to close out or sell a derivative position at a particular time or at an anticipated price.

US and non-US legislative and regulatory reforms, including those related to the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), have resulted in, and may in the future result in, new regulation of derivative instruments and the Fund’s use of such instruments. New regulations could, among other things, restrict the Fund’s ability to engage in derivative transactions (for example, by making certain types of derivative instruments or transactions no longer available to the Fund) and/or increase the costs of such transactions, and the Fund may as a result be unable to execute its investment strategies in a manner Artisan Partners might otherwise choose.

- **Government Securities Risks**—The Fund invests in securities issued or guaranteed by the US Government or its agencies and instrumentalities (such as the Government National Mortgage Association (“Ginnie Mae”), the Federal National Mortgage Association (“Fannie Mae”), or the Federal Home Loan Mortgage Corporation (“Freddie Mac”). Unlike Ginnie Mae securities, securities issued or guaranteed by US Government-related organizations, such as Fannie Mae and Freddie Mac, are not backed by the full faith and credit of the US Government and no assurance can be given that the US Government would provide financial support.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund’s overall portfolio.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund’s distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund’s shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund’s service providers, the Fund’s counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund’s Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	4.23	September 30, 2023
Lowest Quarter	-4.28	June 30, 2022

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	Since Inception	Inception Date
Return before taxes	6.30%	5.98%	December 1, 2021
Return after taxes on distributions	3.20%	2.95%	
Return after taxes on distributions and sale of Fund shares	3.67%	3.23%	
S&P UBS Leverage Loan Index (reflects no deduction for fees, expenses or taxes)	5.94%	6.64%	
ICE BofA US Broad Market Index (reflects no deduction for fees, expenses or taxes)	7.15%	-0.20%	
Advisor			
Return before taxes	6.30%	6.06%	December 1, 2021

ICE BofA US Broad Market Index (reflects no deduction for fees, expenses or taxes)	7.15%	-0.20%	

Updated performance information, including current NAV per share, may be obtained by calling 800.344.1770 or visiting www.artisanpartners.com.

Portfolio Management

Investment Adviser: Artisan Partners

Portfolio Managers	Title	Length of Service
Bryan C. Krug, CFA	Managing Director and Lead Portfolio Manager, Artisan Partners	Since December 2021 (inception)
Seth B. Yeager, CFA	Portfolio Manager, Artisan Partners	Since December 2021 (inception)

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Focus Fund

Investor: ARTTX | Advisor: APDPTX | Institutional: APHTX

Investment Objective

The Fund seeks long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	1.00 %	1.00%	1.00%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses ¹	0.36	0.15	0.07
Total Annual Fund Operating Expenses	1.36	1.15	1.07
Fee Waiver and Expense Reimbursement	0.00 ²	N/A	N/A
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement	1.36	1.15	1.07

¹ “Other Expenses” include “Acquired Fund Fees and Expenses,” which were less than 0.01% of the average net assets of the Fund. “Acquired Fund Fees and Expenses” are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses and Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

² Artisan Partners Limited Partnership, the Fund’s investment adviser (“Artisan Partners”), contractually agreed to bear certain expenses and waive its management fees to the extent necessary to cause total annual fund operating expenses (excluding taxes, interest, all commissions and other normal charges incident to the purchase and sale of portfolio securities, acquired fund fees and expenses, borrowing costs such as dividends on securities sold short, and extraordinary charges such as litigation costs, but including management fees paid to Artisan Partners) not to exceed 1.50% of the average daily net assets of Investor Shares. This contract continues through 31 January 2027.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses are equal to Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the first year and Total Annual Fund Operating Expenses thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$138	\$431	\$745	\$1,635
Advisor	\$117	\$365	\$633	\$1,398
Institutional	\$109	\$340	\$590	\$1,306

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 245.77% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment approach is based on idea generation, a systematic framework for analyzing companies and proactive risk management. Utilizing this approach, the team seeks to construct a focused portfolio designed to maximize alpha while limiting downside risk over the long term.

- **Idea Generation**—The team believes a key element in alpha generation is finding areas where the team's views on industry fundamentals differ from consensus estimates. In this pursuit, the team seeks to identify inflections in multi-year trends which may be caused by changes in supply/demand dynamics, societal behavior, market conditions, technology, laws/regulations and business models, among other variables. The team believes these inflections are often misunderstood by market participants, and can lead to meaningful re-evaluations of industries and companies. Identifying themes helps the team develop a focused universe of companies to analyze more thoroughly. The team will also consider compelling idiosyncratic positions that are a good fit based on the team's rigorous fundamental analysis.
- **Systematic Analytical Framework**—The team applies a systematic framework for analyzing companies across sectors and themes, creating a repeatable and methodical decision-making process. The team's proprietary company models focus on multi-year earnings power differentiation, expected outcome scenario analysis, return on invested capital and discounted cash flow valuations. Visual outputs are then produced through the firm's internally developed technology solutions, allowing the team to consistently evaluate positions across the portfolio.
- **Proactive Risk Management**—The team incorporates risk management into all stages of its investment process. Metrics evaluated include crowding, correlation, volatility, stress tests, liquidity, factor analysis and macro drivers, all of which inform portfolio construction and position sizing. The team also uses various instruments, such as options, in an effort to magnify alpha and minimize downside.

The Fund invests in common stocks and other equity securities of companies across a broad capitalization range. There are no restrictions on the market capitalizations of the companies in which the Fund may invest. The Fund is non-diversified, which means that it may invest a greater portion of its assets in a more limited number of issuers than a diversified fund. As a result, a high percentage of the Fund's total assets may be invested in a particular company, sector or industry. As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

The Fund may invest up to 50% of its total assets at market value at the time of purchase in securities of non-US companies (including depositary receipts). The Fund's investments in non-US securities may include investments in developed markets, as well as emerging and less developed markets. The Fund usually seeks (but is not required) to hedge against the risk of loss resulting from currency fluctuation. The Fund may invest in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names). The Fund also invests in exchange-traded funds ("ETFs").

The Fund also uses derivatives, such as options. The Fund may use derivatives for any purpose consistent with its investment objective, including, without limitation, to improve expected risk-adjusted returns and to obtain economic exposure to certain issuers. The Fund may implement short positions, including through the use of derivative instruments, or through short sales of instruments that are eligible investments for the Fund and generally intends to use short positions to reduce exposure to certain risks and for hedging purposes. The Fund intends to use all or a portion of the proceeds from its short positions to take additional long positions or otherwise use in a manner consistent with its investment guidelines. The Fund also may borrow money for investment purposes, including to purchase additional securities.

The Fund may invest in real estate investment trusts ("REITs"). The Fund may also invest to a limited extent in debt securities (including securities rated below investment grade (below BBB- by Standard & Poor's Financial Services LLC ("S&P") or Fitch Ratings Inc. ("Fitch") or below Baa3 by Moody's Investors Service, Inc. ("Moody's")), or comparably rated by another nationally recognized statistical rating organization ("NRSRO"), or unrated but determined by Artisan Partners to be of comparable quality), commonly known as "junk bonds," and convertible debt securities of US or non-US issuers that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity or duration.

As a result of the Fund's use of derivatives, the Fund may hold significant amounts of short-term investments, including cash and cash equivalents. The Fund may also maintain a significant portion of its total assets in cash from time to time in response to adverse market, economic, political or other conditions. In addition, cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. If the Fund holds a significant portion of its assets in cash, its ability to meet its investment objective and/or the Fund's performance may be adversely affected.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.

- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers environmental, social and governance factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider environmental, social and governance factors.
- **Non-Diversification Risks**—As a non-diversified fund, the Fund may invest a larger portion of its assets in securities of a smaller number of issuers than a diversified fund, which means a single issuer's performance may affect Fund performance more than if the Fund were invested in a larger number of issuers.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Value Investing Risks**—Value stocks may fall out of favor with investors and underperform other asset types during given periods. The price of a company's stock may never reach the level that the team considers its intrinsic value.
- **Options Risks**—An option is an agreement that, for a premium payment or fee, gives the option holder (the purchaser) the right but not the obligation to buy (in the case of a "call option") or sell (in the case of a "put option") the underlying asset (or settle for cash an amount based on an underlying asset, rate, or index) at a specified price during a period of time or on a specified date. Investments in options are considered speculative. When the Fund purchases an option, it may lose the premium paid for it if the price of the underlying security or other assets decreased or remained the same (in the case of a call option) or increased or remained the same (in the case of a put option). Investments in options may also have the effect of creating leverage, in that they may expose the Fund to greater gains and losses than the amount of associated capital invested. Options held by the Fund may be more volatile than other types of assets. If a put or call option purchased by the Fund were to expire without being sold or exercised, its premium paid would represent a loss to the Fund. To the extent that the Fund writes or sells an option, it will be exposed to the risk that it may be required to buy or sell the underlying security at a disadvantageous price on or before the option's expiration date. The Fund may face substantial losses in connection with any options that it writes.
- **High Portfolio Turnover Risks**—The Fund may engage in active and frequent trading of its portfolio securities. High portfolio turnover may result in increased transaction costs to the Fund, including brokerage commissions, dealer mark-ups and other transaction costs on the sale of the securities and on reinvestment in other securities. The sale of Fund portfolio securities may result in the realization and/or distribution to shareholders of higher capital gains or losses as compared to a fund with a less active trading strategy. These effects of higher than normal portfolio turnover may adversely affect Fund performance.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts and participation certificates) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.
- **Leverage Risks**—Certain transactions, including, for example, the use of certain derivatives and borrowing money, can result in leverage. Leverage generally has the effect of increasing the amounts of loss or gain the Fund might realize and creates the likelihood of greater volatility of the value of the Fund's investments. There is risk of loss in excess of invested capital.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure, which may

include exposure through US dollar denominated depository receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.

- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Investment in Exchange-Traded Funds (“ETF”) Risks**—ETFs generally expose their shareholders to the risks associated with the assets in which the ETF invests. Additionally, as exchange-traded investment vehicles, ETFs may involve market risk, management risk and (for index funds) tracking risk. If the Fund acquires shares of an ETF, shareholders bear both their proportionate share of expenses in the Fund (including management and advisory fees) and, indirectly, the expenses of the ETF.
- **REIT Risks**—Investing in REITs may subject the Fund to certain risks associated with a REIT's direct investment in real property and real-estate related loans. A REIT that invests in real estate-related loans may be affected by the quality of the credit extended and interest rate risk, is dependent on specialized management skills, is subject to risks inherent in financing a limited number of properties, and may be subject to defaults by borrowers and to self-liquidations.
- **Short Position Risks**—The risk that an increase in the value of an instrument with respect to which the Fund has established a short position for investment and/or risk management purposes will result in a loss to the Fund.
- **Debt Securities Risks**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. In general, the value of a debt security will fall in response to increases in interest rates. The Fund may invest in debt securities without considering the maturity of the instrument. The value of a security with a longer duration will be more sensitive to changes in interest rates than a similar security with a shorter duration. As a result, changes in interest rates in the US and outside the US may affect the Fund's debt investments unfavorably.
Debt securities in which the Fund invests may be rated below investment grade or unrated securities that are determined by Artisan Partners to be of comparable quality. Debt securities of below investment grade quality are high yield, high risk bonds, commonly known as “junk bonds.” These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk, may be less liquid and may be subject to greater price volatility than higher-rated bonds.
- **Convertible Securities Risks**—Investing in convertible securities subjects the Fund to the risks of debt, but also the risks associated with an investment in the underlying equity security. Convertible securities are frequently issued with a call feature that allows the issuer to choose when to redeem the security, which could result in the Fund being forced to redeem, convert, or sell the convertible security under circumstances unfavorable to the Fund.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund's service providers, the Fund's counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund's Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	20.24	June 30, 2020
Lowest Quarter	-15.87	June 30, 2022

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	5-Year	Since Inception	Inception Date
Return before taxes	19.89%	10.77%	17.76%	April 24, 2017
Return after taxes on distributions	18.01%	8.14%	15.08%	
Return after taxes on distributions and sale of Fund shares	11.80%	7.26%	13.43%	
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	17.88%	14.42%	14.87%	
Advisor				
Return before taxes	20.15%	10.97%	14.63%	July 31, 2018

Institutional				
Return before taxes	20.21%	11.07%	14.03%	February 3, 2020
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	17.88%	14.42%	15.19%	

Updated performance information, including current NAV per share, may be obtained by calling 800.344.1770 or visiting www.artisanpartners.com.

Portfolio Management

Investment Adviser: Artisan Partners

Portfolio Manager	Title	Length of Service
Christopher P. Smith	Managing Director and Portfolio Manager, Artisan Partners	Since April 2017 (inception)

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by

express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Global Discovery Fund

Investor: APFDX | Advisor: APDDX | Institutional: APHDX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder's financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.97%	0.97%	0.97%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses ¹	0.47	0.47	0.13
Total Annual Fund Operating Expenses	1.44	1.44	1.10
Fee Waiver and Expense Reimbursement ²	0.03	0.13	0.00
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement	1.41	1.31	1.10

¹ "Other Expenses" include "Acquired Fund Fees and Expenses," which were less than 0.01% of the average net assets of the Fund. "Acquired Fund Fees and Expenses" are indirect expenses the Fund incurred from the Fund's investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses and Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the table above may not match the ratios of expenses to average net assets shown in the "Financial Highlights" in the Fund's prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

² Artisan Partners Limited Partnership, the Fund's investment adviser ("Artisan Partners"), has contractually agreed to bear certain expenses and waive its management fees to the extent necessary to cause total annual fund operating expenses (excluding taxes, interest, all commissions and other normal charges incident to the purchase and sale of portfolio securities, acquired fund fees and expenses, borrowing costs such as dividends on securities sold short, and extraordinary charges such as litigation costs, but including management fees paid to Artisan Partners) not to exceed 1.40% of the average daily net assets of Investor Shares, 1.30% of the average daily net assets of Advisor Shares and 1.25% of the average daily net assets of Institutional Shares. This contract continues through 31 January 2027.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund's operating expenses are equal to Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the first year and Total Annual Fund Operating Expenses thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$144	\$453	\$784	\$1,722
Advisor	\$133	\$443	\$775	\$1,713
Institutional	\$112	\$350	\$606	\$1,340

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 67.34% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of US and non-US growth companies across a broad capitalization range. The team seeks to invest in companies that it believes possess franchise characteristics, are

benefiting from an accelerating profit cycle and are trading at a discount to its estimate of private market value. The Fund's investment process focuses on two distinct elements—security selection and capital allocation. The team overlays its investment process with sustainability considerations and broad knowledge of the global economy.

- **Security Selection**—The team seeks to identify companies that have franchise characteristics (e.g., low cost production capability, possession of a proprietary asset, dominant market share or a defensible brand name), are benefiting from an accelerating profit cycle and are trading at a discount to the team's estimate of private market value. The team looks for companies that are well positioned for long-term growth, which is driven by demand for their products and services at an early enough stage in their profit cycle to benefit from the increased cash flows produced by the emerging profit cycle.
- **Capital Allocation**—Based on the team's fundamental analysis of a company's profit cycle, it divides the portfolio into three parts. **GardenSM** investments are small positions in the early part of their profit cycle that may warrant more sizeable allocations as their profit cycle accelerates. **CropSM** investments are positions that are being increased to a full weight because the team believes they are moving through the strongest part of their profit cycles. **HarvestSM** investments are positions that are being reduced as they near the team's estimates of full valuation or their profit cycles begin to decelerate.
- **Sustainability Considerations**—The team employs a framework in assessing material sustainability exposures that informs its security selection and capital allocation process.
- **Broad Knowledge**—The team overlays the security selection and capital allocation elements of its investment process with a desire to invest opportunistically across the entire global economy. The team seeks broad knowledge of the global economy in order to position it to find growth wherever it occurs.

The Fund primarily invests in common stocks and other equity securities of US and non-US companies, including depositary receipts. The Fund's investments in non-US securities may include investments in developed markets, as well as emerging and less developed markets.

The Fund generally focuses on mid-cap companies; however, there are no restrictions on the market capitalizations of the companies in which the Fund may invest.

The Fund may invest to a limited extent in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers).

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers material sustainability exposures in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider similar factors.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in

many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.

- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund's service providers, the Fund's counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund's Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	30.32	June 30, 2020
Lowest Quarter	-20.46	June 30, 2022

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of two broad-based market indices over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to broad measures of market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Portfolio Management

Investment Adviser: Artisan Partners

Portfolio Managers	Title	Length of Service
Jason L. White, CFA	Managing Director and Lead Portfolio Manager, Artisan Partners	Since August 2017 (inception)
James D. Hamel, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since August 2017 (inception)
Matthew H. Kamm, CFA ¹	Managing Director and Portfolio Manager, Artisan Partners	Since August 2017 (inception)
Jay C. Warner, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since January 2022
Angela S. Wu	Managing Director and Portfolio Manager, Artisan Partners	Since February 2026

¹ Mr. Kamm will step down as Portfolio Manager of the Fund effective 31 December 2026. Mr. Kamm will remain an active member of the Artisan Partners Growth Team in an advisory capacity as a Managing Director.

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Global Equity Fund

Investor: ARTHX | Advisor: APDHX | Institutional: APHHX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder's financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.90%	0.90%	0.90%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses	0.45	0.77	0.20
Total Annual Fund Operating Expenses	1.35	1.67	1.10
Fee Waiver and Expense Reimbursement ¹	0.00	0.42	0.00
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement	1.35	1.25	1.10

¹ Artisan Partners Limited Partnership, the Fund's investment adviser ("Artisan Partners"), has contractually agreed to bear certain expenses and waive its management fees to the extent necessary to cause total annual fund operating expenses (excluding taxes, interest, all commissions and other normal charges incident to the purchase and sale of portfolio securities, acquired fund fees and expenses, borrowing costs such as dividends on securities sold short, and extraordinary charges such as litigation costs, but including management fees paid to Artisan Partners) not to exceed 1.35% of the average daily net assets of Investor Shares and 1.25% of the average daily net assets of Advisor Shares and 1.20% of the average daily net assets of Institutional Shares. This contract continues through 31 January 2027.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund's operating expenses are equal to Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the first year and Total Annual Fund Operating Expenses thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$137	\$428	\$739	\$1,624
Advisor	\$127	\$486	\$868	\$1,941
Institutional	\$112	\$350	\$606	\$1,340

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 187.11% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental stock selection process focused on identifying long-term growth opportunities to build a global (i.e., US and non-US) diversified portfolio of companies of all market capitalizations. The team seeks to invest in companies within its preferred themes with sustainable growth characteristics at attractive valuations that do not fully reflect their long-term potential.

- **Themes**—The team identifies long-term secular growth trends with the objective of investing in companies that have meaningful exposure to these trends. The team's fundamental analysis focuses on those industry leaders with attractive growth and valuation characteristics that will be long-term beneficiaries of any structural change and/or trend.
- **Sustainable Growth**—The team applies a fundamental approach to identifying the long-term, sustainable growth characteristics of potential investments. The team seeks high-quality companies that typically have a sustainable competitive advantage, a superior business model and a high-quality management team. As part of the investment process, the team considers material environmental, social and governance factors alongside other fundamental research.
- **Valuation**—The team uses multiple valuation metrics to establish a target price range. The team assesses the relationship between its estimate of a company's sustainable growth prospects and its current valuation.

Under normal circumstances, the Fund invests not less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in equity securities or instruments that have similar economic characteristics. The Fund may invest in securities both within and outside the US, including emerging and less developed markets. Securities in which the Fund may invest may include common stocks, preferred stocks, convertible securities, depositary receipts and rights and warrants to buy common stocks.

The Fund may invest in US and non-US companies of all market capitalizations.

The Fund may invest to a limited extent in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers).

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers environmental, social and governance factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider environmental, social and governance factors.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts and participation certificates) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.
- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments,

including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.

- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund’s performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund’s direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund’s overall portfolio.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **High Portfolio Turnover Risks** —The Fund may engage in active and frequent trading of its portfolio securities. High portfolio turnover may result in increased transaction costs to the Fund, including brokerage commissions, dealer mark-ups and other transaction costs on the sale of the securities and on reinvestment in other securities. The sale of Fund portfolio securities may result in the realization and/or distribution to shareholders of higher capital gains or losses as compared to a fund with a less active trading strategy. These effects of higher than normal portfolio turnover may adversely affect Fund performance.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund’s distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund’s shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund’s service providers, the Fund’s counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund’s Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	23.56	June 30, 2020
Lowest Quarter	-15.96	March 31, 2020

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Portfolio Management

Investment Adviser: Artisan Partners

Portfolio Managers	Title	Length of Service
Mark L. Yockey, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since March 2010 (inception)
Charles-Henri Hamker	Managing Director and Portfolio Manager, Artisan Partners	Since January 2013

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Global Opportunities Fund

Investor: ARTRX | Advisor: APDRX | Institutional: APHRX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder's financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.89%	0.89%	0.89%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses ¹	0.30	0.17	0.06
Total Annual Fund Operating Expenses	1.19	1.06	0.95

¹ "Other Expenses" include "Acquired Fund Fees and Expenses," which were less than 0.01% of the average net assets of the Fund. "Acquired Fund Fees and Expenses" are indirect expenses the Fund incurred from the Fund's investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses in the table above may not match the ratios of expenses to average net assets shown in the "Financial Highlights" in the Fund's prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$121	\$378	\$654	\$1,443
Advisor	\$108	\$337	\$585	\$1,294
Institutional	\$97	\$303	\$525	\$1,166

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 68.63% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of US and non-US growth companies across a broad capitalization range. The team seeks to invest in companies that it believes possess franchise characteristics, are benefiting from an accelerating profit cycle and are trading at a discount to its estimate of private market value. The Fund's investment process focuses on two distinct elements—security selection and capital allocation. The team overlays its investment process with sustainability considerations and broad knowledge of the global economy.

- **Security Selection**—The team seeks to identify companies that have franchise characteristics (e.g., low cost production capability, possession of a proprietary asset, dominant market share or a defensible brand name), are benefiting from an accelerating profit cycle and

are trading at a discount to the team's estimate of private market value. The team looks for companies that are well positioned for long-term growth, which is driven by demand for their products and services at an early enough stage in their profit cycle to benefit from the increased cash flows produced by the emerging profit cycle.

- **Capital Allocation**—Based on the team's fundamental analysis of a company's profit cycle, it divides the portfolio into three parts. **GardenSM** investments are small positions in the early part of their profit cycle that may warrant more sizeable allocations as their profit cycle accelerates. **CropSM** investments are positions that are being increased to a full weight because the team believes they are moving through the strongest part of their profit cycles. **HarvestSM** investments are positions that are being reduced as they near the team's estimates of full valuation or their profit cycles begin to decelerate.
- **Sustainability Considerations**—The team employs a framework in assessing material sustainability exposures factors that informs its security selection and capital allocation process.
- **Broad Knowledge**—The team overlays the security selection and capital allocation elements of its investment process with a desire to invest opportunistically across the entire global economy. The team seeks broad knowledge of the global economy in order to position it to find growth wherever it occurs.

The Fund primarily invests in common stocks and other equity securities of US and non-US companies, including depositary receipts. The Fund's investments in non-US securities may include investments in developed markets, as well as emerging and less developed markets. The Fund generally focuses on mid- and large-cap companies; however, there are no restrictions on the market capitalizations of the companies in which the Fund may invest.

The Fund may invest to a limited extent in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers).

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers material sustainability exposures in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider similar factors.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts and participation certificates) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.
- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border

trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.

- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund’s performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund’s direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund’s overall portfolio.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund’s distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund’s shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund’s service providers, the Fund’s counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund’s Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	27.66	June 30, 2020
Lowest Quarter	-20.59	June 30, 2022

Average Annual Total Returns —(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund’s performance to market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	5-Year	10-Year	Since Inception	Inception Date
Return before taxes	8.87%	4.02%	11.17%	10.87%	September 22, 2008

Portfolio Management

Investment Adviser: Artisan Partners Limited Partnership ("Artisan Partners")

Portfolio Managers	Title	Length of Service
James D. Hamel, CFA	Managing Director and Co-Lead Portfolio Manager, Artisan Partners	Since September 2008 (inception)
Angela S. Wu	Managing Director and Co-Lead Portfolio Manager, Artisan Partners	Since February 2026
Matthew H. Kamm, CFA ¹	Managing Director and Portfolio Manager, Artisan Partners	Since January 2010
Jason L. White, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since January 2011
Jay C. Warner, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since January 2022

¹ Mr. Kamm will step down as Portfolio Manager of the Fund effective 31 December 2026. Mr. Kamm will remain an active member of the Artisan Partners Growth Team in an advisory capacity as a Managing Director.

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Global Unconstrained Fund

Investor: APFPX | Advisor: APDPX | Institutional: APHPX

Investment Objective

The Fund seeks to provide total return through a combination of current income and long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.95%	0.95%	0.95%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses	1.17	0.86	0.83
Other Operating Expenses	0.74	0.43	0.40
Interest Expenses	0.43	0.43	0.43
Acquired Fund Fees and Expenses ¹	0.02	0.02	0.02
Total Annual Fund Operating Expenses	2.14	1.83	1.80
Fee Waiver and Expense Reimbursement ²	0.45	0.24	0.26
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement	1.69	1.59	1.54

¹ “Acquired Fund Fees and Expenses” shown are for the fiscal year ended 30 September 2025 and are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds and other investment companies (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses and Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

² Artisan Partners Limited Partnership, the Fund’s investment adviser (“Artisan Partners”), has contractually agreed to bear certain expenses and waive its management fees to the extent necessary to cause total annual fund operating expenses (excluding taxes, interest, all commissions and other normal charges incident to the purchase and sale of portfolio securities, acquired fund fees and expenses, borrowing costs such as dividends on securities sold short, and extraordinary charges such as litigation costs, but including management fees paid to Artisan Partners) not to exceed 1.24% of the average daily net assets of Investor Shares, 1.14% of the average daily net assets of Advisor Shares and 1.09% of the average daily net assets of Institutional Shares. This contract continues through 31 January 2027.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses are equal to Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the first year and Total Annual Fund Operating Expenses thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$172	\$627	\$1,108	\$2,437
Advisor	\$162	\$552	\$968	\$2,128
Institutional	\$157	\$541	\$951	\$2,095

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 85.58% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental investment process to construct a differentiated portfolio of securities, derivatives and other instruments that offer long and short exposures around the world. The team seeks to identify countries that are undergoing or poised for strong economic growth or structural changes, such as political, legislative and/or economic reforms. The team seeks to invest in corporate and sovereign debt instruments that offer exposures to those countries at attractive absolute and relative credit risk premium. As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

The Fund primarily invests in debt securities and instruments with similar economic characteristics. The Fund may have significant investment in a particular geographic region or country and typically a portion will be invested in emerging market countries. The Fund may invest without limit in securities and other instruments of US and non-US issuers, including issuers economically tied to emerging market countries, securities traded principally outside the United States, and securities denominated in currencies other than the US dollar.

The Fund is non-diversified, which means that it may invest a greater portion of its assets in a more limited number of issuers than a diversified fund.

The Fund may invest in debt instruments of all types, including, without limitation, sovereign issues, treasury obligations, bonds, loans, commercial paper, credit linked notes, covered bonds, convertible bonds and other fixed-, variable- and floating-rate securities that are either secured or unsecured, and, either senior or subordinated. The Fund may invest, without limitation, in debt instruments of any credit rating, including instruments that are rated below investment grade (below BBB- by Standard & Poor's Rating Service or Fitch, Inc. or below Baa3 by Moody's Investors Service, Inc.), or comparably rated by another nationally recognized statistical rating organization, or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds." The Fund may invest in debt instruments that are non-performing at the time of purchase. The Fund may invest in debt securities of any maturity. The Fund's investments are not subject to any restrictions with respect to duration.

The Fund expects to achieve certain exposures primarily through derivative transactions. These derivatives include, without limitation, forward foreign currency exchange contracts; futures on securities, indices, currencies, commodities, swaps and other investments; options; and swaps, including interest rate swaps, cross-currency swaps, total return swaps and credit default swaps, which may have the effect of creating investment leverage. The Fund may use derivatives to seek to enhance total return, to hedge against fluctuations in securities prices, interest rates or currency exchange rates, to change the effective duration of its portfolio, to manage certain investment risks, for speculation purposes to gain certain types of exposures and/or as a substitute for the purchase or sale of securities, currencies or commodities. The Fund may also utilize derivatives to take short positions in underlying assets and non-USD currencies to hedge certain risk factors. The Fund intends to use all or a portion of the proceeds from its short positions to take additional long positions or otherwise use in a manner consistent with its investment guidelines. The Fund's use of derivatives is frequently extensive.

The Fund expects to hold US Treasury, government agency securities and agency mortgage-backed securities (and derivatives thereon), and stripped securities to use as collateral for its derivatives positions and to help manage duration. The Fund may engage in repurchase agreements, reverse repurchase agreements and forward commitments, and may engage a substantial portion of its assets in short sales.

The Fund may also invest in equity securities and exchange-traded funds ("ETFs"). The Fund may invest in private placements and other restricted securities (i.e., securities that are purchased in private placements and, accordingly, are subject to restrictions on resale as matter of contract or under federal securities laws).

The Fund may have investment exposure to the commodities markets and/or Regulation S securities primarily through investments in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands (the "Subsidiary"). The Fund may invest up to 25% of its total assets in its Subsidiary.

The Fund may borrow up to the amount allowed by applicable law to enhance total return, fund redemptions, post collateral for hedges, or to purchase investments prior to settlement of pending sale transactions.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers environmental, social and governance factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider environmental, social and governance factors.

- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates, unfavorable economic practices, political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.

China-Related Risks: Because the Fund may have a significant exposure to China, it is particularly affected by events or factors relating to China, which may increase risk and volatility.

- **Debt Securities Risks**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. In general, the value of a debt security will fall in response to increases in interest rates. The Fund may invest in debt securities without considering the maturity of the instrument. The value of a security with a longer duration will be more sensitive to changes in interest rates than a similar security with a shorter duration. As a result, changes in interest rates in the US and outside the US may affect the Fund's debt investments unfavorably.
Debt securities in which the Fund invests may be rated below investment grade or unrated securities that are determined by Artisan Partners to be of comparable quality. Debt securities of below investment grade quality are high yield, high risk bonds, commonly known as "junk bonds." These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk, may be less liquid and may be subject to greater price volatility than higher-rated bonds.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Credit Risks**—An issuer or counterparty may fail to pay its obligations to the Fund when they are due. Financial strength and solvency (or the perceived financial strength or solvency) of an issuer are the primary factors influencing credit risk. Changes in the financial condition of an issuer or counterparty, changes in specific economic, social or political conditions that affect a particular type of security or other instrument or an issuer, and changes in economic, social or political conditions generally can increase the risk of default by an issuer or counterparty, which can affect a security's or other instrument's credit quality or value and an issuer's or counterparty's ability to pay interest and principal when due. The values of lower quality debt, including loans, tend to be particularly sensitive to these changes.
- **Interest Rate Risks**—Interest rate risk is the risk that fixed income securities and other instruments in the Fund's portfolio will fluctuate in value because of changes, or the anticipation of changes, in interest rates. In particular, during periods of rising interest rates, the values of such securities may decline and may result in losses to the Fund. Factors including central bank monetary policy, rising inflation rates, and

changes in general economic conditions may cause interest rates to rise, which could cause the value of the Fund's investments to decline. Interest rate changes can be sudden and unpredictable, and the Fund may experience losses as a result of movements in interest rates. The Fund may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile in response to changing interest rates.

- **Derivatives Risks**—A derivative is a financial contract whose value depends on changes in the value of one or more underlying assets, reference rates or indexes. These instruments include, among others, forward foreign currency exchange contracts; futures on securities, indices, currencies, commodities, swaps and other investments; options; swaps, including interest rate swaps, cross-currency swaps, total return swaps and credit default swaps and similar instruments. The Fund's use of derivatives may involve risks different from, or greater than, the risks associated with investing in more traditional investments, such as stocks and bonds. Derivatives can be highly complex and may perform in ways unanticipated by Artisan Partners.

In addition to the risks of an adverse change in the value of the underlying reference asset, the Fund's use of derivatives, including, but not limited to, over-the-counter ("OTC") derivatives, involves the risk that the other party to the derivative contract will fail to make required payments or otherwise to comply with the terms of the contract. Derivatives transactions can create investment leverage and may be highly volatile, and the Fund could lose more than the amount it invests, especially in unusual or extreme market conditions. Derivatives may be difficult to value and highly illiquid, and the Fund may not be able to close out or sell a derivative position at a particular time or at an anticipated price.

US and non-US legislative and regulatory reforms, including those related to the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), have resulted in, and may in the future result in, new regulation of derivative instruments and the Fund's use of such instruments. New regulations could, among other things, restrict the Fund's ability to engage in derivative transactions (for example, by making certain types of derivative instruments or transactions no longer available to the Fund) and/or increase the costs of such transactions, and the Fund may as a result be unable to execute its investment strategies in a manner Artisan Partners might otherwise choose.

- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Foreign Sovereign Debt Risks**—The Fund's investments in debt obligations of sovereign governments may lose value due to the government entity's unwillingness or inability to repay principal and interest when due in accordance with the terms of the debt or otherwise in a timely manner. Sovereign governments may default on their debt obligations for a number of reasons, including social, political, economic and diplomatic changes in countries issuing sovereign debt.
- **Futures Contract Risks**—The Fund may enter into futures contracts, in which the Fund agrees to buy or sell a security or other asset on a specified future date at a specified price or rate. There are risks associated with futures contracts, including that the success of such an investment strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; there may be an imperfect or no correlation between the changes in market value of the securities held by the Fund and the prices of futures; there may not be a liquid secondary market for a futures contract; trading restrictions or limitations may be imposed by an exchange; and government regulations may restrict trading in futures contracts.
- **Credit Default Swaps Risks**—A credit default swap enables an investor to buy or sell protection against a credit event with respect to an issuer. Credit default swaps may have as reference obligations one or more securities that are not currently held by the Fund. The protection "buyer" may be obligated to pay the protections "seller" an up-front payment or a periodic stream of payments over the term of the contract, provided generally that no credit event on a reference obligation has occurred. When the Fund acts as a buyer of a credit default swap, it may lose its investment and recover nothing should no credit event occur and the swap is held to its termination date. When the Fund acts as a seller of a credit default swap, it must pay a buyer the full notional value of the reference obligation, and the Fund may not be profitable if no secondary market exists or the Fund is otherwise unable to close out these transactions at advantageous time. Credit default swaps involve special risks because they are difficult to value, are highly susceptible to liquidity and credit risk, and generally pay a return to the party that has paid the premium only in the event of an actual default by the issuer of the underlying obligation (as opposed to a credit downgrade or other indication of financial difficulty).
- **Short Position Risks**—The risk that an increase in the value of an instrument with respect to which the Fund has established a short position for investment and/or risk management purposes will result in a loss to the Fund.
- **Leverage Risks**—Certain transactions, including, for example, the use of certain derivatives and borrowing money, can result in leverage. Leverage generally has the effect of increasing the amounts of loss or gain the Fund might realize and creates the likelihood of greater volatility of the value of the Fund's investments. There is risk of loss in excess of invested capital.
- **High Yield Securities ("Junk Bond") Risks**—Fixed income instruments rated below investment grade, or unrated securities that are determined by Artisan Partners to be of comparable quality, are high yield, high risk bonds, commonly known as "junk bonds." These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk and may be less liquid than higher-rated bonds. These

securities may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity, negative perceptions of junk bonds generally and less secondary market liquidity. This potential lack of liquidity may make it more difficult for the Fund to accurately value these securities.

- **Mortgage-Related and Other Asset-Backed Instruments Risks**—Mortgage-related and other asset-backed securities typically provide a monthly payment which consists of both principal and interest. In times of declining interest rates, there is a greater likelihood that a Fund's higher yielding securities will be pre-paid with the Fund being unable to reinvest the proceeds in an investment with as great a yield. Pools created and guaranteed by non-governmental issuers, including government-sponsored corporations, may be supported by various forms of insurance or guarantees, but there can be no assurance that private insurers or guarantors can meet their obligations under the insurance policies or guarantee arrangements. Many of the risks of investing in mortgage-related securities secured by commercial mortgage loans ("CMBS") reflect the effects of local and other economic conditions on real estate markets, the ability of tenants to make lease payments, and the ability of a property to attract and retain tenants. These securities may be less liquid and may exhibit greater price volatility than other types of mortgage-related or other asset-backed securities.
- **Government Securities Risks**—The Fund invests in securities issued or guaranteed by the US Government or its agencies and instrumentalities (such as the Government National Mortgage Association ("Ginnie Mae"), the Federal National Mortgage Association ("Fannie Mae"), or the Federal Home Loan Mortgage Corporation ("Freddie Mac")). Unlike Ginnie Mae securities, securities issued or guaranteed by US Government-related organizations, such as Fannie Mae and Freddie Mac, are not backed by the full faith and credit of the US Government and no assurance can be given that the US Government would provide financial support.
- **Counterparty Risks**—The Fund will be subject to credit risk with respect to the counterparties to the derivative contracts and other instruments entered into by the Fund. If a counterparty becomes bankrupt or insolvent or otherwise fails to perform its obligations to the Fund due to financial difficulties, the Fund may experience significant losses or delays in obtaining any recovery (including recovery of any collateral it has provided to the counterparty) from the counterparty.
- **Loan Risks**—Investments in loans, including floating or adjustable rate loans, are generally subject to the same risks as investments in other types of debt obligations, including, among others, the credit risk of nonpayment of principal and interest. In addition, in many cases loans are subject to the risks associated with below investment grade securities. The Fund may invest in loans made in connection with highly leveraged transactions, which are subject to greater credit and liquidity risks than other types of loans. Although the loans in which the Fund invests may be secured by specific collateral, there can be no assurance that liquidation of such collateral would satisfy the borrower's obligation in the event of nonpayment of scheduled interest or principal, or that such collateral could be readily liquidated. In the event of the bankruptcy of a borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a loan or could recover nothing of what it is owed on the loan. Uncollateralized (i.e., non-secured) loans are subject to greater risk of loss (i.e., nonpayment) in the event of default than secured loans since they do not afford the Fund recourse to collateral. Investments in loans may be difficult to value and may be illiquid, including due to legal or contractual restrictions on resale. Transactions in many loans settle on a delayed basis, and the Fund may not receive the proceeds from the sale of a loan for a substantial period after the sale. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or meet redemption obligations until a substantial period after the sale of the loans.
- **Convertible Securities Risks**—Investing in convertible securities subjects the Fund to the risks of debt, but also the risks associated with an investment in the underlying equity security. Convertible securities are frequently issued with a call feature that allows the issuer to choose when to redeem the security, which could result in the Fund being forced to redeem, convert, or sell the convertible security under circumstances unfavorable to the Fund.
- **Stressed and Distressed Instruments Risks**—Investments in the securities of financially stressed or distressed issuers involve substantial risks, including the risk that all or a portion of principal will not be repaid. These securities may present a substantial risk of default or may be in default at the time of investment. The Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal or interest on its portfolio holdings. As with any issuer, the team's judgments about the credit quality of a financially stressed or distressed issuer and the relative value of its securities may prove to be wrong.
- **Liquidity Risks**—Liquidity risk is the risk that the Fund may be unable to sell a portfolio investment at a desirable time or at the value the Fund has placed on the investment. It may be more difficult for the Fund to determine a fair value of an illiquid investment than that of a more liquid comparable investment.
- **Non-Diversification Risks**—As a non-diversified fund, the Fund may invest a larger portion of its assets in securities of a smaller number of issuers than a diversified fund, which means a single issuer's performance may affect Fund performance more than if the Fund were invested in a larger number of issuers.
- **LIBOR Replacement Risks**—The coupons on variable and floating rate investments in which the Fund may invest are not fixed and may fluctuate based upon changes in market rates. The coupon on a floating rate investment is generally based on an interest rate, such as the Secured Overnight Financing Rate ("SOFR"). Some floating or variable rate obligations or investments of a Fund may have previously referenced the London Interbank Offered Rate ("LIBOR"). As a result of benchmark reforms, publication of all LIBOR settings has ceased. Public and private sector actors have worked to establish alternative reference rates, like SOFR or Term SOFR (a forward-looking measurement of market expectations of SOFR implied from certain derivatives markets), to be used in place of LIBOR, but it remains uncertain which alternative benchmarks will ultimately emerge as the most prevalent successors and the transition process may lead to an increase in market, operational and valuation uncertainties and volatility.

- **Investment in Exchange-Traded Funds (“ETF”) Risks**—ETFs generally expose their shareholders to the risks associated with the assets in which the ETF invests. Additionally, as exchange-traded investment vehicles, ETFs may involve market risk, management risk and (for index funds) tracking risk. If the Fund acquires shares of an ETF, shareholders bear both their proportionate share of expenses in the Fund (including management and advisory fees) and, indirectly, the expenses of the ETF.
- **Private Placement and Restricted Securities Risks**—In addition to the general risks to which all securities are subject, securities acquired in a private placement generally are subject to strict restrictions on resale, and there may be no liquid secondary market or ready purchaser for such securities, and a liquid secondary market may never develop. Therefore, the Fund may be unable to dispose of such securities when it desires to do so or at a favorable time or price. This potential lack of liquidity may make it more difficult for the Fund to accurately value these securities. Issuers of private placements or other restricted securities may include special purpose vehicles (“SPVs”) that hold underlying assets to which the Fund wants to gain exposure. The Fund may have the right to receive payments only from the SPV, and may not have direct rights against the issuer of the underlying assets. Investors in such SPVs generally pay their share of the SPV’s administrative and other expenses, including management fees.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Valuation Risks**—The Fund’s investments are valued in accordance with Artisan Partners’ valuation policies. The valuation of any investment involves inherent uncertainty. The value of a security determined in accordance with the valuation policies may differ materially from the value that could have been realized in an actual sale or transfer for a variety of reasons, including the timing of the transaction and liquidity in the market.
- **Repurchase Agreement Risks**—The Fund may enter into repurchase agreements, which are transactions in which the Fund purchases a security from a bank or recognized securities dealer and simultaneously commits to resell that security to the bank or dealer at an agreed upon price, date and market rate of interest unrelated to the coupon rate or maturity of the purchased security. To the extent that the proceeds from any sale of collateral upon a default in the obligation to repurchase were less than the repurchase price, the Fund would suffer a loss. If the financial institution that is party to the repurchase agreement petitions for bankruptcy or otherwise becomes subject to bankruptcy or other liquidation proceedings, there may be restrictions on the Fund’s ability to sell the collateral and the Fund could suffer a loss. In addition, to the extent that the Fund enters into repurchase agreements, the ability of the Fund to meet its objective may be limited.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund’s distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund’s shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund’s service providers, the Fund’s counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund’s Investor Shares has varied over time. On 2 January 2025, the fair value methodology used to value emerging market debt, as determined by a third party vendor, held by the Fund was changed from using bid pricing to using the midpoint between the bid and ask price. The change resulted in a one-time increase of less than 0.35% in the net asset value for the Fund.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	4.84	March 31, 2024
Lowest Quarter	0.87	June 30, 2024

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of two broad-based market indices over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to broad measures of market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	Since Inception	Inception Date
Return before taxes	11.43%	9.72%	March 31, 2022
Return after taxes on distributions	9.11%	6.67%	
Return after taxes on distributions and sale of Fund shares	6.71%	6.15%	
ICE BofA 3-Month US Treasury Bill Index (reflects no deduction for fees, expenses or taxes)	4.18%	4.22%	
ICE BofA US Treasury Bill Index (reflects no deduction for fees, expenses or taxes)	4.28%	4.26%

Updated performance information, including current NAV per share, may be obtained by calling 800.344.1770 or visiting www.artisanpartners.com.

Portfolio Management

Investment Adviser: Artisan Partners

Portfolio Managers	Title	Length of Service
Michael A. Cirami, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since March 2022 (inception)
Sarah C. Orvin, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since March 2022 (inception)

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by

express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Global Value Fund

Investor: ARTGX | Advisor: APDGX | Institutional: APHGX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.98%	0.98%	0.98%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses ¹	0.28	0.13	0.04
Total Annual Fund Operating Expenses	1.26	1.11	1.02

¹ “Other Expenses” include “Acquired Fund Fees and Expenses,” which were less than 0.01% of the average net assets of the Fund. “Acquired Fund Fees and Expenses” are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$128	\$400	\$692	\$1,523
Advisor	\$113	\$353	\$612	\$1,352
Institutional	\$104	\$325	\$563	\$1,248

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 17.38% of the average value of its portfolio.

Principal Investment Strategies

The Fund’s investment team employs a fundamental investment process to construct a diversified portfolio of securities of undervalued US and non-US companies. The team seeks to invest in what the team considers to be high quality, undervalued companies with strong balance sheets and shareholder-oriented management teams.

The team’s investment process focuses on four key characteristics:

- **Undervaluation**—Determining the intrinsic value of a business is the heart of the team’s research process. The team believes that intrinsic value represents the amount that a buyer would pay to own a company’s future cash flows. The team seeks to invest at a significant discount to its estimate of the intrinsic value of a business.

- **Business Quality**—The team seeks to invest in companies with histories of generating strong free cash flow, improving returns on capital and strong competitive positions in their industries.
- **Financial Strength**—The team believes that investing in companies with strong balance sheets helps to reduce the potential for capital risk and provides company management the ability to build value when attractive opportunities are available.
- **Shareholder-Oriented Management**—The team's research process attempts to identify management teams with a history of building value for shareholders.

Companies that make it through this analytical process are ranked at the time the position is initiated according to the degree of the discount of the current market price of the stock to the team's estimate of the company's intrinsic value. The team manages the portfolio by generally taking larger positions in companies where the discount is greatest and smaller positions in companies with narrower discounts (subject to adjustments for investment-related concerns, including diversification, risk management and liquidity). As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

The focus of the investment process is on individual companies, not on selection of countries or regions.

Under normal market conditions, the Fund primarily invests in common stocks and other equity securities, both within and outside the US. The Fund also may invest in emerging and less developed markets.

The Fund generally invests in US and non-US companies with market capitalizations of at least \$2 billion at the time of initial purchase. The Fund may continue to invest in a company should its market capitalization fall below \$2 billion.

The Fund may invest to a limited extent in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers).

From time to time, the team may conclude that a security other than an equity security presents a more attractive risk/reward profile. Accordingly, the Fund may invest to a limited extent in debt securities (including lower-rated securities, which include securities rated below investment grade (below BBB- by Standard & Poor's Rating Services ("S&P") or Fitch, Inc. ("Fitch") or below Baa3 by Moody's Investors Service, Inc. ("Moody's")), or comparably rated by another nationally recognized statistical rating organization ("NRSRO"), or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds,") and convertible debt securities of US or non-US issuers that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers environmental, social and governance factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider environmental, social and governance factors.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts and participation certificates) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other

significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.

- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Value Investing Risks**—Value stocks may fall out of favor with investors and underperform other asset types during given periods. The price of a company's stock may never reach the level that the team considers its intrinsic value.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Debt Securities Risks**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. In general, the value of a debt security will fall in response to increases in interest rates. The Fund may invest in debt securities without considering the maturity of the instrument. The value of a security with a longer duration will be more sensitive to changes in interest rates than a similar security with a shorter duration. As a result, changes in interest rates in the US and outside the US may affect the Fund's debt investments unfavorably.
Debt securities in which the Fund invests may be rated below investment grade or unrated securities that are determined by Artisan Partners to be of comparable quality. Debt securities of below investment grade quality are high yield, high risk bonds, commonly known as "junk bonds." These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk, may be less liquid and may be subject to greater price volatility than higher-rated bonds.
- **Convertible Securities Risks**—Investing in convertible securities subjects the Fund to the risks of debt, but also the risks associated with an investment in the underlying equity security. Convertible securities are frequently issued with a call feature that allows the issuer to choose when to redeem the security, which could result in the Fund being forced to redeem, convert, or sell the convertible security under circumstances unfavorable to the Fund.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.

- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund’s service providers, the Fund’s counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund’s Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	21.65	December 31, 2020
Lowest Quarter	-29.60	March 31, 2020

Average Annual Total Returns —(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund’s performance to market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	5-Year	10-Year	Since Inception	Inception Date
Return before taxes	33.98%	13.40%	11.14%	9.17%	December 10, 2007
Return after taxes on distributions	31.73%	11.69%	9.99%	8.31%	
Return after taxes on distributions and sale of Fund shares	20.28%	10.04%	8.76%	7.46%	
MSCI ACWI (All Country World Index) Index (reflects no deduction for fees, expenses or taxes)	22.34%	11.19%	11.72%	7.12%	
Advisor					
Return before taxes	34.20%	13.57%	11.30%	10.12%	April 01, 2015

Updated performance information, including current NAV per share, may be obtained by calling 800.344.1770 or visiting www.artisanpartners.com.

Portfolio Management

Investment Adviser: Artisan Partners Limited Partnership (“Artisan Partners”)

Portfolio Managers	Title	Length of Service
Daniel J. O’Keefe	Managing Director and Lead Portfolio Manager, Artisan Partners	Since December 2007 (inception)
Michael J. McKinnon, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since October 2018

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan High Income Fund

Investor: ARTFX | Advisor: APDFX | Institutional: APHFX

Investment Objective

The Fund seeks to provide total return through a combination of current income and capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee (as a percentage of amount redeemed or exchanged within 90 days or less)	2.00%	2.00%	2.00%

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.67%	0.67%	0.67%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses	0.27	0.12	0.02
Acquired Fund Fees and Expenses ¹	0.01	0.01	0.01
Total Annual Fund Operating Expenses	0.95	0.80	0.70

¹ “Acquired Fund Fees and Expenses” shown are for the fiscal year ended 30 September 2025 and are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$97	\$303	\$525	\$1,166
Advisor	\$82	\$255	\$444	\$990
Institutional	\$72	\$224	\$390	\$871

Portfolio Turnover

The Fund incurs transaction costs when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 29.82% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to invest in issuers with high quality business models that have compelling risk-adjusted return characteristics. The Fund employs a fundamental investment process to construct a diversified portfolio of attractively valued high yield corporate bonds (often referred to as “junk bonds”) and secured and unsecured loans, including, without limitation, bridge financing, senior and subordinated loans, delayed funding loans and revolving credit facilities, and loan participations and assignments.

The Fund’s investment team’s research process has four primary pillars:

- **Business Quality**—The team uses a variety of sources to understand the resiliency of an issuer’s business model. The team analyzes the general health of the industry in which an issuer operates, the issuer’s competitive position, barriers to entry, the dynamics of industry

participants, and the decision-making history of the issuer's management and, when applicable, financial equity sponsor. As part of the team's analysis of a company's business quality, among other factors, the team considers certain environmental, social and governance ("ESG") factors relating to the company. These ESG factors may include the impact of environmental regulatory change, the use of human, natural and physical resources and corporate governance structures and practices. When the team deems a factor material to the value of a company, the team incorporates it into its decision-making process.

- **Financial Strength and Flexibility**—The team believes that analyzing the history and trend of free cash flow generation is critical to understanding an issuer's financial health. The team's financial analysis also considers an issuer's capital structure, refinancing options, asset or collateral coverage, financial covenants, amortization schedules and overall financial transparency.
- **Downside Analysis**—The team believes that credit instruments by their nature have an asymmetric risk profile. The risk of loss is often greater than the potential for gain, particularly when looking at below investment grade issuers. The team seeks to manage this risk with what it believes to be conservative financial projections that account for industry position, competitive dynamics and positioning within the capital structure.
- **Value Identification**—The team uses multiple metrics to determine the value of an investment opportunity. The team looks for credit improvement potential, relative value within an issuer's capital structure and against industry peers, catalysts for business improvement and potential value stemming from market or industry dislocations and/or mergers and acquisitions ("M&A").

Under normal circumstances, the Fund will invest primarily in instruments that are rated, at the time of purchase, below investment grade (below BBB- by Standard & Poor's Rating Services ("S&P") or Fitch, Inc. ("Fitch") or below Baa3 by Moody's Investors Service, Inc. ("Moody's")), or comparably rated by another nationally recognized statistical rating organization ("NRSRO"), or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds." The Fund may invest a significant portion of its assets in high-yield securities that are rated in the lower rating categories by one or more NRSRO (for example, CCC+ or lower by S&P or Fitch or Caa1 or lower by Moody's) or, if unrated, are determined by Artisan Partners to be of comparable quality. The Fund may invest in debt securities of any maturity.

The Fund may invest without limit in securities and other instruments of US and non-US issuers, including issuers economically tied to "emerging market" countries, securities traded principally outside of the United States, and securities denominated in currencies other than the US dollar. The Fund usually seeks (but is not required) to hedge against the risk of loss resulting from currency fluctuation. The Fund may invest in private placements and other restricted securities (i.e., securities that are purchased in private placements and, accordingly, are subject to restrictions on resale as a matter of contract or under federal securities laws).

In addition to high yield corporate bonds and loans, the Fund also may invest in other corporate fixed income instruments of varying maturities, including fixed-, variable- and floating-rate bonds, debentures, notes, commercial paper and other types of corporate debt instruments across the credit quality spectrum, such as stressed and distressed debt securities.

The Fund may use derivatives for investment, duration management or hedging purposes, or with the purpose or effect of creating investment leverage. The Fund also may invest in debt obligations issued by governments (including, without limitation, obligations issued or guaranteed by the US government) and/or their agencies and instrumentalities.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers ESG factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider ESG factors.
- **Debt Securities Risks**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. Investments in debt securities are subject to, among other risks, credit risk, interest rate risk and high yield securities ("junk bond") risk, as described below.
- **Credit Risks**—An issuer or counterparty may fail to pay its obligations to the Fund when they are due. Financial strength and solvency (or the perceived financial strength or solvency) of an issuer are the primary factors influencing credit risk. Changes in the financial condition of an issuer or counterparty, changes in specific economic, social or political conditions that affect a particular type of security or other instrument or an issuer, and changes in economic, social or political conditions generally can increase the risk of default by an issuer or counterparty, which can affect a security's or other instrument's credit quality or value and an issuer's or counterparty's ability to pay interest and principal when due. The values of lower quality debt, including loans, tend to be particularly sensitive to these changes.

- **High Yield Securities (“Junk Bond”) Risks**—Fixed income instruments rated below investment grade, or unrated securities that are determined by Artisan Partners to be of comparable quality, are high yield, high risk bonds, commonly known as “junk bonds.” These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk and may be less liquid than higher-rated bonds. These securities may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity, negative perceptions of junk bonds generally and less secondary market liquidity. This potential lack of liquidity may make it more difficult for the Fund to accurately value these securities.
- **Interest Rate Risks**—Interest rate risk is the risk that fixed income securities and other instruments in the Fund’s portfolio will fluctuate in value because of changes, or the anticipation of changes, in interest rates. In particular, during periods of rising interest rates, the values of such securities may decline and may result in losses to the Fund. Factors including central bank monetary policy, rising inflation rates, and changes in general economic conditions may cause interest rates to rise, which could cause the value of the Fund’s investments to decline. Interest rate changes can be sudden and unpredictable, and the Fund may experience losses as a result of movements in interest rates. The Fund may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile in response to changing interest rates.
- **Loan Risks**—Investments in loans, including floating or adjustable rate loans, are generally subject to the same risks as investments in other types of debt obligations, including, among others, the credit risk of nonpayment of principal and interest. In addition, in many cases loans are subject to the risks associated with below investment grade securities. The Fund may invest in loans made in connection with highly leveraged transactions, which are subject to greater credit and liquidity risks than other types of loans. Although the loans in which the Fund invests may be secured by specific collateral, there can be no assurance that liquidation of such collateral would satisfy the borrower’s obligation in the event of nonpayment of scheduled interest or principal, or that such collateral could be readily liquidated. In the event of the bankruptcy of a borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a loan or could recover nothing of what it is owed on the loan. Uncollateralized (i.e., non-secured) loans are subject to greater risk of loss (i.e., nonpayment) in the event of default than secured loans since they do not afford the Fund recourse to collateral. Investments in loans may be difficult to value and may be illiquid, including due to legal or contractual restrictions on resale. Transactions in many loans settle on a delayed basis, and the Fund may not receive the proceeds from the sale of a loan for a substantial period after the sale. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or meet redemption obligations until a substantial period after the sale of the loans.
- **Liquidity Risks**—Liquidity risk is the risk that the Fund may be unable to sell a portfolio investment at a desirable time or at the value the Fund has placed on the investment. It may be more difficult for the Fund to determine a fair value of an illiquid investment than that of a more liquid comparable investment.
- **Valuation Risks**—The Fund’s investments are valued in accordance with Artisan Partners’ valuation policies. The valuation of any investment involves inherent uncertainty. The value of a security determined in accordance with the valuation policies may differ materially from the value that could have been realized in an actual sale or transfer for a variety of reasons, including the timing of the transaction and liquidity in the market.
- **Stressed and Distressed Instruments Risks**—Investments in the securities of financially stressed or distressed issuers involve substantial risks, including the risk that all or a portion of principal will not be repaid. These securities may present a substantial risk of default or may be in default at the time of investment. The Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal or interest on its portfolio holdings. As with any issuer, the team’s judgments about the credit quality of a financially stressed or distressed issuer and the relative value of its securities may prove to be wrong.
- **Futures Contract Risks**—The Fund may enter into futures contracts, in which the Fund agrees to buy or sell a security or other asset on a specified future date at a specified price or rate. There are risks associated with futures contracts, including that the success of such an investment strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; there may be an imperfect or no correlation between the changes in market value of the securities held by the Fund and the prices of futures; there may not be a liquid secondary market for a futures contract; trading restrictions or limitations may be imposed by an exchange; and government regulations may restrict trading in futures contracts.
- **Counterparty Risks**—The Fund will be subject to credit risk with respect to the counterparties to the derivative contracts and other instruments entered into by the Fund. If a counterparty becomes bankrupt or insolvent or otherwise fails to perform its obligations to the Fund due to financial difficulties, the Fund may experience significant losses or delays in obtaining any recovery (including recovery of any collateral it has provided to the counterparty) from the counterparty.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates, unfavorable economic practices, political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including “frontier markets”, which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less

mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.

- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund’s performance will be affected by its direct or indirect exposure to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund’s direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Private Placement and Restricted Securities Risks**—In addition to the general risks to which all securities are subject, securities acquired in a private placement generally are subject to strict restrictions on resale, and there may be no liquid secondary market or ready purchaser for such securities, and a liquid secondary market may never develop. Therefore, the Fund may be unable to dispose of such securities when it desires to do so or at a favorable time or price. This potential lack of liquidity may make it more difficult for the Fund to accurately value these securities. Issuers of private placements or other restricted securities may include special purpose vehicles (“SPVs”) that hold underlying assets to which the Fund wants to gain exposure. The Fund may have the right to receive payments only from the SPV, and may not have direct rights against the issuer of the underlying assets. Investors in such SPVs generally pay their share of the SPV’s administrative and other expenses, including management fees.
- **Leverage Risks**—Certain transactions, including, for example, the use of certain derivatives and borrowing money, can result in leverage. Leverage generally has the effect of increasing the amounts of loss or gain the Fund might realize and creates the likelihood of greater volatility of the value of the Fund’s investments. There is risk of loss in excess of invested capital.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund’s overall portfolio.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund’s distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund’s shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund’s service providers, the Fund’s counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund’s Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	12.13	June 30, 2020
Lowest Quarter	-13.78	March 31, 2020

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of two broad-based market indices over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to broad measures of market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Portfolio Management

Investment Adviser: Artisan Partners Limited Partnership ("Artisan Partners")

Portfolio Manager	Title	Length of Service
Bryan C. Krug, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since March 2014 (inception)

Purchase and Sale of Fund Shares

The Fund is closed to most new investors. See "Investing with Artisan Partners Funds—Who is Eligible to Invest in a Closed Fund?" in the Fund's statutory prospectus for new account eligibility criteria.

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should

contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan International Fund

Investor: ARTIX | Advisor: APDIX | Institutional: APHIX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.94%	0.94%	0.94%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses ¹	0.25	0.11	0.02
Total Annual Fund Operating Expenses	1.19	1.05	0.96

¹ “Other Expenses” include “Acquired Fund Fees and Expenses,” which were less than 0.01% of the average net assets of the Fund. “Acquired Fund Fees and Expenses” are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$121	\$378	\$654	\$1,443
Advisor	\$107	\$334	\$579	\$1,283
Institutional	\$98	\$306	\$531	\$1,178

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 111.26% of the average value of its portfolio.

Principal Investment Strategies

The Fund’s investment team employs a fundamental stock selection process focused on identifying long-term growth opportunities to build a diversified portfolio of non-US growth companies of all market capitalizations. The team seeks to invest in companies within its preferred themes with sustainable growth characteristics at attractive valuations that do not fully reflect their long-term potential.

- **Themes**—The team identifies long-term secular growth trends with the objective of investing in companies that have meaningful exposure to these trends. The team’s fundamental analysis focuses on those industry leaders with attractive growth and valuation characteristics that will be long-term beneficiaries of any structural change and/or trend.

- **Sustainable Growth**—The team applies a fundamental approach to identifying the long-term, sustainable growth characteristics of potential investments. The team seeks high-quality companies that typically have a sustainable competitive advantage, a superior business model and a high-quality management team. As part of the investment process, the team considers material environmental, social and governance factors alongside other fundamental research.
- **Valuation**—The team uses multiple valuation metrics to establish a target price range. The team assesses the relationship between its estimate of a company's sustainable growth prospects and its current valuation.

The Fund invests primarily in developed markets but also may invest up to 35% of the Fund's total assets at market value at the time of purchase in emerging and less developed markets. Under normal market conditions, the Fund is substantially fully invested in common stocks and similar securities, and invests at least 65% of its net assets at market value at the time of purchase in securities of non-US companies. There are no restrictions on the size of the companies in which the Fund may invest.

The Fund may invest to a limited extent in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers).

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers environmental, social and governance factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider environmental, social and governance factors.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts and participation certificates) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.
- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.

- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund's service providers, the Fund's counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund's Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Portfolio Management

Investment Adviser: Artisan Partners Limited Partnership ("Artisan Partners")

Portfolio Manager	Title	Length of Service
Mark L. Yockey, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since December 1995 (inception)
Charles-Henri Hamker	Managing Director and Associate Portfolio Manager, Artisan Partners	Since February 2012

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These

payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan International Explorer Fund

Advisor: ARDBX | Institutional: ARHBX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None
Exchange Fee	None	None
Redemption Fee	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Advisor	Institutional
Management Fees	1.05%	1.05%
Distribution (12b-1) Fees	None	None
Total Other Expenses	0.20	0.15
Acquired Fund Fees and Expenses ¹	0.02	0.02
Total Annual Fund Operating Expenses	1.27	1.22
Fee Waiver and Expense Reimbursement ²	0.00	0.00
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement	1.27	1.22

¹ “Acquired Fund Fees and Expenses” shown are for the fiscal year ended 30 September 2025 and are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses and Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

² Artisan Partners Limited Partnership, the Fund’s investment adviser (“Artisan Partners”), has contractually agreed to bear certain expenses and waive its management fees to the extent necessary to cause total annual fund operating expenses (excluding taxes, interest, all commissions and other normal charges incident to the purchase and sale of portfolio securities, acquired fund fees and expenses, borrowing costs such as dividends on securities sold short, and extraordinary charges such as litigation costs, but including management fees paid to Artisan Partners) not to exceed 1.40% of the average daily net assets of Advisor Shares and 1.35% of the average daily net assets of Institutional Shares. This contract continues through 31 January 2027.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses are equal to Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the first year and Total Annual Fund Operating Expenses thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Advisor	\$129	\$403	\$697	\$1,534
Institutional	\$124	\$387	\$670	\$1,477

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 27.36% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of securities of undervalued, primarily non-US small companies. The team seeks to invest in what the team considers to be high quality, undervalued companies with strong balance sheets and shareholder-oriented management teams.

The team's investment process focuses on four key characteristics:

- **Undervaluation**—Determining the intrinsic value of a business is the heart of the team's research process. The team believes that intrinsic value represents the amount that a buyer would pay to own a company's future cash flows. The team seeks to invest at a significant discount to its estimate of the intrinsic value of a business.
- **Business Quality**—The team seeks to invest in companies with histories of generating strong free cash flow, improving returns on capital and strong competitive positions in their industries.
- **Financial Strength**—The team believes that investing in companies with strong balance sheets helps to reduce the potential for capital risk and provides company management the ability to build value when attractive opportunities are available.
- **Shareholder-Oriented Management**—The team's research process attempts to identify management teams with a history of building value for shareholders.

Companies that make it through this analytical process are ranked at the time the position is initiated according to the degree of the discount of the current market price of the stock to the team's estimate of the company's intrinsic value. The team manages the portfolio by generally taking larger positions in companies where the discount is greatest and smaller positions in companies with narrower discounts (subject to adjustments for investment-related concerns, including diversification, risk management and liquidity). As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

The focus of the investment process is on individual companies, not on selection of countries or regions. Under normal market conditions, the Fund invests no less than 65% of its total assets (excluding cash and cash equivalents), measured at market value at the time of purchase, in common stocks and other securities of non-US companies. The Fund is non-diversified, which means that it may invest a greater portion of its assets in a more limited number of issuers than a diversified fund. As a result, a high percentage of the Fund's total assets may be invested in a particular company, sector or industry. The Fund may invest a substantial portion of its total assets in emerging and less developed markets. The Fund may invest in companies of any size, but anticipates investing primarily in small-capitalization ("small-cap") companies. Small-cap companies for this purpose are those companies with a market capitalization below \$5 billion at the time of the Fund's investment.

The Fund may invest to a limited extent in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers). The Fund may (but is not required) to hedge against the risk of loss resulting from currency fluctuation.

The Fund invests primarily in equity securities but, from time to time, the team may conclude that a security other than an equity security presents a more attractive risk/reward profile. Accordingly, the Fund may invest to a limited extent in debt securities of US and non-US issuers, including loans, that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity or duration.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers environmental, social and governance factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider environmental, social and governance factors.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of

loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.

- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Liquidity Risks**—Liquidity risk is the risk that the Fund may be unable to sell a portfolio investment at a desirable time or at the value the Fund has placed on the investment. It may be more difficult for the Fund to determine a fair value of an illiquid investment than that of a more liquid comparable investment.
- **Non-Diversification Risks**—As a non-diversified fund, the Fund may invest a larger portion of its assets in securities of a smaller number of issuers than a diversified fund, which means a single issuer's performance may affect Fund performance more than if the Fund were invested in a larger number of issuers.
- **Value Investing Risks**—Value stocks may fall out of favor with investors and underperform other asset types during given periods. The price of a company's stock may never reach the level team considers its intrinsic value.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Debt Securities Risks**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. In general, the value of a debt security will fall in response to increases in interest rates. The Fund may invest in debt securities without considering the maturity of the instrument. The value of a security with a longer duration will be more sensitive to changes in interest rates than a similar security with a shorter duration. As a result, changes in interest rates in the US and outside the US may affect the Fund's debt investments unfavorably.
- **Loan Risks**—Investments in loans, including floating or adjustable rate loans, are generally subject to the same risks as investments in other types of debt obligations, including, among others, the credit risk of nonpayment of principal and interest. In addition, in many cases loans are subject to the risks associated with below investment grade securities. The Fund may invest in loans made in connection with highly

leveraged transactions, which are subject to greater credit and liquidity risks than other types of loans. Although the loans in which the Fund invests may be secured by specific collateral, there can be no assurance that liquidation of such collateral would satisfy the borrower's obligation in the event of nonpayment of scheduled interest or principal, or that such collateral could be readily liquidated. In the event of the bankruptcy of a borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a loan or could recover nothing of what it is owed on the loan. Uncollateralized (i.e., non-secured) loans are subject to greater risk of loss (i.e., nonpayment) in the event of default than secured loans since they do not afford the Fund recourse to collateral. Investments in loans may be difficult to value and may be illiquid, including due to legal or contractual restrictions on resale. Transactions in many loans settle on a delayed basis, and the Fund may not receive the proceeds from the sale of a loan for a substantial period after the sale. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or meet redemption obligations until a substantial period after the sale of the loans.

- **Convertible Securities Risks**—Investing in convertible securities subjects the Fund to the risks of debt, but also the risks associated with an investment in the underlying equity security. Convertible securities are frequently issued with a call feature that allows the issuer to choose when to redeem the security, which could result in the Fund being forced to redeem, convert, or sell the convertible security under circumstances unfavorable to the Fund.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund's service providers, the Fund's counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund's Institutional Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Average Annual Total Returns —(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of two broad-based market indices over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to broad measures of market performance.

The following table shows the average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to market performance.

After-tax returns are shown only for Institutional Shares, and the after-tax returns for Advisor Shares will vary from Institutional Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

Highest/Lowest Quarter Returns (%)

Portfolio Management

Investment Adviser: Artisan Partners

Portfolio Manager	Title	Length of Service
Beini Zhou, CFA	Co-Portfolio Manager, Artisan Partners	Since May 2022 (inception)
Anand Vasagiri	Co-Portfolio Manager, Artisan Partners	Since May 2022 (inception)

Purchase and Sale of Fund Shares

Minimum Investments	Advisor	Institutional
To open an account	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum
Minimum balance required	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan International Small-Mid Fund

Investor: ARTJX | Advisor: APDJX | Institutional: APHJX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder's financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	1.03%	1.03%	1.03%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses	0.30	0.13	0.05
Total Annual Fund Operating Expenses	1.33	1.16	1.08

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$135	\$421	\$729	\$1,601
Advisor	\$118	\$368	\$638	\$1,409
Institutional	\$110	\$343	\$595	\$1,317

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 34.42% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental stock selection process focused on identifying durable and idiosyncratic opportunities to build a diversified portfolio of primarily non-US small- and mid-cap growth companies. The team generally seeks long-term investments in high-quality businesses exposed to structural growth themes that can be acquired at sensible valuations in contrarian fashion and are led by excellent management teams.

- **Investing with Tailwinds**—The team identifies structural themes at the intersection of growth and change with the objective of investing in companies having meaningful exposure to these trends. Themes represent a secular outlook, are generally industry specific, and are identified from a bottom-up perspective.
- **High-Quality Businesses**—The team seeks companies that it views as future industry leaders with sustainable growth characteristics that can be owned for the long term. Those characteristics include differentiated and defensible business models, strong balance sheets, dynamic management teams, favorable positions within their industry value chains and high or improving returns on capital. As part of the investment process, the team considers material environmental, social and governance factors, which may include corporate governance principles, treatment of employees and exposure to regulatory risk, alongside other fundamental research.

- **A Contrarian Approach to Valuation**—The team seeks to invest in high-quality businesses in contrarian fashion. Mismatches between stock price and long-term business value are created by market dislocations, temporary slowdowns in individual businesses or misperceptions in the investment community.
- **Manage Unique Risks of International Small- and Mid-Cap Equities**—International small- and mid-cap equities are exposed to unique investment risks that require managing. The team defines risk as including permanent loss of capital, not just share price volatility. The team manages this risk by having a long-term ownership focus, understanding the direct and indirect security risks for each business, constructing the portfolio on a well-diversified basis and sizing positions according to individual risk characteristics.

Under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in common stocks and other securities of small- and mid-cap companies. Small- and mid-cap companies for this purpose are those companies with a market capitalization below \$30 billion or having a market capitalization similar to the constituents of the MSCI All Country World (ACWI) ex USA SMID Index at the time of the Fund's investment. Some of these companies, although small by US standards, might rank among the largest in their countries by market capitalization. Under normal market conditions, the Fund will invest at least 65% of its total assets at market value at the time of purchase in securities of non-US companies. The Fund invests in developed markets and emerging and less developed markets.

The Fund may invest to a limited extent in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers).

From time to time, the team may conclude that a security other than an equity presents a more attractive risk/reward profile. Accordingly, the Fund may invest to a limited extent in debt securities (including lower-rated securities), which include securities rated below investment grade (below BBB- by Standard & Poor's Rating Services ("S&P") or Fitch, Inc. ("Fitch") or below Baa3 by Moody's Investors Service, Inc. ("Moody's")), or comparably rated by another nationally recognized statistical rating organization ("NRSRO"), or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds," and convertible debt securities of US or non-US issuers that meet the Fund's investment criteria.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers certain environmental, social and governance ("ESG") factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider ESG factors.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts and participation certificates) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.

- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Debt Securities Risks**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. In general, the value of a debt security will fall in response to increases in interest rates. The Fund may invest in debt securities without considering the maturity of the instrument. The value of a security with a longer duration will be more sensitive to changes in interest rates than a similar security with a shorter duration. As a result, changes in interest rates in the US and outside the US may affect the Fund's debt investments unfavorably.
Debt securities in which the Fund invests may be rated below investment grade or unrated securities that are determined by Artisan Partners to be of comparable quality. Debt securities of below investment grade quality are high yield, high risk bonds, commonly known as "junk bonds." These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk, may be less liquid and may be subject to greater price volatility than higher-rated bonds.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund's service providers, the Fund's counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund's Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Effective 4 December 2018, the Fund's principal investment strategies changed to reflect, among other things, greater flexibility to invest in small- and medium-sized companies. The Fund's performance prior to 4 December 2018 would have been different if the Fund were managed using the current investment strategies.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	26.84	June 30, 2020
Lowest Quarter	-21.42	March 31, 2020

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of four broad-based market indices over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to broad measures of market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

The "Return after taxes on distributions and sale of Fund shares" for the one-year period ended 31 December 2025 is greater than the "Return before taxes" because you are assumed to be able to use any capital loss realized on the sale of Fund shares to offset other taxable gains.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	5-Year	10-Year	Since Inception	Inception Date

Portfolio Management

Investment Adviser: Artisan Partners Limited Partnership ("Artisan Partners")

Portfolio Manager	Title	Length of Service
Rezo Kanovich	Managing Director and Portfolio Manager, Artisan Partners	Since October 2018

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan International Value Fund

Investor: ARTKX | Advisor: APDKX | Institutional: APHKX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.93%	0.93%	0.93%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses	0.25	0.12	0.02
Acquired Fund Fees and Expenses ¹	0.02	0.02	0.02
Total Annual Fund Operating Expenses	1.20	1.07	0.97

¹ “Acquired Fund Fees and Expenses” shown are for the fiscal year ended 30 September 2025 and are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$122	\$381	\$660	\$1,455
Advisor	\$109	\$340	\$590	\$1,306
Institutional	\$99	\$309	\$536	\$1,190

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 24.70% of the average value of its portfolio.

Principal Investment Strategies

The Fund’s investment team employs a fundamental investment process to construct a diversified portfolio of securities of undervalued non-US companies of all sizes. The team seeks to invest in what the team considers to be high quality, undervalued companies with strong balance sheets and shareholder-oriented management teams.

The team’s investment process focuses on four key characteristics:

- **Undervaluation**—Determining the intrinsic value of a business is the heart of the team’s research process. The team believes that intrinsic value represents the amount that a buyer would pay to own a company’s future cash flows. The team seeks to invest at a significant discount to its estimate of the intrinsic value of a business.

- **Business Quality**—The team seeks to invest in companies with histories of generating strong free cash flow, improving returns on capital and strong competitive positions in their industries.
- **Financial Strength**—The team believes that investing in companies with strong balance sheets helps to reduce the potential for capital risk and provides company management the ability to build value when attractive opportunities are available.
- **Shareholder-Oriented Management**—The team's research process attempts to identify management teams with a history of building value for shareholders.

Companies that make it through this analytical process are ranked at the time the position is initiated according to the degree of the discount of the current market price of the stock to the team's estimate of the company's intrinsic value. The team manages the portfolio by generally taking larger positions in companies where the discount is greatest and smaller positions in companies with narrower discounts (subject to adjustments for investment-related concerns, including diversification, risk management and liquidity).

The focus of the investment process is on individual companies, not on selection of countries or regions. Under normal market conditions, the Fund invests no less than 80% of its total assets (excluding cash and cash equivalents), measured at market value at the time of purchase, in common stocks and other securities of non-US companies. The Fund invests primarily in developed markets but also may invest in emerging and less developed markets. The Fund may invest in companies of any size.

The Fund may invest to a limited extent in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers).

The Fund invests primarily in equity securities but, from time to time, the team may conclude that a security other than an equity security presents a more attractive risk/reward profile. Accordingly, the Fund may invest to a limited extent in debt securities of US and non-US issuers, including loans, that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts and participation certificates) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.
- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short-

or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.

- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Value Investing Risks**—Value stocks may fall out of favor with investors and underperform other asset types during given periods. The price of a company's stock may never reach the level that the team considers its intrinsic value.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Debt Securities Risks**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. In general, the value of a debt security will fall in response to increases in interest rates. The Fund may invest in debt securities without considering the maturity of the instrument. The value of a security with a longer duration will be more sensitive to changes in interest rates than a similar security with a shorter duration. As a result, changes in interest rates in the US and outside the US may affect the Fund's debt investments unfavorably.
- **Loan Risks**—Investments in loans, including floating or adjustable rate loans, are generally subject to the same risks as investments in other types of debt obligations, including, among others, the credit risk of nonpayment of principal and interest. In addition, in many cases loans are subject to the risks associated with below investment grade securities. The Fund may invest in loans made in connection with highly leveraged transactions, which are subject to greater credit and liquidity risks than other types of loans. Although the loans in which the Fund invests may be secured by specific collateral, there can be no assurance that liquidation of such collateral would satisfy the borrower's obligation in the event of nonpayment of scheduled interest or principal, or that such collateral could be readily liquidated. In the event of the bankruptcy of a borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a loan or could recover nothing of what it is owed on the loan. Uncollateralized (i.e., non-secured) loans are subject to greater risk of loss (i.e., nonpayment) in the event of default than secured loans since they do not afford the Fund recourse to collateral. Investments in loans may be difficult to value and may be illiquid, including due to legal or contractual restrictions on resale. Transactions in many loans settle on a delayed basis, and the Fund may not receive the proceeds from the sale of a loan for a substantial period after the sale. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or meet redemption obligations until a substantial period after the sale of the loans.
- **Convertible Securities Risks**—Investing in convertible securities subjects the Fund to the risks of debt, but also the risks associated with an investment in the underlying equity security. Convertible securities are frequently issued with a call feature that allows the issuer to choose when to redeem the security, which could result in the Fund being forced to redeem, convert, or sell the convertible security under circumstances unfavorable to the Fund.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.

- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund's service providers, the Fund's counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund's Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	21.77	December 31, 2020
Lowest Quarter	-27.46	March 31, 2020

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of two broad-based market indices over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to broad measures of market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

Portfolio Management

Investment Adviser: Artisan Partners Limited Partnership ("Artisan Partners")

Portfolio Manager	Title	Length of Service
N. David Samra	Managing Director and Portfolio Manager, Artisan Partners	Since September 2002 (inception)
Ian P. McGonigle, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since October 2018

Purchase and Sale of Fund Shares

The Fund is closed to most new investors. See "Investing with Artisan Partners Funds—Who is Eligible to Invest in a Closed Fund?" in the Fund's statutory prospectus for new account eligibility criteria.

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Mid Cap Fund

Investor: ARTMX | Advisor: APDMX | Institutional: APHMX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.94%	0.94%	0.94%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses ¹	0.27	0.13	0.04
Total Annual Fund Operating Expenses	1.21	1.07	0.98

¹ “Other Expenses” include “Acquired Fund Fees and Expenses,” which were less than 0.01% of the average net assets of the Fund. “Acquired Fund Fees and Expenses” are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$123	\$384	\$665	\$1,466
Advisor	\$109	\$340	\$590	\$1,306
Institutional	\$100	\$312	\$542	\$1,201

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 62.54% of the average value of its portfolio.

Principal Investment Strategies

The Fund’s investment team employs a fundamental investment process to construct a diversified portfolio of US mid-cap growth companies. The team seeks to invest in companies that it believes possess franchise characteristics, are benefiting from an accelerating profit cycle and are trading at a discount to its estimate of private market value. The Fund’s investment process focuses on two distinct elements—security selection and capital allocation. The team overlays its investment process with sustainability considerations and broad knowledge of the global economy.

- **Security Selection**—The team seeks to identify companies that have franchise characteristics (e.g., low cost production capability, possession of a proprietary asset, dominant market share or a defensible brand name), are benefiting from an accelerating profit cycle and

are trading at a discount to the team's estimate of private market value. The team looks for companies that are well positioned for long-term growth, which is driven by demand for their products and services at an early enough stage in their profit cycle to benefit from the increased cash flows produced by the emerging profit cycle.

- **Capital Allocation**—Based on the team's fundamental analysis of a company's profit cycle, it divides the portfolio into three parts. **GardenSM** investments are small positions in the early part of their profit cycle that may warrant more sizeable allocations as their profit cycle accelerates. **CropSM** investments are positions that are being increased to a full weight because the team believes they are moving through the strongest part of their profit cycles. **HarvestSM** investments are positions that are being reduced as they near the team's estimates of full valuation or their profit cycles begin to decelerate.
- **Sustainability Considerations**—The team employs a framework in assessing material sustainability exposures factors that informs its security selection and capital allocation process.
- **Broad Knowledge**—The team overlays the security selection and capital allocation elements of its investment process with a desire to invest opportunistically across the entire global economy. The team seeks broad knowledge of the global economy in order to position it to find growth wherever it occurs.

The Fund invests primarily in US companies and, under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in the common stocks of medium-sized companies. The Fund defines a medium-sized company as one with a market capitalization greater than the market capitalization of the smallest company in the Russell Midcap[®] Index and less than three times the weighted average market capitalization of companies in the Russell Midcap[®] Index. Under normal circumstances, the Fund generally maintains a weighted average market capitalization of not more than 1.5 times the weighted average market capitalization of the companies included in the Russell Midcap[®] Index or Russell Midcap[®] Growth Index, whichever is greater.

The Fund may invest up to 15% of its total assets at market value at the time of purchase in common stocks and other securities of non-US companies (including depositary receipts). The Fund's investments in non-US securities may include investments in developed markets, as well as emerging and less developed markets.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers material sustainability exposures in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider similar factors.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates, unfavorable economic practices, political instability and expropriation and nationalization risks.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency

may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.

- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund’s distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund’s shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund’s service providers, the Fund’s counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund’s Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	37.29	June 30, 2020
Lowest Quarter	-22.47	June 30, 2022

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of three broad-based market indices over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund’s performance to broad measures of market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	5-Year	10-Year	Since Inception	Inception Date
Return before taxes	14.75%	2.12%	10.81%	12.62%	June 27, 1997

Portfolio Management

Investment Adviser: Artisan Partners Limited Partnership ("Artisan Partners")

Portfolio Manager	Title	Length of Service
Matthew H. Kamm, CFA ¹	Managing Director and Co-Lead Portfolio Manager, Artisan Partners	Since January 2010
Jason L. White, CFA	Managing Director and Co-Lead Portfolio Manager, Artisan Partners	Since January 2011
James D. Hamel, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since October 2001
Jay C. Warner, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since January 2022
Angela S. Wu	Managing Director and Portfolio Manager, Artisan Partners	Since February 2026

¹ Mr. Kamm will step down as Portfolio Manager of the Fund effective 31 December 2026. Mr. Kamm will remain an active member of the Artisan Partners Growth Team in an advisory capacity as a Managing Director.

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Select Equity Fund

Investor: ARTNX | Advisor: APDNX | Institutional: APHNX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder’s financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses¹ (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.55%	0.55%	0.55%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses	1.71	2.16	0.53
Acquired Fund Fees and Expenses ²	0.01	0.01	0.01
Total Annual Fund Operating Expenses	2.27	2.72	1.09
Fee Waiver and Expense Reimbursement ³	1.51	2.06	0.48
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement	0.76	0.66	0.61

¹ The Fund’s operating expenses have been restated to reflect a reduction in the management fees and expense limit that was effective as of 1 September 2026.

² “Acquired Fund Fees and Expenses” shown are for the fiscal year ended 30 September 2025 and are indirect expenses the Fund incurred from the Fund’s investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses and Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the table above may not match the ratios of expenses to average net assets shown in the “Financial Highlights” in the Fund’s prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

³ Artisan Partners Limited Partnership, the Fund’s investment adviser (“Artisan Partners”), has contractually agreed to bear certain expenses and waive its management fees to the extent necessary to cause total annual fund operating expenses (excluding taxes, interest, all commissions and other normal charges incident to the purchase and sale of portfolio securities, acquired fund fees and expenses, borrowing costs such as dividends on securities sold short, and extraordinary charges such as litigation costs, but including management fees paid to Artisan Partners) not to exceed 0.75% of the average daily net assets of Investor Shares, 0.65% of the average daily net assets of Advisor Shares and 0.60% of the average daily net assets of Institutional Shares. This contract continues through 31 January 2027. Prior to 1 September 2026, the expense limit, as a percentage of average daily net assets, was 1.25%, 1.15% and 1.10% for Investor Shares, Advisor Shares and Institutional Shares, respectively.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund’s operating expenses are equal to Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the first year and Total Annual Fund Operating Expenses thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$78	\$564	\$1,077	\$2,488
Advisor	\$67	\$648	\$1,255	\$2,899
Institutional	\$62	\$299	\$554	\$1,286

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 26.15% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental investment process to construct a focused portfolio of securities of undervalued US companies across a broad capitalization range. The team seeks to invest in what the team considers to be high quality, undervalued companies with strong balance sheets and shareholder-oriented management teams.

The team's investment process focuses on four key characteristics:

- **Undervaluation**—Determining the intrinsic value of a business is the heart of the team's research process. The team believes that intrinsic value represents the amount that a buyer would pay to own a company's future cash flows. The team seeks to invest at a significant discount to its estimate of the intrinsic value of a business.
- **Business Quality**—The team seeks to invest in companies with histories of generating strong free cash flow, improving returns on capital and strong competitive positions in their industries.
- **Financial Strength**—The team believes that investing in companies with strong balance sheets helps to reduce the potential for capital risk and provides company management the ability to build value when attractive opportunities are available.
- **Shareholder-Oriented Management**—The team's research process attempts to identify management teams with a history of building value for shareholders.

Companies that make it through this analytical process are ranked at the time the position is initiated according to the degree of the discount of the current market price of the stock to the team's estimate of the company's intrinsic value. The team manages the portfolio by generally taking larger positions in companies where the discount is greatest and smaller positions in companies with narrower discounts (subject to adjustments for investment-related concerns, including diversification, risk management and liquidity). As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

Under normal market conditions, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in equity securities or instruments that have similar economic characteristics. The Fund will invest primarily in US companies but may invest up to 20% of its total assets at market value at the time of purchase in non-US companies, including those in emerging and less developed markets. The Fund is non-diversified, which means that it may invest a greater portion of its assets in a more limited number of issuers than a diversified fund. The Fund will typically hold 20-30 securities. As a result, a high percentage of the Fund's total assets may be invested in a particular company, sector or industry. The Fund will generally not invest more than 10% of its total assets, at the time of purchase, in the securities of a single issuer. There are no restrictions on the market capitalizations of the companies in which the Fund may invest.

The Fund may invest up to 10% of its assets, measured at the time of purchase, in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers). There are no restrictions on the market capitalizations of the companies in which the Fund may invest.

From time to time, the team may conclude that a security other than an equity security presents a more attractive risk/reward profile. Accordingly, the Fund may invest to a limited extent (in any event, no more than 20% of its net assets plus any borrowings for investment purposes at market value at the time of purchase) in debt securities (including lower-rated securities, which include securities rated below investment grade (below BBB- by Standard & Poor's Rating Services ("S&P") or Fitch, Inc. ("Fitch") or below Baa3 by Moody's Investors Service, Inc. ("Moody's")), or comparably rated by another nationally recognized statistical rating organization ("NRSRO"), or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds"), and convertible debt securities of US or non-US issuers that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers environmental, social and governance factors in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider environmental, social and governance factors.
- **Non-Diversification Risks**—As a non-diversified fund, the Fund may invest a larger portion of its assets in securities of a smaller number of issuers than a diversified fund, which means a single issuer's performance may affect Fund performance more than if the Fund were invested in a larger number of issuers.

- **Value Investing Risks**—Value stocks may fall out of favor with investors and underperform other asset types during given periods. The price of a company's stock may never reach the level team considers its intrinsic value.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth team anticipated.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies, while the Fund values its assets in US dollars. The exchange rates between foreign currencies and the US dollar fluctuate continuously. As a result, the Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may mitigate the risk of loss from changes in currency exchange rates, but also may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Debt Securities Risks**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. In general, the value of a debt security will fall in response to increases in interest rates. The Fund may invest in debt securities without considering the maturity of the instrument. The value of a security with a longer duration will be more sensitive to changes in interest rates than a similar security with a shorter duration. As a result, changes in interest rates in the US and outside the US may affect the Fund's debt investments unfavorably.
Debt securities in which the Fund invests may be rated below investment grade or unrated securities that are determined by Artisan Partners to be of comparable quality. Debt securities of below investment grade quality are high yield, high risk bonds, commonly known as "junk bonds." These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk, may be less liquid and may be subject to greater price volatility than higher-rated bonds.

- **Convertible Securities Risks**—Investing in convertible securities subjects the Fund to the risks of debt, but also the risks associated with an investment in the underlying equity security. Convertible securities are frequently issued with a call feature that allows the issuer to choose when to redeem the security, which could result in the Fund being forced to redeem, convert, or sell the convertible security under circumstances unfavorable to the Fund.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund's service providers, the Fund's counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund's Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	12.84	December 31, 2023
Lowest Quarter	-14.63	June 30, 2022

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	5-Year	Since Inception	Inception Date
Return before taxes	28.62%	12.41%	14.13%	February 28, 2020
Return after taxes on distributions	27.68%	11.72%	13.53%	
Return after taxes on distributions and sale of Fund shares	17.59%	9.74%	11.31%	
S&P 500® Index (reflects no deduction for fees, expenses or taxes)	17.88%	14.42%	17.24%

Portfolio Management

Investment Adviser: Artisan Partners

Portfolio Managers	Title	Length of Service
Daniel J. O'Keefe	Managing Director and Lead Portfolio Manager, Artisan Partners	Since February 2020 (inception)
Michael J. McKinnon, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since February 2020 (inception)

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Small Cap Fund

Investor: ARTSX | Advisor: APDSX | Institutional: APHSX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder's financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.97%	0.97%	0.97%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses	0.28	0.13	0.05
Total Annual Fund Operating Expenses	1.25	1.10	1.02

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$127	\$397	\$686	\$1,511
Advisor	\$112	\$350	\$606	\$1,340
Institutional	\$104	\$325	\$563	\$1,248

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 64.80% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of US small-cap growth companies. The team seeks to invest in companies that it believes possess franchise characteristics, are benefiting from an accelerating profit cycle and are trading at a discount to its estimate of private market value. The Fund's investment process focuses on two distinct elements—security selection and capital allocation. The team overlays its investment process with sustainability considerations and broad knowledge of the global economy.

- **Security Selection**—The team seeks to identify companies that have franchise characteristics (e.g., low cost production capability, possession of a proprietary asset, dominant market share or a defensible brand name), are benefiting from an accelerating profit cycle and are trading at a discount to the team's estimate of private market value. The team looks for companies that are well positioned for long-term growth, which is driven by demand for their products and services at an early enough stage in their profit cycle to benefit from the increased cash flows produced by the emerging profit cycle.
- **Capital Allocation**—Based on the team's fundamental analysis of a company's profit cycle, it divides the portfolio into three parts. **GardenSM** investments are small positions in the early part of their profit cycle that may warrant more sizeable allocations as their profit

cycle accelerates. **CropSM** investments are positions that are being increased to a full weight because the team believes they are moving through the strongest part of their profit cycles. **HarvestSM** investments are positions that are being reduced as they near the team's estimates of full valuation or their profit cycles begin to decelerate.

- **Sustainability Considerations**—The team employs a framework in assessing material sustainability exposures factors that informs its security selection and capital allocation process.
- **Broad Knowledge**—The team overlays the security selection and capital allocation elements of its investment process with a desire to invest opportunistically across the entire global economy. The team seeks broad knowledge of the global economy in order to position it to find growth wherever it occurs.

The Fund invests primarily in US companies and, under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in the common stocks of small companies. The Fund defines small companies as those with market capitalizations less than \$8 billion or the market capitalization of the largest company in the Russell 2000[®] Index on a rolling one-year basis, whichever is greater. The Fund will not initiate a position in a company unless it has a market capitalization that is within the range of the market capitalizations of companies in the Russell 2000[®] Index as of the most recent calendar year-end (between \$5.6 million and \$31.2 billion as of 31 December 2025).

The Fund may invest in the securities of non-US companies, but only if the securities are purchased or sold in the US. The Fund's maximum investment in those securities, including, without limitation, depositary receipts, is 10% of the Fund's total assets at market value at the time of purchase. The Fund may also, from time to time, invest in other private placements and restricted securities.

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers material sustainability exposures in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider similar factors.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Private Placement and Restricted Securities Risks**—In addition to the general risks to which all securities are subject, securities acquired in a private placement generally are subject to strict restrictions on resale, and there may be no liquid secondary market or ready purchaser for such securities, and a liquid secondary market may never develop. Therefore, the Fund may be unable to dispose of such securities when it desires to do so or at a favorable time or price. This potential lack of liquidity may make it more difficult for the Fund to accurately value these securities.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.

- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund's service providers, the Fund's counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund's Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	37.26	June 30, 2020
Lowest Quarter	-21.52	June 30, 2022

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of two broad-based market indices over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to broad measures of market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

The "Return after taxes on distributions and sale of Fund shares" for the five-year period ended 31 December 2025 is greater than the "Return before taxes" because you are assumed to be able to use any capital loss realized on the sale of Fund shares to offset other taxable gains.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For Periods Ended 31 December 2025 (%)

Investor	1-Year	5-Year	10-Year	Since Inception	Inception Date
Return before taxes	8.29%	-2.69%	10.42%	9.07%	March 28, 1995

Portfolio Management

Investment Adviser: Artisan Partners Limited Partnership (“Artisan Partners”)

Portfolio Manager	Title	Length of Service
Jay C. Warner, CFA	Managing Director and Lead Portfolio Manager, Artisan Partners	Since January 2022
James D. Hamel, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since October 2009
Matthew H. Kamm, CFA ¹	Managing Director and Portfolio Manager, Artisan Partners	Since January 2010
Jason L. White, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since January 2011
Angela S. Wu	Managing Director and Portfolio Manager, Artisan Partners	Since February 2026

¹ Mr. Kamm will step down as Portfolio Manager of the Fund effective 31 December 2026. Mr. Kamm will remain an active member of the Artisan Partners Growth Team in an advisory capacity as a Managing Director.

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Artisan Sustainable Emerging Markets Fund

Investor: ARTZX | Advisor: APDEX | Institutional: APHEX

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder's financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.85%	0.85%	0.85%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses	0.61	0.28	0.17
Total Annual Fund Operating Expenses	1.46	1.13	1.02
Fee Waiver and Expense Reimbursement ¹	0.31	0.08	0.02
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement	1.15	1.05	1.00

¹ Artisan Partners Limited Partnership, the Fund's investment adviser ("Artisan Partners"), has contractually agreed to bear certain expenses and waive its management fees to the extent necessary to cause total annual fund operating expenses (excluding taxes, interest, all commissions and other normal charges incident to the purchase and sale of portfolio securities, acquired fund fees and expenses, borrowing costs such as dividends on securities sold short, and extraordinary charges such as litigation costs, but including management fees paid to Artisan Partners) not to exceed 1.15% of the average daily net assets of Investor Shares, 1.05% of the average daily net assets of Advisor Shares and 1.00% of the average daily net assets of Institutional Shares. This contract continues through 31 January 2027.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund's operating expenses are equal to Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement in the first year and Total Annual Fund Operating Expenses thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$117	\$431	\$768	\$1,720
Advisor	\$107	\$351	\$615	\$1,367
Institutional	\$102	\$323	\$561	\$1,246

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 32.63% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental research process to construct a portfolio of emerging market companies. The team seeks to invest in companies that it believes are uniquely positioned to benefit from the growth potential in emerging markets and possess a sustainable global competitive advantage.

- **Sustainable Earnings**—The team believes that over the long-term a stock's price is directly related to the company's ability to deliver sustainable earnings. The team determines a company's sustainable earnings based upon financial and strategic analyses. The team's financial analysis of a company's balance sheet, income statement and statement of cash flows focuses on identifying historical drivers of return on equity. The team's strategic analysis examines a company's competitive advantages and financial strength to assess sustainability.
- **Sustainability Assessment**—The team believes that a company's long-term direction and degree of change across multiple environmental, social and governance ("ESG") metrics are important indicators of a company's sustainable growth potential. The team seeks to assess a company's sustainable growth potential by monitoring for improvement or deterioration in ESG metrics. The team's sustainability assessment has incident-based and empirical components to evaluate a company's historical, current and future potential behavior. The team uses a proprietary scoring system for the incident-based and empirical components of the assessment, which informs the team's view of a company's target price.
- **Risk Analysis**—The team believes a disciplined risk framework allows greater focus on fundamental stock selection. The team incorporates its assessment of company-specific and macroeconomic risks into its valuation analysis to develop a risk-adjusted target price. The team's risk-rating assessment includes a review of country-appropriate macroeconomic risk factors to which a company is exposed.
- **Valuation**—The team believes investment opportunities develop when businesses with sustainable earnings are undervalued relative to peers and historical industry, country and regional valuations. The team values a business and develops a price target for a company based on its assessment of the business's sustainable earnings, sustainability assessment and risk analysis.

In the sustainability assessment, the team considers incident-based data from a third-party provider and the team's internal research to score ESG factors that may materially impact a company's sustainable growth potential, including but not limited to:

Governance

- Board management
- Business ethics and competitive behavior
- Reporting transparency and communication
- Shareholder ownership and rights

Environmental

- Climate change risk, mitigation and adaptation
- Water stress
- Land use impact and bio-diversity loss

Social

- Human rights and responsibility to the community
- Human capital, labor rights and equity
- Data privacy and security

For each company, as part of its sustainability assessment, the team generates an overall sustainability score from 1 (lowest) to 5 (highest) based on separate incident-based scores and empirical scores. The team derives the incident-based scores from data provided by a third-party provider, which considers the frequency and severity of ESG-related incidents to measure positive or negative change over time and rate a company's ESG risk. The team generates the empirical sustainability scores based on the team's research and engagement with companies on ESG factors. The team uses the sustainability assessment scores in evaluating a company's target price, adjusting the price upward for high scores (4 or 5) or downward for low scores (1 or 2). The target price adjustment is not symmetric; premiums applied to companies with high sustainability scores are not as significant as discounts applied to companies with low sustainability scores.

The team's sustainability assessment does not exclude companies from potential investment; rather it is used to measure the influence of a company's ESG-related risks on its potential sustainable earnings and stock price.

Under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in equity securities of issuers domiciled, headquartered, or whose primary business activities or principal trading markets are in emerging and less developed markets. The Fund generally will not invest more than 15% of its total assets in the securities of a single issuer, measured at the time of purchase. The Fund invests in common stocks and other equity securities of companies across a broad market capitalization range. The companies in which the Fund invests generally have market capitalizations of at least \$400 million at the time of initial purchase, although the Fund may invest in a company with a lower market capitalization from time to time.

The Fund may invest to a limited extent in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names by issuers).

Principal Risks

Like all funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts and participation certificates) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks**—Investment risks typically are greater in emerging and less developed markets, including "frontier markets", which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Investing in emerging market countries may involve substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; less developed legal systems and thinner trading markets as compared to those in developed countries; different clearing and settlement procedures and custodial services; and currency blockages or transfer restrictions. Emerging market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war or ethnic, religious or racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. Such risks may be greater in frontier markets.

China-Related Risks: Because the Fund may have a significant exposure to China, it is particularly affected by events or factors relating to China, which may increase risk and volatility.

- **Sustainable Investing Risks**—When the team considers certain ESG metrics as part of its sustainability assessment and when making investment decisions, there is a risk that the Fund may forgo otherwise attractive investment opportunities and, therefore, may underperform funds that do not consider such ESG metrics or perform such sustainability assessments. For example, the team may decide not to purchase, or underweight its investment in, certain securities when they otherwise would have decided to purchase or make a more significant investment in such securities on account of other investment considerations. It is also possible that the team may decide to purchase, or overweight its investment in, certain securities based on its sustainability assessment when it might be otherwise disadvantageous to do so based on other investment considerations. Data or information from third-party research providers utilized by the team in connection with its sustainability assessments may differ from data or information provided by other third-party research providers and may be unreliable and/or inaccurate. In addition, there is a risk that the companies that the team identifies as having sustainable growth potential do not operate or perform as expected. There is no guarantee that such companies will achieve their sustainable growth potential.
- **Geopolitical Risks**—Geopolitical events adversely affect global economies and securities markets, subjecting the Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of the Fund's investments, including beyond the Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of the Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.
- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable

or unfavorable changes in currency exchange rates relative to the US dollar. The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.

- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.
- **Participation Certificate Risks**—Investing in a participation certificate subjects the Fund to the risks associated with an investment in the underlying equity security and also exposes the Fund to counterparty risk, which is the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay the Fund the amount owed under the certificate.
- **Impact of Actions by Other Shareholders**—The Fund, like all funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund's distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund's shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund's service providers, the Fund's counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund's Institutional Shares has varied over time. The performance of Investor Shares and Advisor Shares of the Fund would be lower because of the higher expenses paid by Investor Shares and Advisor Shares of the Fund (after fee waiver and expense reimbursements).

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	21.83	December 31, 2020
Lowest Quarter	-26.57	March 31, 2020

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of a broad-based market index over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund's performance to market performance.

After-tax returns are shown only for Institutional Shares, and the after-tax returns for Investor Shares and Advisor Shares will vary from Institutional Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

For periods prior to 14 February 2014, the performance shown below for the Fund's Investor Shares is the performance of the Fund's former Advisor Shares. Effective 14 February 2014, the Fund's former Advisor Shares were redesignated as Investor Shares (the "Redesignation"). Because the fees and expenses of the Fund's Investor Share class are the same as the fees and expenses of the Fund's former Advisor Share

class, the performance of the Fund's Investor Shares would have been the same as the Fund's former Advisor Shares prior to the Redesignation. The Fund's current Advisor Shares were launched on 27 April 2022 and are unrelated to the aforementioned former Advisor Shares.

For Periods Ended 31 December 2025 (%)

Institutional	1-Year	5-Year	10-Year	Since Inception	Inception Date
Return before taxes	42.84%	5.27%	9.95%	5.89%	June 26, 2006
Return after taxes on distributions	42.16%	4.99%	9.69%	5.60%	
Return after taxes on distributions and sale of Fund shares	25.62%	4.04%	8.15%	4.83%	
MSCI Emerging Markets Index (reflects no deduction for fees, expenses or taxes)	33.57%	4.20%	8.42%	6.13%	
Investor					
Return before taxes	42.70%	5.11%	9.83%	2.83%	June 02, 2008

Advisor					
Return before taxes	42.82%	N/A	N/A	15.72%	April 27, 2022
MSCI Emerging Markets Index (reflects no deduction for fees, expenses or taxes)	33.57%	N/A	N/A	11.23%	

Updated performance information, including current NAV per share, may be obtained by calling 800.344.1770 or visiting www.artisanpartners.com.

Portfolio Management

Investment Adviser: Artisan Partners

Portfolio Manager	Title	Length of Service
Maria Negrete-Gruson, CFA	Managing Director and Portfolio Manager, Artisan Partners	Since June 2006 (inception)

Purchase and Sale of Fund Shares

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum
Minimum balance required	\$1,000	\$250,000	\$1,000,000

The Fund will waive the minimum investment requirements for certain employee benefit plans and certain financial intermediaries that submit orders on behalf of their customers, although the intermediaries may impose their own minimum investment requirements. The Fund may also reduce or waive the minimum investment requirements under certain circumstances. If you held the former Advisor Shares of the Fund at the time of the Redesignation, you will not be subject to the minimum balance requirement noted above for the Fund's Investor Shares.

You may purchase, exchange or redeem shares of the Fund each day the New York Stock Exchange is open for regular session trading at the Fund's net asset value next calculated after receipt and acceptance of your request in good order. To purchase, exchange or redeem shares you should contact your financial intermediary, or, if you hold your shares or plan to purchase shares directly through the Fund, you should contact the Fund by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307. **Some redemptions require Medallion signature guarantees.**

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These

payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Additional Information about the Funds' Investment Strategies

The following supplements the information regarding each Fund's investment objective and principal investment strategies set forth in the "Fund Summaries." The investment objective of each Fund may be changed by the board of directors without the approval of shareholders. Investors in a Fund will receive at least 30 days' prior written notice of implementation of any such change in the Fund's investment objective.

Artisan Developing World Fund

Artisan Developing World Fund seeks long-term capital appreciation.

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of securities that offers exposure to developing world economies. In pursuit of this goal, the team generally invests substantially in equity securities of issuers domiciled in or economically tied to countries the team considers to have characteristics typical of the developing world, including companies based in developed markets. The team believes a portfolio of companies with these characteristics will be well positioned to deliver attractive risk-adjusted returns over the long term.

Under normal circumstances, the Fund invests substantially in equity securities of issuers domiciled in or economically tied to one or more markets in the developing world. The team generally considers developing world to include countries that are included in any one of the Morgan Stanley Capital Index ("MSCI") emerging or frontier markets indices, or that are classified under a similar corresponding classification, by organizations such as the World Bank, United Nations, International Finance Corporation or the International Monetary Fund. For purposes of the Fund's investments, a determination that an issuer is economically tied to one or more countries in the developing world is based on factors including, but not limited to: domicile or principal office location, sources of its revenues or customers, countries in which a product is used, and/or whether the issuer is indirectly exposed to the risks or economic fortunes of a developing market.

The Fund's portfolio typically includes investments that are traded in currencies other than US dollars, so the Fund buys and sells non-US currencies to facilitate transactions in portfolio securities. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. In certain circumstances the Fund may hedge its exposure to securities denominated in foreign currencies as well as other positions that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund may invest in US and non-US companies of all market capitalizations. The Fund may invest without limit in the securities of US and non-US issuers, and is not subject to any asset allocation guidelines requiring diversification based on country or geographical region. The Fund often has meaningful exposure to companies based in the US and other developed countries.

The Fund may invest in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

Under normal market conditions, the Fund tries to maintain a cash position of no more than 15% of its total assets. The Fund may at times hold more than 15% of its total assets in cash.

The Fund may sell a security for reasons including but not limited to: the team believes the investment no longer aligns with the investment process, the thesis for the original purchase is no longer valid, more attractive opportunities are identified, valuation considerations emerge, or to mitigate political or currency risk.

Artisan Emerging Markets Debt Opportunities Fund

Artisan Emerging Markets Debt Opportunities Fund seeks to provide total return through a combination of current income and long-term capital appreciation.

The Fund's investment team employs a fundamental investment process to construct a differentiated portfolio of securities, derivatives and other instruments that offer long and short exposures to emerging markets. The team seeks to identify emerging market countries that are undergoing or poised for strong economic growth or structural changes, such as political, legislative and/or economic reforms. The team seeks to invest in corporate and sovereign debt instruments that offer exposures to those emerging market countries at attractive absolute and relative credit risk premium. As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

Under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in emerging market debt securities or instruments that have similar economic characteristics. These securities and other instruments include instruments issued or guaranteed by companies, financial institutions and government entities and/or their agencies and instrumentalities domiciled in or with exposure to emerging market countries, as well as derivatives or similar instruments used to gain or manage exposure to emerging market debt securities and/or manage related risk factors. The Fund will notify its shareholders at least 60 days prior to any change in this 80% policy. The Fund considers emerging market countries to include any country other than Canada, Luxembourg, the US and the countries comprising the MSCI EAFE Index (currently, Australia, Austria, Belgium, Denmark, Finland, France,

Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom).

The Fund is non-diversified, which means that it may invest a greater portion of its assets in a more limited number of issuers than a diversified fund. The Fund may have significant investment in a particular geographic region or country.

The Fund may invest in debt instruments of all types, including, without limitation, sovereign issues, treasury obligations, bonds, loans, commercial paper, credit linked notes, covered bonds, convertible bonds and other fixed-, variable- and floating-rate securities that are either secured or unsecured, and, either senior or subordinated. The Fund may invest, without limitation, in debt instruments of any credit rating, including instruments that are rated below investment grade (below BBB- by Standard & Poor's Rating Service or Fitch, Inc. or below Baa3 by Moody's Investors Service, Inc.), or comparably rated by another nationally recognized statistical rating organization, or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds." The Fund may invest in debt instruments that are non-performing at the time of purchase. The Fund may invest in debt securities of any maturity. The Fund's investments are not subject to any restrictions with respect to duration.

The Fund expects to achieve certain exposures primarily through derivative transactions. These derivatives include, without limitation, forward foreign currency exchange contracts; futures on securities, indices, currencies, commodities, swaps and other investments; options; and swaps, including interest rate swaps, cross-currency swaps, total return swaps and credit default swaps, which may have the effect of creating investment leverage. The Fund may use derivatives to seek to enhance total return, to hedge against fluctuations in securities prices, interest rates or currency exchange rates, to change the effective duration of its portfolio, to manage certain investment risks, for speculation purposes to gain certain types of exposures and/or as a substitute for the purchase or sale of securities, currencies or commodities. The Fund may also utilize derivatives to take short positions in underlying assets and non-USD currencies to hedge certain risk factors. The Fund intends to use all or a portion of the proceeds from its short positions to take additional long positions or otherwise use in a manner consistent with its investment guidelines. The Fund may engage in repurchase agreements, reverse repurchase agreements and forward commitments.

The Fund may make investments in securities, derivatives and other instruments, directly or through investments in Artisan Emerging Markets Debt Opportunities Subsidiary Ltd., a wholly owned subsidiary of the Fund organized under the laws of the Cayman Islands (the "Subsidiary"). The Subsidiary is advised by Artisan Partners and has the same investment objectives as the Fund. Subject to the Fund's investment policies and limitations, the Subsidiary may invest without limit in, among other investments, securities that are not registered with the US Securities and Exchange Commission ("SEC") pursuant to Regulation S of the Securities Act of 1933, as amended, as well as commodity-linked derivative instruments. The allocation of the Fund's portfolio in the Subsidiary will vary over time, but in order to meet the diversification requirement necessary to the Fund's treatment as a regulated investment company, the Fund will not invest more than 25% of its total assets in the Subsidiary, including at any quarter end. In addition, the Fund will treat the Subsidiary's assets as assets of the Fund for purposes of determining compliance with various provisions of the Investment Company Act of 1940, as amended (the "1940 Act") applicable to the Fund. References herein to the Fund include references to the Subsidiary in respect of the Fund's investment exposure.

The Fund buys and sells non-US currencies to facilitate transactions in portfolio securities of non-US companies. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually does not hedge against possible fluctuations in exchange rates, but, in certain circumstances, the Fund may hedge its exposure to securities denominated in foreign currencies as well as other positions that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund expects to hold US Treasury, government agency securities and agency mortgage-backed securities (and derivatives thereon), and stripped securities to use as collateral for its derivatives positions and to help manage duration.

In addition to instruments issued by emerging market issuers, the Fund may also invest in securities and other instruments of US and other non-emerging market issuers, and securities denominated in currencies other than emerging market currency.

The Fund is permitted to invest in equity securities and ETFs. The Fund may invest in private placements and other restricted securities (i.e., securities that are purchased in private placements and, accordingly, are subject to restrictions on resale as matter of contract or under federal securities laws).

The Fund may borrow up to the amount allowed by applicable law to enhance total return, fund redemptions, post collateral for hedges, or to purchase investments prior to settlement of pending sale transactions.

The Fund may sell an investment when the team thinks changing circumstances have affected the original reasons for the instrument's purchase, the issuer of the instrument exhibits deteriorating credit or other fundamentals, or more attractive investment opportunities are identified.

Artisan Floating Rate Fund

Artisan Floating Rate Fund seeks to provide total return through a combination of current income and long-term capital appreciation.

The Fund seeks to invest in issuers with high quality business models that have compelling risk-adjusted return characteristics. The Fund employs a fundamental investment process to construct a diversified portfolio comprised primarily of floating rate debt instruments that are attractively valued, including, without limitation, floating rate leveraged loans, which could include, among other types of loans, senior secured loans, unsecured loans, second lien loans, bridge loans and junior loans.

The Fund's investment team's research process has four primary pillars:

- **Business Quality**—The team uses a variety of sources to understand the resiliency of an issuer's business model. The team analyzes the general health of the industry in which an issuer operates, the issuer's competitive position, barriers to entry, the dynamics of industry participants, and the decision-making history of the issuer's management and, when applicable, financial equity sponsor. As part of the team's analysis of a company's business quality, among other factors, the team considers certain environmental, social and governance ("ESG") factors relating to the company. These ESG factors may include the impact of environmental regulatory change, the use of human, natural and physical resources and corporate governance structures and practices. When the team deems a factor material to the value of a company, the team incorporates it into its decision-making process.
- **Financial Strength and Flexibility**—The team believes that analyzing the history and trend of free cash flow generation is critical to understanding an issuer's financial health. The team's financial analysis also considers an issuer's capital structure, refinancing options, asset or collateral coverage, financial covenants, amortization schedules and overall financial transparency.
- **Downside Analysis**—The team believes that credit instruments by their nature have an asymmetric risk profile. The risk of loss is often greater than the potential for gain, particularly when looking at below investment grade issuers. The team seeks to manage this risk with what it believes to be conservative financial projections that account for industry position, competitive dynamics and positioning within the capital structure.
- **Value Identification**—The team uses multiple metrics to determine the value of an investment opportunity. The team looks for credit improvement potential, relative value within an issuer's capital structure and against industry peers, catalysts for business improvement and potential value stemming from market or industry dislocations and/or mergers and acquisitions ("M&A").

Under normal circumstances, the Fund will invest no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in floating rate debt instruments and other investments that are the economic equivalent of floating rate debt instruments or enable the Fund to achieve a floating rate of income. Floating rate debt instruments for this purpose are those debt obligations of companies or other entities that have (a) interest at rates that adjust periodically, often, though not necessarily, based on a benchmark rate plus a premium or spread over the benchmark rate, or (b) maturities of six months or less even if the interest rates do not adjust periodically. The benchmark rate usually is the Prime Rate, SOFR, the Federal Reserve federal funds rate, or other base lending rates used by commercial lenders. In addition, fixed-rate investments with respect to which the Fund has entered into derivative instruments, such as, for example, interest rate swaps, to effectively convert the fixed-rate interest payments into floating or adjustable rate interest payments; ETFs or notes that provide exposure to floating or adjustable rate loans or obligations; and cash and cash equivalents (for example, money market funds), are examples of other investments considered by the Fund to be eligible for the purpose of satisfying the 80% policy. The Fund will notify its shareholders at least 60 days prior to any change in this 80% policy.

The Fund may invest directly in secured or unsecured loans or invest in loan assignments or participations with respect to borrowers operating in any industry. Secured loans are secured by collateral, while unsecured loans are not secured by any collateral. The Fund may invest in senior loans, which hold senior positions in the borrower's capital structure. The Fund also may invest in subordinated loans (e.g., second-lien loans and mezzanine loans), whole loans, commercial real estate and other commercial loans and structured loans. In the case of subordinated loans, there may be significant indebtedness ranking ahead of the borrower's obligation to the holder of such a loan, including in the event of the borrower's insolvency.

Under normal circumstances, the Fund will invest primarily in instruments that are rated, at the time of purchase, below investment grade (below BBB- by S&P or Fitch or below Baa3 by Moody's), or comparably rated by another NRSRO, or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds." The Fund may invest a significant portion of its assets in high-yield securities that are rated in the lower rating categories by one or more NRSRO (for example, CCC+ or lower by S&P or Fitch or Caa1 or lower by Moody's) or, if unrated, are determined by Artisan Partners to be of comparable quality. Although the Fund expects to primarily invest in instruments that are rated below investment grade (or unrated but determined by Artisan Partners to be of comparable quality) at the time of purchase, the Fund may invest without limit in instruments of any credit quality, including investment grade instruments and securities of stressed or distressed issuers. Investment grade instruments are subject to lower credit risk but typically have relatively low rates. Instruments issued by stressed and distressed issuers are subject to very high credit risk but typically have relatively high rates. The Fund may invest in debt securities of any maturity.

The Fund may invest without limit in securities and other instruments of US and non-US issuers, including issuers economically tied to "emerging market" countries, securities traded principally outside of the United States, and securities denominated in currencies other than the US dollar. The Fund usually seeks (but is not required) to hedge against the risk of loss resulting from currency fluctuation.

In addition to floating rate debt instruments, the Fund also may invest in other corporate fixed income instruments of varying maturities, including fixed-rate instruments, debentures, notes, commercial paper and other types of corporate debt instruments across the credit quality spectrum, such as stressed and distressed debt securities. The Fund may invest in private placements and other restricted securities (i.e., securities that are purchased in private placements and, accordingly, are subject to restrictions on resale as a matter of contract or under federal securities laws). The Fund also may invest in ETFs.

Generally, the Fund uses the terms debt security, debt obligation, bond, loan, fixed income security and fixed income instrument interchangeably and regards them to mean a security or instrument having one or more of the following characteristics: a fixed income security, a security or instrument issued at a discount to its face value, a security or instrument that pays interest in cash or in-kind at a fixed, floating or variable rate or a security or instrument with a stated principal amount that requires repayment of some or all of that principal amount to the holder of the security. The terms debt security, debt obligation, bond, loan, fixed income security and fixed income instrument are interpreted broadly by Artisan Partners as an instrument or security evidencing what is commonly referred to as an IOU rather than evidencing the corporate ownership of equity unless that equity represents an indirect or derivative interest in one or more debt securities. For this purpose, the terms also include instruments that are intended to provide one or more of the characteristics of a direct investment in one or more debt securities. As new fixed income instruments are developed, the Fund may invest in those opportunities as well.

The Fund also may invest in debt obligations issued by governments (including, without limitation, obligations issued or guaranteed by the US government) and/or their agencies and instrumentalities. From time to time, the Fund may invest in or hold common stock, preferred stock, convertible securities, and other equity securities or warrants. The Fund may purchase securities on a when-issued or delayed delivery basis.

The Fund may use derivatives for investment, duration management or hedging purposes, or with the purpose or effect of creating investment leverage. The Fund may also use derivatives to manage liquidity risk. To the extent the Fund invests in derivative instruments, the Fund may count the value of derivative securities with floating rate loan characteristics towards its 80% policy. The Fund's investments in derivative instruments may include investments in, among other instruments, futures contracts, swap contracts and certain currency instruments such as currency forward contracts and currency swap contracts.

The Fund may borrow up to the amount allowed by applicable law to fund redemptions, post collateral for hedges, or to purchase investments prior to settlement of pending sale transactions.

The Fund may sell an investment when the team thinks changing circumstances have affected the original reasons for the instrument's purchase, the issuer of the instrument exhibits deteriorating credit or other fundamentals, or more attractive investment opportunities are identified.

Artisan Focus Fund

Artisan Focus Fund seeks long-term capital appreciation.

The Fund's investment approach is based on idea generation, a systematic framework for analyzing companies and proactive risk management. Utilizing this approach, the team seeks to construct a focused portfolio designed to maximize alpha while limiting downside risk over the long term.

- **Idea Generation**—The team believes a key element in alpha generation is finding areas where the team's views on industry fundamentals differ from consensus estimates. In this pursuit, the team seeks to identify inflections in multi-year trends which may be caused by changes in supply/demand dynamics, societal behavior, market conditions, technology, laws/regulations and business models, among other variables. The team believes these inflections are often misunderstood by market participants, and can lead to meaningful re-evaluations of industries and companies. Identifying themes helps the team develop a focused universe of companies to analyze more thoroughly. The team will also consider compelling idiosyncratic positions that are a good fit based on the team's rigorous fundamental analysis.
- **Systematic Analytical Framework**—The team applies a systematic framework for analyzing companies across sectors and themes, creating a repeatable and methodical decision-making process. The team's proprietary company models focus on multi-year earnings power differentiation, expected outcome scenario analysis, return on invested capital and discounted cash flow valuations. Visual outputs are then produced through the firm's internally developed technology solutions, allowing the team to consistently evaluate positions across the portfolio.
- **Proactive Risk Management**—The team incorporates risk management into all stages of its investment process. Metrics evaluated include crowding, correlation, volatility, stress tests, liquidity, factor analysis and macro drivers, all of which inform portfolio construction and position sizing. The team also uses various instruments, such as options, in an effort to magnify alpha and minimize downside.

The Fund may invest in common stocks and other securities of companies across a broad capitalization range. There are no restrictions on the market capitalizations of the companies in which the Fund may invest. The Fund is non-diversified under the 1940 Act, which means that it may invest a greater portion of its assets in a more limited number of issuers than a diversified fund. As a result, a high percentage of the Fund's total assets may be invested in a particular company, sector or industry. As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

The Fund generally will not invest more than 15% of its total assets in the securities of a single issuer, measured at the time of purchase. The Fund may invest up to 50% of its total assets at market value at the time of purchase in securities of non-US companies (including depositary receipts). The Fund's investments in non-US securities may include investments in developed markets, as well as emerging and less developed markets. The Fund may invest in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in the Fund's prospectus, but may be called different names). The Fund also invests in ETFs.

The Fund buys and sells non-US currencies to facilitate transactions in portfolio securities of non-US companies. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually seeks (but is not required) to hedge against the risk of loss resulting from currency fluctuation. The Fund's direct or indirect exposure to a particular currency may be hedged if the Fund has, or is initiating, positions (including through, among other positions, derivatives, participation certificates or depositary receipts) in securities traded in that currency to mitigate currency volatility or because the Fund believes a currency is overvalued. The Fund may also hedge its exposure to securities that expose the Fund to currency movements, including dollar-denominated securities or other instruments that expose the Fund to foreign currency movements. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund also uses derivatives, such as options. The Fund may use derivatives for any purpose consistent with its investment objective, including, without limitation, to improve expected risk-adjusted returns and to obtain economic exposure to certain issuers. The Fund may implement short positions, including through the use of derivative instruments, or through short sales of instruments that are eligible investments for the Fund and generally intends to use short positions to reduce exposure to certain risks and for hedging purposes. The Fund intends to use all or a portion of the proceeds from its short positions to take additional long positions or otherwise use in a manner consistent with its investment guidelines. The Fund also may borrow money for investment purposes, including to purchase additional securities.

The Fund may invest in REITs. The Fund may also invest up to an aggregate of 10% of its total assets at market value at time of purchase in debt securities including securities rated below investment grade (below BBB- by S&P or Fitch or below Baa3 by Moody's, or comparably rated by another NRSRO, or unrated but determined by Artisan Partners to be of comparable quality), commonly known as "junk bonds" and convertible debt securities of US or non-US issuers that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity or duration.

As a result of the Fund's use of derivatives, the Fund may hold significant amounts of short-term investments, including cash and cash equivalents. The Fund may also maintain a significant portion of its total assets in cash from time to time in response to adverse market, economic, political or other conditions. In addition, cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. If the Fund holds a significant portion of its assets in cash, its ability to meet its investment objective and/or the Fund's performance may be adversely affected.

The Fund actively manages the sizing of its positions. In addition, the Fund may sell a security when the earnings power or valuation differentiation is no longer intact, the thematic or company specific investment thesis is no longer valid or the team identifies more attractive opportunities.

Artisan Global Discovery Fund

Artisan Global Discovery Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of US and non-US growth companies across a broad capitalization range. The team seeks to invest in companies that it believes possess franchise characteristics, are benefiting from an accelerating profit cycle and are trading at a discount to its estimate of private market value. The Fund's investment process focuses on two distinct elements—security selection and capital allocation. The team overlays its investment process with sustainability considerations and broad knowledge of the global economy.

- **Security Selection**—The team seeks to identify companies that have franchise characteristics (e.g., low cost production capability, possession of a proprietary asset, dominant market share or a defensible brand name), are benefiting from an accelerating profit cycle and are trading at a discount to the team's estimate of private market value. The team looks for companies that are well positioned for long-term growth, which is driven by demand for their products and services at an early enough stage in their profit cycle to benefit from the increased cash flows produced by the emerging profit cycle.
- **Capital Allocation**—Based on the team's fundamental analysis of a company's profit cycle, it divides the portfolio into three parts. **GardenSM** investments are small positions in the early part of their profit cycle that may warrant more sizeable allocations as their profit cycle accelerates. **CropSM** investments are positions that are being increased to a full weight because the team believes they are moving through the strongest part of their profit cycles. **HarvestSM** investments are positions that are being reduced as they near the team's estimates of full valuation or their profit cycles begin to decelerate.
- **Sustainability Considerations**—The team employs a framework in assessing material sustainability exposures factors that informs its security selection and capital allocation process.

- **Broad Knowledge**—The team overlays the security selection and capital allocation elements of its investment process with a desire to invest opportunistically across the entire global economy. The team seeks broad knowledge of the global economy in order to position it to find growth wherever it occurs.

The Fund primarily invests in common stocks and other equity securities of US and non-US companies, including depositary receipts. The Fund's investments in non-US securities may include investments in developed markets, as well as emerging and less developed markets. The Fund does not invest more than 35% of its total assets at market value at the time of purchase in companies from any single country other than the US. The Fund generally focuses on mid-cap companies; however, there are no restrictions on the market capitalizations of the companies in which the Fund may invest.

The Fund may invest up to 10% of its total assets measured at the time of purchase in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

As to 75% of its total assets, the Fund limits the size of its investments so that it invests no more than 5% of its total assets in securities of a single issuer, measured at the time of purchase. As to the other 25% of its total assets, the Fund will not invest more than 10% of its total assets, at the time of purchase, in the securities of a single issuer. The Fund tries to maintain a cash position of no more than 15% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. As a result, the Fund may at times hold more than 15% of its total assets in cash.

The Fund may buy or sell non-US currencies to facilitate transactions in portfolio securities of non-US companies. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund's direct or indirect exposure to a particular currency may be hedged if the Fund has, or is initiating, positions (including through, among other positions, participation certificates or depositary receipts) in securities traded in that currency. The Fund may also hedge its exposure to securities that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund may sell a security when the team thinks the security is approaching full valuation, changing circumstances affect the original reasons for its purchase, the company exhibits deteriorating fundamentals, or more attractive opportunities are identified.

Artisan Global Equity Fund

Artisan Global Equity Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental stock selection process focused on identifying long-term growth opportunities to build a global (i.e., US and non-US) diversified portfolio of companies of all market capitalizations. The team seeks to invest in companies within its preferred themes with sustainable growth characteristics at attractive valuations that do not fully reflect their long-term potential.

- **Themes**—The team identifies long-term secular growth trends with the objective of investing in companies that have meaningful exposure to these trends. The team's fundamental analysis focuses on those industry leaders with attractive growth and valuation characteristics that will be long-term beneficiaries of any structural change and/or trend.
- **Sustainable Growth**—The team applies a fundamental approach to identifying the long-term, sustainable growth characteristics of potential investments. The team seeks high-quality companies that typically have a sustainable competitive advantage, a superior business model and a high-quality management team. As part of the investment process, the team considers material environmental, social and governance factors alongside other fundamental research.
- **Valuation**—The team uses multiple valuation metrics to establish a target price range. The team assesses the relationship between its estimate of a company's sustainable growth prospects and its current valuation.

Under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in equity securities or instruments that have similar economic characteristics. The Fund will notify its shareholders at least 60 days prior to any change in this 80% policy. The Fund may invest in securities both within and outside the US, including emerging and less developed markets. Securities in which the Fund may invest may include common stocks, preferred stocks, convertible securities, depositary receipts and rights and warrants to buy common stocks.

The Fund may invest up to 40% of its total assets at market value at the time of purchase in emerging and less developed markets. The Fund does not invest more than 35% of its total assets at market value at the time of purchase in companies from any single country other than the US. The Fund may invest in US and non-US companies of all market capitalizations.

The Fund may invest up to 10% of its total assets measured at the time of purchase in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a

participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

The Fund tries to maintain a cash position of no more than 10% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. As a result, the Fund may at times hold more than 10% of its total assets in cash.

The Fund invests a significant portion of its assets in securities that are traded in currencies other than US dollars, so the Fund buys and sells non-US currencies to facilitate transactions in portfolio securities. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually does not hedge against possible variations in exchange rates, but, in certain circumstances, the Fund's exposure to a particular currency that the team believes is overvalued may be hedged if the Fund has, or is initiating, positions in securities traded in that currency. The Fund may also hedge its exposure to securities that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund may sell a security when the team thinks the security is approaching full valuation, changing circumstances affect the original reasons for its purchase, a company exhibits deteriorating fundamentals, or more attractive opportunities are identified.

Artisan Global Opportunities Fund

Artisan Global Opportunities Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of US and non-US growth companies across a broad capitalization range. The team seeks to invest in companies that it believes possess franchise characteristics, are benefiting from an accelerating profit cycle and are trading at a discount to its estimate of private market value. The Fund's investment process focuses on two distinct elements—security selection and capital allocation. The team overlays its investment process with sustainability considerations and broad knowledge of the global economy.

- **Security Selection**—The team seeks to identify companies that have franchise characteristics (e.g., low cost production capability, possession of a proprietary asset, dominant market share or a defensible brand name), are benefiting from an accelerating profit cycle and are trading at a discount to the team's estimate of private market value. The team looks for companies that are well positioned for long-term growth, which is driven by demand for their products and services at an early enough stage in their profit cycle to benefit from the increased cash flows produced by the emerging profit cycle.
- **Capital Allocation**—Based on the team's fundamental analysis of a company's profit cycle, it divides the portfolio into three parts. **GardenSM** investments are small positions in the early part of their profit cycle that may warrant more sizeable allocations as their profit cycle accelerates. **CropSM** investments are positions that are being increased to a full weight because the team believes they are moving through the strongest part of their profit cycles. **HarvestSM** investments are positions that are being reduced as they near the team's estimates of full valuation or their profit cycles begin to decelerate.
- **Sustainability Considerations**—The team employs a framework in assessing material sustainability exposures factors that informs its security selection and capital allocation process.
- **Broad Knowledge**—The team overlays the security selection and capital allocation elements of its investment process with a desire to invest opportunistically across the entire global economy. The team seeks broad knowledge of the global economy in order to position it to find growth wherever it occurs.

The Fund primarily invests in common stocks and other equity securities of US and non-US companies, including depositary receipts. The Fund's investments in non-US securities may include investments in developed markets, as well as emerging and less developed markets. The Fund does not invest more than 35% of its total assets at market value at the time of purchase in companies from any single country other than the US. The Fund generally focuses on mid- and large-cap companies; however, there are no restrictions on the market capitalizations of the companies in which the Fund may invest.

The Fund may invest up to 10% of its total assets measured at the time of purchase in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

As to 75% of its total assets, the Fund limits the size of its investments so that it invests no more than 5% of its total assets in securities of a single issuer, measured at the time of purchase. As to the other 25% of its total assets, the Fund will not invest more than 10% of its total assets, at the time of purchase, in the securities of a single issuer. The Fund tries to maintain a cash position of no more than 15% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. As a result, the Fund may at times hold more than 15% of its total assets in cash.

The Fund may buy or sell non-US currencies to facilitate transactions in portfolio securities of non-US companies. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund's direct or indirect exposure to a particular currency may be hedged if the Fund has, or is initiating, positions (including through, among other positions, participation certificates or depositary receipts) in securities traded in that currency. The Fund may also hedge its exposure to securities that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund may sell a security when the team thinks the security is approaching full valuation, changing circumstances affect the original reasons for its purchase, the company exhibits deteriorating fundamentals, or more attractive opportunities are identified.

Artisan Global Unconstrained Fund

Artisan Global Unconstrained Fund seeks to provide total return through a combination of current income and long-term capital appreciation.

The Fund's investment team employs a fundamental investment process to construct a differentiated portfolio of securities, derivatives and other instruments that offer long and short exposures around the world. The team seeks to identify countries that are undergoing or poised for strong economic growth or structural changes, such as political, legislative and/or economic reforms. The team seeks to invest in corporate and sovereign debt instruments that offer exposures to those countries at attractive absolute and relative credit risk premium. As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

The Fund primarily invests in debt securities and instruments with similar economic characteristics. The Fund may have significant investment in a particular geographic region or country and typically a portion will be invested in emerging market countries. The Fund may invest without limit in securities and other instruments of US and non-US issuers, including issuers economically tied to emerging market countries, securities traded principally outside the United States, and securities denominated in currencies other than the US dollar.

The Fund is non-diversified, which means that it may invest a greater portion of its assets in a more limited number of issuers than a diversified fund.

The Fund may invest in debt instruments of all types, including, without limitation, sovereign issues, treasury obligations, bonds, loans, commercial paper, credit linked notes, covered bonds, convertible bonds and other fixed-, variable- and floating-rate securities that are either secured or unsecured, and, either senior or subordinated. The Fund may invest, without limitation, in debt instruments of any credit rating, including instruments that are rated below investment grade (below BBB- by Standard & Poor's Rating Service or Fitch, Inc. or below Baa3 by Moody's Investors Service, Inc.), or comparably rated by another nationally recognized statistical rating organization, or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds." The Fund may invest in debt instruments that are non-performing at the time of purchase. The Fund may invest in debt securities of any maturity. The Fund's investments are not subject to any restrictions with respect to duration.

The Fund expects to achieve certain exposures primarily through derivative transactions. These derivatives include, without limitation, forward foreign currency exchange contracts; futures on securities, indices, currencies, commodities, swaps and other investments; options; and swaps, including interest rate swaps, cross-currency swaps, total return swaps and credit default swaps, which may have the effect of creating investment leverage. The Fund may use derivatives to seek to enhance total return, to hedge against fluctuations in securities prices, interest rates or currency exchange rates, to change the effective duration of its portfolio, to manage certain investment risks, for speculation purposes to gain certain types of exposures and/or as a substitute for the purchase or sale of securities, currencies or commodities. The Fund may also utilize derivatives to take short positions in underlying assets and non-USD currencies to hedge certain risk factors. The Fund intends to use all or a portion of the proceeds from its short positions to take additional long positions or otherwise use in a manner consistent with its investment guidelines. The Fund's use of derivatives is frequently extensive.

The Fund may make investments in securities, derivatives and other instruments, directly or through investments in Artisan Global Unconstrained Subsidiary Ltd., a wholly owned subsidiary of the Fund organized under the laws of the Cayman Islands (the "Subsidiary"). The Subsidiary is advised by Artisan Partners and has the same investment objectives as the Fund. Subject to the Fund's investment policies and limitations, the Subsidiary may invest without limit in, among other investments, securities that are not registered with the SEC pursuant to Regulation S of the Securities Act of 1933, as amended, as well as commodity-linked derivative instruments. The allocation of the Fund's portfolio in the Subsidiary will vary over time, but in order to meet the diversification requirement necessary to the Fund's treatment as a regulated investment company, the Fund will not invest more than 25% of its total assets in the Subsidiary, including at any quarter end. In addition, the Fund will treat the Subsidiary's assets as assets of the Fund for purposes of determining compliance with various provisions of the 1940 Act applicable to the Fund. References herein to the Fund include references to the Subsidiary in respect of the Fund's investment exposure.

The Fund buys and sells non-US currencies to facilitate transactions in portfolio securities of non-US companies. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually does not hedge against possible fluctuations in exchange rates, but, in certain circumstances, the Fund may hedge its exposure to securities denominated in foreign currencies as well as other positions that expose the Fund to currency

movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund expects to hold US Treasury, government agency securities and agency mortgage-backed securities (and derivatives thereon), and stripped securities to use as collateral for its derivatives positions and to help manage duration. The Fund may engage in repurchase agreements, reverse repurchase agreements and forward commitments, and may engage a substantial portion of its assets in short sales.

The Fund may also invest in equity securities and ETFs. The Fund may invest in private placements and other restricted securities (i.e., securities that are purchased in private placements and, accordingly, are subject to restrictions on resale as matter of contract or under federal securities laws).

The Fund may borrow up to the amount allowed by applicable law to enhance total return, fund redemptions, post collateral for hedges, or to purchase investments prior to settlement of pending sale transactions.

The Fund may sell an investment when the team thinks changing circumstances have affected the original reasons for the instrument's purchase, the issuer of the instrument exhibits deteriorating credit or other fundamentals, or more attractive investment opportunities are identified.

Artisan Global Value Fund

Artisan Global Value Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of securities of undervalued US and non-US companies. The team seeks to invest in what the team considers to be high quality, undervalued companies with strong balance sheets and shareholder-oriented management teams.

The team's investment process focuses on four key characteristics:

- **Undervaluation**—Determining the intrinsic value of a business is the heart of the team's research process. The team believes that intrinsic value represents the amount that a buyer would pay to own a company's future cash flows. The team seeks to invest at a significant discount to its estimate of the intrinsic value of a business.
- **Business Quality**—The team seeks to invest in companies with histories of generating strong free cash flow, improving returns on capital and strong competitive positions in their industries.
- **Financial Strength**—The team believes that investing in companies with strong balance sheets helps to reduce the potential for capital risk and provides company management the ability to build value when attractive opportunities are available.
- **Shareholder-Oriented Management**—The team's research process attempts to identify management teams with a history of building value for shareholders.

Companies that make it through this analytical process are ranked at the time the position is initiated according to the degree of the discount of the current market price of the stock to the team's estimate of the company's intrinsic value. The team manages the portfolio by generally taking larger positions in companies where the discount is greatest and smaller positions in companies with narrower discounts (subject to adjustments for investment-related concerns, including diversification, risk management and liquidity). As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

The focus of the investment process is on individual companies, not on selection of countries or regions. Under normal market conditions, the Fund primarily invests in common stocks and other equity securities, both within and outside the US. The Fund may invest up to 30% of its total assets at market value at the time of purchase in emerging and less developed markets. The Fund does not invest more than 35% of its total assets at market value at the time of purchase in companies from any single country other than the US. The Fund generally invests in US and non-US companies with market capitalizations of at least \$2 billion at the time of initial purchase. The Fund may continue to invest in a company should its market capitalization fall below \$2 billion.

The Fund tries to maintain a cash position of no more than 15% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. Investment of available cash may be slowed during periods when stock prices are moving broadly upwards because higher prevailing valuations cause fewer securities to meet the Fund's investment criteria. As a result, the Fund may at times hold more than 15% of its total assets in cash.

The Fund may invest up to 10% of its total assets measured at the time of purchase in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

From time to time, the team may conclude that a security other than an equity security presents a more attractive risk/reward profile. Accordingly, the Fund may invest up to an aggregate of 10% of its total assets at market value at the time of purchase in debt securities (including lower-rated securities, which include securities rated below investment grade (below BBB- by S&P or Fitch or below Baa3 by

Moody's), or comparably rated by another NRSRO, or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds,") and convertible debt securities of US or non-US issuers that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity.

The Fund invests a significant portion of its assets in securities that are traded in currencies other than US dollars, so the Fund buys and sells non-US currencies to facilitate transactions in portfolio securities. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually does not hedge against possible variations in exchange rates, but, in certain circumstances, the Fund's exposure to a particular currency that the team believes is overvalued may be hedged if the Fund has, or is initiating, positions in securities traded in that currency. The Fund may also hedge its exposure to securities that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund generally will sell when the security price approaches or exceeds the team's estimate of intrinsic value. The Fund also may sell if changing circumstances make the team change its assessment of the company's intrinsic value or more attractive alternatives are identified.

Artisan High Income Fund

Artisan High Income Fund seeks to provide total return through a combination of current income and capital appreciation.

The Fund seeks to invest in issuers with high quality business models that have compelling risk-adjusted return characteristics. The Fund employs a fundamental investment process to construct a diversified portfolio of attractively valued high yield corporate bonds (often referred to as "junk bonds") and secured and unsecured loans, including, without limitation, bridge financing, senior and subordinated loans, delayed funding loans and revolving credit facilities, and loan participations and assignments.

The Fund's investment team's research process has four primary pillars:

- **Business Quality**—The team uses a variety of sources to understand the resiliency of an issuer's business model. The team analyzes the general health of the industry in which an issuer operates, the issuer's competitive position, barriers to entry, the dynamics of industry participants, and the decision-making history of the issuer's management and, when applicable, financial equity sponsor. As part of the team's analysis of a company's business quality, among other factors, the team considers certain environmental, social and governance ("ESG") factors relating to the company. These ESG factors may include the impact of environmental regulatory change, the use of human, natural and physical resources and corporate governance structures and practices. When the team deems a factor material to the value of a company, the team incorporates it into its decision-making process.
- **Financial Strength and Flexibility**—The team believes that analyzing the history and trend of free cash flow generation is critical to understanding an issuer's financial health. The team's financial analysis also considers an issuer's capital structure, refinancing options, asset or collateral coverage, financial covenants, amortization schedules and overall financial transparency.
- **Downside Analysis**—The team believes that credit instruments by their nature have an asymmetric risk profile. The risk of loss is often greater than the potential for gain, particularly when looking at below investment grade issuers. The team seeks to manage this risk with what it believes to be conservative financial projections that account for industry position, competitive dynamics and positioning within the capital structure.
- **Value Identification**—The team uses multiple metrics to determine the value of an investment opportunity. The team looks for credit improvement potential, relative value within an issuer's capital structure and against industry peers, catalysts for business improvement and potential value stemming from market or industry dislocations and/or mergers and acquisitions ("M&A").

Under normal circumstances, the Fund will invest primarily in instruments that are rated, at the time of purchase, below investment grade (below BBB- by S&P or Fitch or below Baa3 by Moody's), or comparably rated by another NRSRO, or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds." The Fund may invest a significant portion of its assets in high-yield securities that are rated in the lower rating categories by one or more NRSRO (for example, CCC+ or lower by S&P or Fitch or Caa1 or lower by Moody's) or, if unrated, are determined by Artisan Partners to be of comparable quality. The Fund may invest in debt securities of any maturity.

The Fund may invest without limit in securities and other instruments of US and non-US issuers, including issuers economically tied to "emerging market" countries, securities traded principally outside of the United States, and securities denominated in currencies other than the US dollar. The Fund usually seeks (but is not required) to hedge against the risk of loss resulting from currency fluctuation. The Fund may invest in private placements and other restricted securities (i.e., securities that are purchased in private placements and, accordingly, are subject to restrictions on resale as a matter of contract or under federal securities laws).

Generally, the Fund uses the terms debt security, debt obligation, bond, loan, fixed income security and fixed income instrument interchangeably and regards them to mean a security or instrument having one or more of the following characteristics: a fixed income security, a security or instrument issued at a discount to its face value, a security or instrument that pays interest in cash or in kind at a fixed, floating or variable rate or a security or instrument with a stated principal amount that requires repayment of some or all of that principal amount to the holder of the security. The terms debt security, debt obligation, bond, loan, fixed income security and fixed income instrument are interpreted broadly by Artisan Partners as an instrument or security evidencing what is commonly referred to as an IOU rather than

evidencing the corporate ownership of equity unless that equity represents an indirect or derivative interest in one or more debt securities. For this purpose, the terms also include instruments that are intended to provide one or more of the characteristics of a direct investment in one or more debt securities. As new fixed income instruments are developed, the Fund may invest in those opportunities as well.

In addition to high yield corporate bonds and loans, the Fund also may invest in other corporate fixed income instruments of varying maturities, including fixed-, variable- and floating-rate bonds, debentures, notes, commercial paper and other types of corporate debt instruments across the credit quality spectrum, such as stressed and distressed debt securities.

The Fund may invest without limit in corporate fixed income instruments as described above and may focus its investments in one or more types of corporate fixed income instruments depending on market conditions. For example, if the team believes that market conditions are favorable for a particular type of fixed income instrument, such as high yield corporate bonds, substantially all of the Fund's assets may be invested in high yield corporate bonds. Similarly, if the team believes that market conditions are more favorable for loans, substantially all of the Fund's assets may be invested in loans.

Although the Fund expects to primarily invest in corporate fixed income instruments that are rated below investment grade (or unrated but determined by Artisan Partners to be of comparable quality) at the time of purchase, the Fund may invest in instruments of any credit quality, including securities of stressed or distressed issuers. Such instruments may be rated in the lower rating categories (CCC+ or lower by S&P or Fitch or Caa1 or lower by Moody's), or comparably rated by another NRSRO, or unrated but determined by Artisan Partners to be of comparable quality. Such instruments are subject to very high credit risk.

The Fund may invest directly in secured or unsecured loans or invest in loan assignments or participations with respect to borrowers operating in any industry and/or geographical region. Most loans pay interest at rates that typically adjust periodically, often based on a benchmark rate plus a premium or spread over the benchmark rate. The benchmark rate usually is the Prime Rate, SOFR, the Federal Reserve federal funds rate, or other base lending rates used by commercial lenders (each as defined in the applicable loan agreement). Secured loans are secured by collateral, while unsecured loans are not secured by any collateral. The Fund may invest in senior loans, which hold senior positions in the borrower's capital structure. The Fund also may invest in subordinated loans (e.g., second-lien loans and mezzanine loans), whole loans, commercial real estate and other commercial loans and structured loans. In the case of subordinated loans, there may be significant indebtedness ranking ahead of the borrower's obligation to the holder of such a loan, including in the event of the borrower's insolvency.

The Fund may use derivatives for investment, duration management or hedging purposes, or with the purpose or effect of creating investment leverage. The Fund's investments in derivative instruments may include investments in, among other instruments, futures contracts, as well as certain currency instruments such as currency forward contracts and currency swap contracts.

The Fund also may invest in debt obligations issued by governments (including, without limitation, obligations issued or guaranteed by the US government) and/or their agencies and instrumentalities. From time to time, the Fund may invest in or hold common stock, preferred stock, convertible securities, and other equity securities or warrants. The Fund may purchase securities on a when-issued or delayed delivery basis.

The Fund may sell an investment when the team thinks changing circumstances have affected the original reasons for the instrument's purchase, the issuer of the instrument exhibits deteriorating credit or other fundamentals, or more attractive investment opportunities are identified.

Artisan International Fund

Artisan International Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental stock selection process focused on identifying long-term growth opportunities to build a diversified portfolio of non-US growth companies of all market capitalizations. The team seeks to invest in companies within its preferred themes with sustainable growth characteristics at attractive valuations that do not fully reflect their long-term potential.

- **Themes**—The team identifies long-term secular growth trends with the objective of investing in companies that have meaningful exposure to these trends. The team's fundamental analysis focuses on those industry leaders with attractive growth and valuation characteristics that will be long-term beneficiaries of any structural change and/or trend.
- **Sustainable Growth**—The team applies a fundamental approach to identifying the long-term, sustainable growth characteristics of potential investments. The team seeks high-quality companies that typically have a sustainable competitive advantage, a superior business model and a high-quality management team. As part of the investment process, the team considers material environmental, social and governance factors alongside other fundamental research.
- **Valuation**—The team uses multiple valuation metrics to establish a target price range. The team assesses the relationship between its estimate of a company's sustainable growth prospects and its current valuation.

There are no restrictions on the size of the companies in which the Fund may invest. The Fund invests primarily in developed markets but also may invest up to 35% of the Fund's total assets at market value at the time of purchase in emerging and less developed markets. The Fund typically holds securities representing at least 15 countries. The maximum investment in any single country is 30% of the Fund's total assets at market value at the time of purchase.

Under normal market conditions, the Fund is substantially invested in common stocks and similar securities, and invests at least 65% of its net assets at market value at the time of purchase in securities of non-US companies. The Fund's portfolio is constructed without regard to index weightings. The Fund tries to maintain a cash position of no more than 5% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. As a result, the Fund may at times hold more than 5% of its total assets in cash. The Fund may invest up to 10% of its total assets measured at the time of purchase in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

The Fund's investments generally are traded in currencies other than US dollars, so the Fund buys and sells non-US currencies to facilitate transactions in portfolio securities. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually does not hedge against possible variations in exchange rates, but, in certain circumstances, the Fund may hedge its exposure to securities denominated in foreign currencies as well as other positions that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund may sell a security when the team thinks the security is approaching full valuation, changing circumstances affect the original reasons for its purchase, the company exhibits deteriorating fundamentals, or more attractive opportunities are identified.

Artisan International Explorer Fund

Artisan International Explorer Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of securities of undervalued, primarily non-US small companies. The team seeks to invest in what the team considers to be high quality, undervalued companies with strong balance sheets and shareholder-oriented management teams.

The team's investment process focuses on four key characteristics:

- **Undervaluation**—Determining the intrinsic value of a business is the heart of the team's research process. The team believes that intrinsic value represents the amount that a buyer would pay to own a company's future cash flows. The team seeks to invest at a significant discount to its estimate of the intrinsic value of a business.
- **Business Quality**—The team seeks to invest in companies with histories of generating strong free cash flow, improving returns on capital and strong competitive positions in their industries.
- **Financial Strength**—The team believes that investing in companies with strong balance sheets helps to reduce the potential for capital risk and provides company management the ability to build value when attractive opportunities are available.
- **Shareholder-Oriented Management**—The team's research process attempts to identify management teams with a history of building value for shareholders.

Companies that make it through this analytical process are ranked at the time the position is initiated according to the degree of the discount of the current market price of the stock to the team's estimate of the company's intrinsic value. The team manages the portfolio by generally taking larger positions in companies where the discount is greatest and smaller positions in companies with narrower discounts (subject to adjustments for investment-related concerns, including diversification, risk management and liquidity). As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

The focus of the investment process is on individual companies, not on selection of countries or regions. Under normal market conditions, the Fund invests no less than 65% of its total assets (excluding cash and cash equivalents), measured at market value at the time of purchase, in common stocks and other securities of non-US companies. The Fund is non-diversified, which means that it may invest a greater portion of its assets in a more limited number of issuers than a diversified fund. As a result, a high percentage of the Fund's total assets may be invested in a particular company, sector or industry. The Fund may invest a substantial portion of its total assets in emerging and less developed markets.

The Fund may invest in common stocks and other securities of companies across a broad capitalization range and there are no restrictions on the market capitalizations of the companies in which the Fund may invest. However, the Fund anticipates investing primarily in small capitalization ("small-cap") companies. Small-cap companies for this purpose are those companies with a market capitalization below \$5 billion at the time of the Fund's investment. In addition, because the relative sizes of companies change over time as the securities market changes, the Fund's definition of what is a "small-cap" company may change over time as well. The Fund's portfolio is constructed without regard to index weightings.

The Fund generally does not invest more than 15% of its total assets at market value at the time of purchase in any single security. Under normal market conditions, the Fund tries to maintain a cash position of no more than 15% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. Investment of available cash may be slowed during periods when stock prices are moving broadly upwards because higher

prevailing valuations cause fewer securities to meet the Fund's investment criteria. As a result, the Fund may at times hold more than 15% of its total assets in cash.

The Fund may invest up to 10% of its total assets measured at the time of purchase in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

The Fund's investments generally are traded in currencies other than US dollars, so the Fund buys and sells non-US currencies to facilitate transactions in portfolio securities. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually does not hedge against possible variations in exchange rates, but, in certain circumstances, the Fund may hedge its exposure to securities denominated in foreign currencies as well as other positions that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund invests primarily in equity securities but, from time to time, the team may conclude that a security other than an equity security presents a more attractive risk/reward profile. Accordingly, the Fund may invest up to an aggregate of 10% of its total assets at market value at the time of purchase in debt securities of US and non-US issuers, including loans, that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity.

The Fund generally will sell when the security price approaches or exceeds the team's estimate of intrinsic value. The Fund also may sell if changing circumstances make the team change its assessment of the company's intrinsic value or more attractive alternatives are identified.

Artisan International Small-Mid Fund

Artisan International Small-Mid Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental stock selection process focused on identifying durable and idiosyncratic opportunities to build a diversified portfolio of primarily non-US small- and mid-cap growth companies. The team generally seeks long-term investments in high-quality businesses exposed to structural growth themes that can be acquired at sensible valuations in contrarian fashion and are led by excellent management teams.

- **Investing with Tailwinds**—The team identifies structural themes at the intersection of growth and change with the objective of investing in companies having meaningful exposure to these trends. Themes represent a secular outlook, are generally industry specific, and are identified from a bottom-up perspective.
- **High-Quality Businesses**—The team seeks companies that it views as future industry leaders with sustainable growth characteristics that can be owned for the long term. Those characteristics include differentiated and defensible business models, strong balance sheets, dynamic management teams, favorable positions within their industry value chains and high or improving returns on capital. As part of the investment process, the team considers material environmental, social and governance factors, which may include corporate governance principles, treatment of employees and exposure to regulatory risk, alongside other fundamental research.
- **A Contrarian Approach to Valuation**—The team seeks to invest in high-quality businesses in contrarian fashion. Mismatches between stock price and long-term business value are created by market dislocations, temporary slowdowns in individual businesses or misperceptions in the investment community.
- **Manage Unique Risks of International Small- and Mid-Cap Equities**—International small- and mid-cap equities are exposed to unique investment risks that require managing. The team defines risk as including permanent loss of capital, not just share price volatility. The team manages this risk by having a long-term ownership focus, understanding the direct and indirect security risks for each business, constructing the portfolio on a well-diversified basis and sizing positions according to individual risk characteristics.

Under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in common stocks and other securities of small- and mid-cap companies. The Fund will notify its shareholders at least 60 days prior to any change in this 80% policy. Small- and mid-cap companies for this purpose are those companies with a market capitalization below \$30 billion or having a market capitalization similar to the constituents of the MSCI ACWI ex USA SMID Index at the time of the Fund's investment. Some of these companies, although small by US standards, might rank among the largest in their countries by market capitalization. As long as an investment continues to meet the Fund's other investment criteria, the Fund may choose to hold a stock or security even if the company's market capitalization grows or falls outside the range given above. In addition, because the relative sizes of companies change over time as the securities market changes, the Fund's definition of what is a "small-cap," "mid-cap" or "large-cap" company may change over time as well. The Fund's portfolio is constructed without regard to index weightings. Under normal market conditions, the Fund will invest at least 65% of its total assets at market value at the time of purchase in securities of non-US companies. The Fund invests in developed markets and emerging and less developed markets.

From time to time, the team may conclude that a security other than an equity presents a more attractive risk/reward profile. Accordingly, the Fund may invest to a limited extent in debt securities (including lower-rated securities), which include securities rated below investment

grade (below BBB- by S&P or Fitch or below Baa3 by Moody's), or comparably rated by another NRSRO or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds," and convertible debt securities of US or non-US issuers that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity.

The Fund may also invest up to 10% of its total assets measured at the time of purchase in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

The Fund's investments generally are traded in currencies other than US dollars, so the Fund buys and sells non-US currencies to facilitate transactions in portfolio securities. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually does not hedge against possible variations in exchange rates, but, in certain circumstances, the Fund may hedge its exposure to securities denominated in foreign currencies as well as other positions that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund tries to maintain a cash position of no more than 10% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. As a result, the Fund may at times hold more than 10% of its total assets in cash.

The Fund may sell a security when the team thinks the security is approaching full valuation, changing circumstances affect the original reasons for its purchase, the company exhibits deteriorating fundamentals, or more attractive opportunities are identified.

Artisan International Value Fund

Artisan International Value Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of securities of undervalued non-US companies of all sizes. The team seeks to invest in what the team considers to be high quality, undervalued companies with strong balance sheets and shareholder-oriented management teams.

The team's investment process focuses on four key characteristics:

- **Undervaluation**—Determining the intrinsic value of a business is the heart of the team's research process. The team believes that intrinsic value represents the amount that a buyer would pay to own a company's future cash flows. The team seeks to invest at a significant discount to its estimate of the intrinsic value of a business.
- **Business Quality**—The team seeks to invest in companies with histories of generating strong free cash flow, improving returns on capital and strong competitive positions in their industries.
- **Financial Strength**—The team believes that investing in companies with strong balance sheets helps to reduce the potential for capital risk and provides company management the ability to build value when attractive opportunities are available.
- **Shareholder-Oriented Management**—The team's research process attempts to identify management teams with a history of building value for shareholders.

Companies that make it through this analytical process are ranked at the time the position is initiated according to the degree of the discount of the current market price of the stock to the team's estimate of the company's intrinsic value. The team manages the portfolio by generally taking larger positions in companies where the discount is greatest and smaller positions in companies with narrower discounts (subject to adjustments for investment-related concerns, including diversification, risk management and liquidity).

The focus of the investment process is on individual companies, not on selection of countries or regions. Under normal market conditions, the Fund invests no less than 80% of its total assets (excluding cash and cash equivalents), measured at market value at the time of purchase, in common stocks and other securities of non-US companies, including up to 30% of its total assets at market value at the time of purchase in emerging and less developed markets.

The Fund normally invests in at least five countries outside the US and generally does not invest more than 35% of its total assets at market value at the time of purchase in any single country. The Fund may invest in companies of any size. The Fund tries to maintain a cash position of no more than 15% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. Investment of available cash may be slowed during periods when stock prices are moving broadly upwards because higher prevailing valuations cause fewer securities to meet the Fund's investment criteria. As a result, the Fund may at times hold more than 15% of its total assets in cash.

The Fund may invest up to 10% of its total assets measured at the time of purchase in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a

participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

The Fund's investments generally are traded in currencies other than US dollars, so the Fund buys and sells non-US currencies to facilitate transactions in portfolio securities. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually does not hedge against possible variations in exchange rates, but, in certain circumstances, the Fund may hedge its exposure to securities denominated in foreign currencies as well as other positions that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund invests primarily in equity securities but, from time to time, the team may conclude that a security other than an equity security presents a more attractive risk/reward profile. Accordingly, the Fund may invest up to an aggregate of 10% of its total assets at market value at the time of purchase in debt securities of US and non-US issuers, including loans, that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity.

The Fund generally will sell when the security price approaches or exceeds the team's estimate of intrinsic value. The Fund also may sell if changing circumstances make the team change its assessment of the company's intrinsic value or more attractive alternatives are identified.

Artisan Mid Cap Fund

Artisan Mid Cap Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of US mid-cap growth companies. The team seeks to invest in companies that it believes possess franchise characteristics, are benefiting from an accelerating profit cycle and are trading at a discount to its estimate of private market value. The Fund's investment process focuses on two distinct elements—security selection and capital allocation. The team overlays its investment process with sustainability considerations and broad knowledge of the global economy.

- **Security Selection**—The team seeks to identify companies that have franchise characteristics (e.g., low cost production capability, possession of a proprietary asset, dominant market share or a defensible brand name), are benefiting from an accelerating profit cycle and are trading at a discount to the team's estimate of private market value. The team looks for companies that are well positioned for long-term growth, which is driven by demand for their products and services at an early enough stage in their profit cycle to benefit from the increased cash flows produced by the emerging profit cycle.
- **Capital Allocation**—Based on the team's fundamental analysis of a company's profit cycle, it divides the portfolio into three parts. **GardenSM** investments are small positions in the early part of their profit cycle that may warrant more sizeable allocations as their profit cycle accelerates. **CropSM** investments are positions that are being increased to a full weight because the team believes they are moving through the strongest part of their profit cycles. **HarvestSM** investments are positions that are being reduced as they near the team's estimates of full valuation or their profit cycles begin to decelerate.
- **Sustainability Considerations**—The team employs a framework in assessing material sustainability exposures factors that informs its security selection and capital allocation process.
- **Broad Knowledge**—The team overlays the security selection and capital allocation elements of its investment process with a desire to invest opportunistically across the entire global economy. The team seeks broad knowledge of the global economy in order to position it to find growth wherever it occurs.

The Fund invests primarily in US companies and, under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in the common stocks of medium-sized companies. The Fund will notify its shareholders at least 60 days prior to any change in this 80% policy. The Fund defines a medium-sized company as one with a market capitalization greater than the market capitalization of the smallest company in the Russell Midcap[®] Index and less than three times the weighted average market capitalization of companies in the index. As of 31 December 2025, the market capitalization of the smallest company in the Russell Midcap[®] Index was \$134.5 million and the weighted average market capitalization of companies in that index was approximately \$30.2 billion. Over time, the capitalizations of the companies in the Russell Midcap[®] Index will change. As they do, the size of the companies in which the Fund invests may change. As long as an investment continues to meet the Fund's other investment criteria, the Fund may choose to hold a stock even if the company's market capitalization grows or falls outside the range given above. Under normal circumstances, the Fund generally maintains a weighted average market capitalization of not more than 1.5 times the weighted average market capitalization of the companies included in the Russell Midcap[®] Index or Russell Midcap[®] Growth Index, whichever is greater.

The Fund may invest up to 15% of its total assets at market value at the time of purchase in common stocks and other securities of non-US companies (including depositary receipts). The Fund's investments in non-US securities may include investments in developed markets, as well as emerging and less developed markets.

As to 75% of its total assets, the Fund limits the size of its investments so that it invests no more than 5% of its total assets at market value at the time of purchase in securities of a single issuer. However, the Fund may purchase additional securities of an issuer that comprises more than 5% of the Fund's total assets due to market movement in order to invest cash received from shareholder investments and maintain the

weighting in the portfolio, provided that such securities do not, in the aggregate, exceed 25% of the Fund's total assets. The Fund tries to maintain a cash position of no more than 5% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. As a result, the Fund may at times hold more than 5% of its total assets in cash.

The Fund may buy or sell non-US currencies to facilitate transactions in securities traded in such currencies. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts. The Fund's direct or indirect exposure to a particular currency may be hedged if the Fund has, or is initiating, positions (including through, among other positions, depositary receipts) in securities traded in that currency. The Fund may also hedge its exposure to securities that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund may sell a security when the team thinks the security is approaching full valuation, changing circumstances affect the original reasons for its purchase, the company exhibits deteriorating fundamentals, or more attractive opportunities are identified.

Artisan Select Equity Fund

Artisan Select Equity Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental investment process to construct a focused portfolio of securities of undervalued US companies across a broad capitalization range. The team seeks to invest in what the team considers to be high quality, undervalued companies with strong balance sheets and shareholder-oriented management teams.

The team's investment process focuses on four key characteristics:

- **Undervaluation**—Determining the intrinsic value of a business is the heart of the team's research process. The team believes that intrinsic value represents the amount that a buyer would pay to own a company's future cash flows. The team seeks to invest at a significant discount to its estimate of the intrinsic value of a business.
- **Business Quality**—The team seeks to invest in companies with histories of generating strong free cash flow, improving returns on capital and strong competitive positions in their industries.
- **Financial Strength**—The team believes that investing in companies with strong balance sheets helps to reduce the potential for capital risk and provides company management the ability to build value when attractive opportunities are available.
- **Shareholder-Oriented Management**—The team's research process attempts to identify management teams with a history of building value for shareholders.

Companies that make it through this analytical process are ranked at the time the position is initiated according to the degree of the discount of the current market price of the stock to the team's estimate of the company's intrinsic value. The team manages the portfolio by generally taking larger positions in companies where the discount is greatest and smaller positions in companies with narrower discounts (subject to adjustments for investment-related concerns, including diversification, risk management and liquidity). As part of the investment process, the team considers financially material environmental, social and governance factors alongside other fundamental research.

Under normal market conditions, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in equity securities or instruments that have similar economic characteristics. The Fund will notify its shareholders at least 60 days prior to any change in this 80% policy. The Fund will invest primarily in US companies but may invest up to 20% of its total assets at market value at the time of purchase in non-US companies including in emerging and less developed markets. The Fund is non-diversified, which means that it may invest a greater portion of its assets in a more limited number of issuers than a diversified fund. The Fund will typically hold 20-30 securities. As a result, a high percentage of the Fund's total assets may be invested in a particular company, sector or industry. The Fund will generally not invest more than 10% of its total assets, at the time of purchase, in the securities of a single issuer. There are no restrictions on the market capitalizations of the companies in which the Fund may invest.

The Fund tries to maintain a cash position of no more than 10% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. Investment of available cash may be slowed during periods when stock prices are moving broadly upwards because higher prevailing valuations cause fewer securities to meet the Fund's investment criteria. As a result, the Fund may at times hold more than 10% of its total assets in cash.

The Fund may invest up to 10% of its total assets, measured at the time of purchase, in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called "participation certificates" in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

From time to time, the team may conclude that a security other than equity security presents a more attractive risk/reward profile. Accordingly, the Fund may invest to a limited extent (in any event, no more than 20% of its net assets plus any borrowings for investment purposes at market value at the time of purchase) in debt securities (including lower-rated securities, which include securities rated below

investment grade (below BBB- by S&P or Fitch or below Baa3 by Moody's), or comparably rated by another NRSRO, or unrated but determined by Artisan Partners to be of comparable quality, commonly known as "junk bonds"), and convertible debt securities of US or non-US issuers that meet the Fund's investment criteria. The Fund may invest in debt securities of any maturity.

The Fund buys and sells non-US currencies to facilitate transactions in portfolio securities. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually does not hedge against possible variations in exchange rates, but, in certain circumstances, the Fund's exposure to a particular currency that the team believes is overvalued may be hedged if the Fund has, or is initiating, positions in securities traded in that currency. The Fund may also hedge its exposure to securities that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy or sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund generally will sell when the security price approaches or exceeds the team's estimate of intrinsic value. The Fund also may sell if changing circumstances make the team change its assessment of the company's intrinsic value or more attractive alternatives are identified.

Artisan Small Cap Fund

Artisan Small Cap Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of US small-cap growth companies. The team seeks to invest in companies that it believes possess franchise characteristics, are benefiting from an accelerating profit cycle and are trading at a discount to its estimate of private market value. The Fund's investment process focuses on two distinct elements—security selection and capital allocation. The team overlays its investment process with sustainability considerations and broad knowledge of the global economy.

- **Security Selection**—The team seeks to identify companies that have franchise characteristics (e.g., low cost production capability, possession of a proprietary asset, dominant market share or a defensible brand name), are benefiting from an accelerating profit cycle and are trading at a discount to the team's estimate of private market value. The team looks for companies that are well positioned for long-term growth, which is driven by demand for their products and services at an early enough stage in their profit cycle to benefit from the increased cash flows produced by the emerging profit cycle.
- **Capital Allocation**—Based on the team's fundamental analysis of a company's profit cycle, it divides the portfolio into three parts. **GardenSM** investments are small positions in the early part of their profit cycle that may warrant more sizeable allocations as their profit cycle accelerates. **CropSM** investments are positions that are being increased to a full weight because the team believes they are moving through the strongest part of their profit cycles. **HarvestSM** investments are positions that are being reduced as they near the team's estimates of full valuation or their profit cycles begin to decelerate.
- **Sustainability Considerations**—The team employs a framework in assessing material sustainability exposures factors that informs its security selection and capital allocation process.
- **Broad Knowledge**—The team overlays the security selection and capital allocation elements of its investment process with a desire to invest opportunistically across the entire global economy. The team seeks broad knowledge of the global economy in order to position it to find growth wherever it occurs.

The Fund invests primarily in US companies and, under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in the common stocks of small companies. The Fund will notify its shareholders at least 60 days prior to any change in this 80% policy. The Fund defines small companies as those with market capitalizations less than \$8 billion or the market capitalization of the largest company in the Russell 2000[®] Index on a rolling one-year basis, whichever is greater. Over time, the capitalizations of the companies in the Russell 2000[®] Index will change. As they do, the size of the companies in which the Fund invests may change. *The Fund may change the definition of what constitutes a "small company" without advance notice to shareholders.* As long as an investment continues to meet the Fund's other investment criteria, the Fund may choose to hold a stock even if the company's market capitalization grows beyond the Fund's definition of a small company. The Fund will not initiate a position in a company unless it has a market capitalization that is within the range of the market capitalizations of companies in the Russell 2000[®] Index as of the most recent calendar year-end (between \$5.6 million and \$31.2 billion as of 31 December 2025).

The Fund may invest in the securities of non-US companies, but only if the securities are purchased or sold in the US. The Fund's maximum investment in those securities, including, without limitation, depositary receipts, is 10% of the Fund's total assets at market value at the time of purchase. The Fund may also, from time to time, invest in other private placements and restricted securities.

In general no more than 5% of the Fund's total assets at market value at the time of purchase will be invested in securities of a single issuer. However, the Fund may purchase additional securities of an issuer that comprises more than 5% of the Fund's total assets due to market movement in order to invest cash received from shareholder investments and maintain the weighting in the portfolio. The Fund tries to maintain a cash position of no more than 5% of its total assets, although cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities, may cause the Fund's cash position to be larger or smaller. As a result, the Fund may at times hold more than 5% of its total assets in cash.

The Fund may sell a security when the team thinks the security is approaching full valuation, changing circumstances affect the original reasons for its purchase, the company exhibits deteriorating fundamentals, or more attractive opportunities are identified.

Artisan Sustainable Emerging Markets Fund

Artisan Sustainable Emerging Markets Fund seeks long-term capital growth.

The Fund's investment team employs a fundamental research process to construct a portfolio of emerging market companies. The team seeks to invest in companies that it believes are uniquely positioned to benefit from the growth potential in emerging markets and possess a sustainable global competitive advantage.

- **Sustainable Earnings**—The team believes that over the long-term a stock's price is directly related to the company's ability to deliver sustainable earnings. The team determines a company's sustainable earnings based upon financial and strategic analyses. The team's financial analysis of a company's balance sheet, income statement and statement of cash flows focuses on identifying historical drivers of return on equity. The team's strategic analysis examines a company's competitive advantages and financial strength to assess sustainability.
- **Sustainability Assessment**—The team believes that a company's long-term direction and degree of change across multiple environmental, social and governance ("ESG") metrics are important indicators of a company's sustainable growth potential. The team seeks to assess a company's sustainable growth potential by monitoring for improvement or deterioration in ESG metrics. The team's sustainability assessment has incident-based and empirical components to evaluate a company's historical, current and future potential behavior. The team uses a proprietary scoring system for the incident-based and empirical components of the assessment, which informs the team's view of a company's target price.
- **Risk Analysis**—The team believes a disciplined risk framework allows greater focus on fundamental stock selection. The team incorporates its assessment of company-specific and macroeconomic risks into its valuation analysis to develop a risk-adjusted target price. The team's risk-rating assessment includes a review of country-appropriate macroeconomic risk factors to which a company is exposed.
- **Valuation**—The team believes investment opportunities develop when businesses with sustainable earnings are undervalued relative to peers and historical industry, country and regional valuations. The team values a business and develops a price target for a company based on its assessment of the business's sustainable earnings, sustainability assessment and risk analysis.

In the sustainability assessment, the team considers incident-based data from a third-party provider and the team's internal research to score ESG factors that may materially impact a company's sustainable growth potential, including but not limited to:

Governance

- Board management
- Business ethics and competitive behavior
- Reporting transparency and communication
- Shareholder ownership and rights

Environmental

- Climate change risk, mitigation and adaptation
- Water stress
- Land use impact and bio-diversity loss

Social

- Human rights and responsibility to the community
- Human capital, labor rights and equity
- Data privacy and security

For each company, as part of its sustainability assessment, the team generates an overall sustainability score from 1 (lowest) to 5 (highest) based on separate incident-based scores and empirical scores. The team derives the incident-based scores from data provided by a third-party provider, which considers the frequency and severity of ESG-related incidents to measure positive or negative change over time and rate a company's ESG risk. The team generates the empirical sustainability scores based on the team's research and engagement with companies on ESG factors. The team uses the sustainability assessment scores in evaluating a company's target price, adjusting the price upward for high scores (4 or 5) or downward for low scores (1 or 2). The target price adjustment is not symmetric; premiums applied to companies with high sustainability scores are not as significant as discounts applied to companies with low sustainability scores.

The team's sustainability assessment does not exclude companies from potential investment; rather it is used to measure the influence of a company's ESG-related risks on its potential sustainable earnings and stock price.

The Fund invests primarily in companies domiciled, headquartered, or whose primary business activities or principal trading markets are in emerging and less developed markets. Those are markets in any country other than Canada, Luxembourg, the US and the countries comprising the MSCI EAFE Index (currently, Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom).

Under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in equity securities of issuers domiciled, headquartered, or whose primary business activities or principal trading markets are in emerging and less developed markets. The Fund will notify its shareholders at least 60 days prior to any change in this 80% policy. The Fund generally will not invest more than 15% of its total assets in the securities of a single issuer, measured at the time of purchase. The Fund invests in common stocks and other equity securities of companies across a broad market capitalization range. The companies in which the Fund invests generally have market capitalizations of at least \$400 million at the time of initial purchase, although the Fund may invest in a company with a lower market capitalization from time to time. The Fund tries to maintain a cash position of no more than 5% of its total assets, although it is affected by cash flows, including from shareholder investments and redemptions and purchases and sales of portfolio securities. As a result, the Fund may at times hold more than 5% of its total assets in cash. The Fund may invest up to 10% of its total assets measured at the time of purchase in equity-linked securities that provide economic exposure to a security of one or more non-US companies without direct investment in the underlying securities (called “participation certificates” in this prospectus, but may be called different names by issuers). Participation certificates typically are issued by a bank or broker-dealer. When a participation certificate is redeemed, the bank or broker-dealer is obligated to pay the Fund an amount based on the value of the underlying security or securities.

The Fund’s investments generally are traded in currencies other than US dollars, so the Fund buys and sells non-US currencies to facilitate transactions in portfolio securities. The Fund is also directly or indirectly exposed to foreign currency movements when it purchases certain US dollar denominated securities, such as depositary receipts and participation certificates. The Fund usually does not hedge against possible variations in exchange rates, but, in certain circumstances, the Fund may hedge its exposure to securities denominated in foreign currencies as well as other positions that expose the Fund to currency movements, including dollar-denominated securities. The Fund may buy and sell currencies for cash at current exchange rates, or use an agreement to purchase or sell a specified currency at a specified future date or within a specified time period, at a price set at the time of the contract.

The Fund may sell a security when the team thinks the security has achieved its valuation target, fundamentals or competitive advantages have deteriorated or more attractive alternatives are identified.

Risks You Should Consider

Like all funds, the Funds take investment risks and it is possible for you to lose money by investing in a Fund. Investors in each Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. This section describes the principal risks associated with investing in each Fund, but is not a complete list of every risk involved in investing in each Fund and the Fund may be exposed to additional risks not listed below. The “Investment Techniques and Risks” section in the Statement of Additional Information (“SAI”) includes more information about each Fund, its investments and the related risks. An investment in a Fund is not a bank deposit, and is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency.

The principal risks that apply to the Funds include:

- **Market Risks (*all Funds*)**—Various market risks can affect the price or liquidity of securities in which a Fund may invest. The securities in which a Fund invests may underperform the various general securities markets or different asset classes. Different types of securities tend to go through cycles of outperformance and underperformance in comparison to the general securities markets. Adverse events occurring with respect to an issuer’s performance or financial position can depress the value of the issuer’s securities. The liquidity in a market for a particular security will affect its value and may be affected by factors relating to the issuer, as well as the depth of the market for that security. Other factors that can affect an investment’s value include, without limitation, investor sentiment regarding certain types of securities or asset classes, market reactions to political or economic events, litigation relating to a particular issuer or industry, and tax and regulatory environments or developments (including lack of adequate regulations for a market or particular type of instrument).

Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. During those periods, the Funds may experience high levels of shareholder redemptions, and may have to sell securities at times when the Fund would otherwise not do so, and potentially at unfavorable prices. Securities may be difficult to value during such periods. These risks may be heightened for fixed income securities in low interest rate environments.

Governmental and quasi-governmental authorities and regulators may take actions that affect the regulation of the securities in which a Fund invests or the issuers of such securities in ways that are unforeseeable. Legislation or regulation also may change the way in which the Funds or Artisan Partners are regulated, limit or preclude a Fund’s ability to achieve its investment objective and/or affect the Fund’s performance. Governmental and quasi-governmental authorities and regulators have in the past responded to major economic disruptions with a variety of significant fiscal and monetary policy changes, including but not limited to direct capital infusions into companies, increased government spending, new monetary programs and dramatically lower interest rates. While such policies or actions generally are intended to strengthen markets, the financial system and public finances, there can be no guarantee that such policies or actions will be sufficient or will have their intended effect. In addition, discontinuation or reversal of such policies could increase volatility in or otherwise adversely affect securities markets, which could adversely affect a Fund’s investments.

Political, social or financial instability, civil unrest and acts of terrorism are among other potential risks that could adversely affect securities markets generally or the values of individual securities.

- **Active Management Risks (*all Funds*)**—The success of a Fund is dependent on a team’s investment decisions, which are based, in part, on the research process employed by a team. The portfolio securities selected by a team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case a Fund could experience losses regardless of the performance of the market indices. If a team considers environmental, social and governance factors or sustainability considerations in its research process, a Fund may forgo certain investment opportunities and underperform funds that do not consider environmental, social and governance factors.
- **Risks of Emphasizing a Region, Country, Sector or Industry (*all Funds*)**—If a Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund’s overall portfolio.
- **Impact of Actions by Other Shareholders (*all Funds*)**—Each Fund, like all mutual funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on a Fund and on other investors. For example, significant levels of new investments may cause a Fund to have more cash than would otherwise be the case, which might have a positive or negative effect on Fund performance. Similarly, redemption activity might cause a Fund to sell portfolio securities or borrow money, which might generate a capital gain or loss or cause a Fund to incur costs that, in effect, would be borne by all shareholders, not just those investors who redeemed. Shareholder purchase and redemption activity may also affect the per share amount of a Fund’s distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on a Fund’s shareholders subject to income tax who receive Fund distributions. In addition, large or frequent redemptions and purchases of a Fund’s shares may adversely affect the Fund’s performance if the Fund is forced to sell portfolio securities or invest cash when Artisan Partners would not otherwise choose to do so. This risk will be heightened if one or a few shareholders own a substantial portion of a Fund, in which case a purchase or redemption may have a more pronounced effect on the Fund. Redemptions of a large number of shares increase the Fund’s transaction costs. In addition, the Fund may be forced to sell its more liquid positions, which may affect the liquidity of the Fund’s portfolio.

- **Operational and Cybersecurity Risks (*all Funds*)**—Artisan Partners Funds, its service providers, including its adviser Artisan Partners, and other market participants increasingly depend on complex information technology and communications systems to conduct business functions. These systems are subject to a number of different threats or risks that could adversely affect a Fund and its shareholders, despite the efforts of Artisan Partners Funds and its service providers to adopt technologies, processes and practices intended to mitigate these risks.

For example, unauthorized third parties may attempt to improperly access, modify, disrupt the operations of or prevent access to these systems or data within them (a “cyber-attack”), whether systems of Artisan Partners Funds, its service providers, counterparties or other market participants. Such cyber-attacks may involve, among other things, “ransomware” attacks, injection of computer viruses or malicious software code, or the use of vulnerabilities in code to gain unauthorized access to digital information systems, networks or devices that are used directly or indirectly by Artisan Partners Funds, its service providers, including its adviser Artisan Partners, and other market participants through “hacking” or other means. Power or communications outages, acts of God, epidemics and pandemics, information technology equipment malfunctions, operational errors and inaccuracies within software or data processing systems may also disrupt business operations or impact critical data. Market events also may occur at a pace that overloads current information technology and communication systems and processes of Artisan Partners Funds, its service providers or other market participants, impacting the ability to conduct a Fund’s operations.

Cyber-attacks, disruptions or failures that affect Artisan Partners Funds’ service providers or counterparties may adversely affect a Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations. For example, a Fund’s or Artisan Partners Funds’ service providers’ assets or sensitive or confidential information may be misappropriated, data may be corrupted and operations may be disrupted (e.g., cyber-attacks or operational failures may cause the release of private shareholder information or confidential Fund information, interfere with the processing of shareholder transactions, impact the ability to calculate the Fund’s net asset value and impede trading). In addition, cyber-attacks, disruptions or failures may cause reputational damage and subject a Fund or Artisan Partners Funds’ service providers to regulatory fines, litigation costs, penalties or financial losses, reimbursement or other compensation costs and/or additional compliance costs. While Artisan Partners Funds and its service providers may establish business continuity and other plans and processes to address the possibility of cyber-attacks, disruptions or failures, there are inherent limitations in such plans and systems, including that they do not apply to third parties, such as other market participants, as well as the possibility that certain risks have not been identified or that unknown threats may emerge in the future. Each Fund and Artisan Partners Funds’ service providers may also incur substantial costs for cybersecurity risk management, including insurance, in order to prevent or mitigate future cyber security incidents, and the Fund and its shareholders could be negatively impacted as a result of such costs.

Similar types of operational and technology risks are also present for issuers of securities or other instruments in which each Fund invests, which could result in material adverse consequences for such issuers, and may cause a Fund’s investments to lose value. In addition, cyber-attacks involving a Fund’s counterparty could affect such counterparty’s ability to meet its obligations to the Fund, which may result in losses to the Fund and its shareholders. Furthermore, as a result of cyber-attacks, disruptions or failures, an exchange or market may close or issue trading halts on specific securities or the entire market, which may result in a Fund being, among other things, unable to buy or sell certain securities or unable to accurately price its investments. Artisan Partners Funds cannot directly control any cybersecurity plans and systems put in place by its service providers, Fund counterparties, issuers in which a Fund invests or securities markets and exchanges.

- **Small and Medium-Sized Company Risks (*all Funds, except Artisan Floating Rate Fund and Artisan High Income Fund*)**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Foreign Investing Risks (*all Funds*)**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts and participation certificates) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates and unfavorable economic practices; and political instability and expropriation and nationalization risks.
- **Emerging and Developing Markets Risks (*all Funds, except Artisan Small Cap Fund*)**—Investment risks typically are greater in emerging, less developed and developing markets, including “frontier markets”, which are a subset of emerging markets and less developed markets that, generally, have smaller economies and less mature capital markets. For example, in addition to the risks associated with investments in any foreign country, political, legal and economic structures in these less developed countries may be new and changing rapidly, which may cause instability and greater risk of loss. Their securities markets may be less developed, and securities in those markets are generally more volatile and less liquid than those in the developed markets. Emerging and developing market countries also are more likely to experience high levels of inflation, deflation or currency devaluations, which could hurt their economies and securities markets. Certain emerging and developing markets also may face other significant internal or external risks, including a heightened risk of war, or ethnic, religious or racial conflicts. In addition, governments in many emerging and developing market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth of companies in those markets. For

example, Russia's military invasion of Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could result in significant market disruptions, including in certain industries or sectors, such as the oil and natural gas markets, and may negatively affect global supply chains, inflation and global growth. In addition, the price and liquidity of futures in which a Fund invests may fluctuate widely as a result of the conflict and related events. These and any related events could significantly impact a Fund's performance and the value of an investment in a Fund, even if a Fund does not have direct exposure to issuers in the countries directly affected.

Investing in emerging and developing market countries involves substantial risk due to, among other reasons, limited information; higher brokerage costs; different accounting, auditing and financial reporting standards; the inability of foreign investors to seek enforcement of certain contractual arrangements; less developed legal systems and thinner trading markets as compared to those in developed countries; and currency blockages or transfer restrictions. The securities markets of emerging and developing market countries may be substantially smaller, less developed, less liquid and more volatile than the major securities markets in the US and other developed nations. Such markets may also be heavily reliant on foreign capital and, therefore, vulnerable to capital flight. The limited size of many securities markets in emerging and developing market countries and limited trading volume in issuers compared to the volume in US securities or securities of issuers in other developed countries could cause prices to be erratic for reasons other than factors that affect the quality of the securities. Such risks may be greater in frontier markets. In addition, emerging and developing market countries' exchanges and broker-dealers may generally be subject to less regulation than their counterparts in developed countries. Brokerage commissions and dealer mark-ups, custodial expenses and other transaction costs are generally higher in emerging and developing market countries than in developed countries, all of which can increase fund operating expenses and/or negatively impact fund performance.

Emerging and developing market countries may have different clearance and settlement procedures than in the US, and in certain markets there may be times when settlements fail to keep pace with the volume of securities transactions, making it difficult to conduct such transactions. Further, satisfactory custodial services for investment securities may not be available in some emerging and developing market countries, which may result in additional costs and delays in trading and settlement. The inability of a Fund to make intended security purchases due to settlement problems or the risk of intermediary or counterparty failures could cause a Fund to miss attractive investment opportunities. The inability to dispose of a portfolio security due to settlement problems could result either in losses to a Fund due to subsequent declines in the value of such portfolio security or, if the Fund has entered into a contract to sell the security, could result in possible liability to the purchaser.

- **China-Related Risks (*Artisan Developing World Fund, Artisan Emerging Markets Debt Opportunities Fund, Artisan Global Unconstrained Fund and Artisan Sustainable Emerging Markets Fund*)**—China is an emerging market and demonstrates significantly higher volatility from time to time in comparison to developed markets. The central government has historically exercised substantial control over virtually every sector of the Chinese economy through administrative regulation and/or state ownership and actions of the Chinese central and local government authorities continue to have a substantial effect on economic conditions in China. Export growth continues to be a major driver of China's rapid economic growth. Reduction in spending on Chinese products and services, institution of tariffs or other trade barriers, or a downturn in any of the economies of China's key trading partners may have an adverse impact on the Chinese economy. Recent developments in relations between the US and China have heightened concerns of increased tariffs and restrictions on trade or other economic arrangements between the two countries. An increase in tariffs or trade restrictions, or even the threat of such developments, could lead to a significant reduction in international trade, which could have a negative impact on China's export industry and a commensurately negative impact on a Fund when it invests in securities and instruments that are economically tied to China.

To the extent a Fund invests in securities of Chinese issuers, it may also be subject to certain risks and considerations not typically associated with investing in securities of US issuers and potentially to a greater extent than investments in certain other non-US issuers, including, among others, risks associated with variable interest entities ("VIEs"). In China, foreign ownership of Chinese companies in certain sectors is prohibited. In order to facilitate foreign investment, many Chinese companies have established shell companies that enter into contractual arrangements with Chinese VIEs that allow foreign investors, such as the Funds, through the use of contractual arrangements, to both exert a degree of influence and to obtain substantially all of the economic benefits arising from a company without formal legal ownership. If the Chinese companies (or their officers, directors, or Chinese equity holders) breached their contracts or if Chinese officials and/or regulators withdraw their implicit acceptance of the VIE structure or if new laws, rules or regulations relating to VIE structures are adopted, US investors, including the Funds if they invest directly or indirectly in VIEs, could suffer substantial, detrimental, and possibly permanent losses with little or no recourse available.

- **Geopolitical Risks (*all Funds, except Artisan Floating Rate Fund, Artisan High Income Fund, Artisan Mid Cap Fund, Artisan Select Equity Fund and Artisan Small Cap Fund*)**—Geopolitical events adversely affect global economies and securities markets, subjecting a Fund's investments to related risks. War, terrorism, global health crises and pandemics, sanctions, tariffs, the imposition of exchange controls or other cross-border trade barriers and other geopolitical events have led, and in the future may lead, to increased market volatility and may have adverse short- or long-term effects on the US and world economies and markets generally. For example, military action by Russia in Ukraine, conflicts in the Middle East, US action in Venezuela and similar events and conflicts around the globe could affect the value of a Fund's investments, including beyond a Fund's direct exposure to issuers in the relevant countries or nearby geographic regions. In addition, the US has in the past imposed economic sanctions on certain countries, which may consist of asset freezes, restrictions on dealings in debt and equity, and certain industry-specific restrictions. Sanctions impair the ability of a Fund to buy, sell, receive or deliver those securities and/or assets that are subject to the sanctions, and the extent and duration of sanctions, and resulting market disruptions, are impossible to predict and could be substantial.

- **Currency Risks (*all Funds, except Artisan Small Cap Fund*)**—Foreign securities usually are denominated and traded in foreign currencies, while a Fund values its assets in US dollars. The exchange rates between foreign currencies and the US dollar fluctuate continuously. As a result, the Fund's performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. Currency exchange rates fluctuate significantly for many reasons, including changes in supply and demand in the currency exchange markets, actual or perceived changes in interest rates, intervention (or the failure to intervene) by US or foreign governments, central banks, or supranational agencies such as the International Monetary Fund and currency controls or other political and economic developments in the US or abroad.

The Fund's direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may mitigate the risk of loss from changes in currency exchange rates, but also may reduce or limit the opportunity for gain and involves the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund (see "Counterparty Risk").

- **Inflation/Deflation Risks (*all Funds*)**—The value of assets or income from a Fund's investments may be worth less in the future as inflation decreases the value of payments at future dates. As inflation increases, the real value of a Fund's portfolio could decline. Recently, inflation rates have risen to the highest levels seen in many decades. Deflation risk is the risk that prices throughout the economy decline over time. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of a Fund's portfolio.
 - **Participation Certificate Risks (*all Funds, except Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund, Artisan High Income Fund, Artisan Mid Cap Fund and Artisan Small Cap Fund*)**—The price, performance, liquidity and value of a participation certificate are all linked directly to the underlying security, so that investing in a participation certificate subjects a Fund to the risks associated with an investment in the underlying equity security. Investing in a participation certificate also exposes a Fund to the risk that the bank or broker-dealer that issues the certificate will not fulfill its contractual obligation to timely pay a Fund the amount owed under the certificate (see "Counterparty Risk"). In addition, a Fund typically has no rights under a participation certificate against the issuer of the securities underlying the participation certificate and is therefore typically unable to exercise any rights with respect to the issuer (including, without limitation, voting rights and fraud or bankruptcy claims). There is also no assurance that there will be a secondary trading market for a participation certificate or that the trading price of a participation certificate will equal the value of the underlying security.
 - **Cash Position Risks (*all Funds*)**—To the extent that a Fund invests in cash (which may include cash equivalents, such as money market instruments and repurchase agreements), the ability of the Fund to meet its objective may be limited.
 - **Confidential Information Access Risks (*all Funds*)**—In managing the Funds, Artisan Partners may seek to avoid the receipt of material, non-public information ("Confidential Information") about the investments being considered for acquisition by a Fund or held in a Fund's portfolio if the receipt of the Confidential Information would restrict the Fund or other Artisan Partners clients from trading in securities they hold or in which they may invest. In many instances, issuers offer to furnish Confidential Information to prospective purchasers or holders of the issuer's loans or other securities. In circumstances when Artisan Partners declines to receive Confidential Information from these issuers, a Fund may be disadvantaged in comparison to other investors, including with respect to evaluating the issuer and the price a Fund would pay or receive when it buys or sells those investments. Further, in situations when a Fund is asked, for example, to grant consents, waivers or amendments with respect to such investments, Artisan Partners' ability to assess such consents, waivers and amendments may be compromised by its lack of access to Confidential Information. In certain situations, Artisan Partners may choose to receive Confidential Information but create information walls around persons having access to the Confidential Information ("walled-off personnel") to limit the restrictions on others at Artisan Partners. Those measures could impair the ability of walled-off personnel from accessing information from others at Artisan Partners.
 - **Debt Securities Risks (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Focus Fund, Artisan Global Unconstrained Fund, Artisan Global Value Fund, Artisan High Income Fund, Artisan International Explorer Fund, Artisan International Small-Mid Fund, Artisan International Value Fund and Artisan Select Equity Fund*)**—The value of a debt security changes in response to various factors, including, for example, market-related factors, such as changes in interest rates or changes in the actual or perceived ability of an issuer to meet its obligations. In general, the value of a debt security will fall in response to increases in interest rates. A Fund may invest in debt securities without considering the maturity of the instrument. The value of a security with a longer duration will be more sensitive to changes in interest rates than a similar security with a shorter duration. As a result, changes in interest rates in the US and outside the US may affect a Fund's debt investments unfavorably.
- Debt securities in which the Fund invests may be rated below investment grade or unrated securities that are determined by Artisan Partners to be of comparable quality. Debt securities of below investment grade quality are high yield, high risk bonds, commonly known as "junk bonds." These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk, may be less liquid and may be subject to greater price volatility than higher-rated bonds.
- **Convertible Securities Risks (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Focus Fund, Artisan Global Unconstrained Fund, Artisan Global Value Fund, Artisan High Income Fund, Artisan International Small-Mid Fund, Artisan***

International Value Fund and Artisan Select Equity Fund)—Investing in convertible securities subjects the Fund to the risks of debt, but also the risks associated with an investment in the underlying equity security. Convertible securities are frequently issued with a call feature that allows the issuer to choose when to redeem the security, which could result in the Fund being forced to redeem, convert, or sell the convertible security under circumstances unfavorable to the Fund.

- **High Portfolio Turnover Risks (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Focus Fund and Artisan Global Equity Fund*)**—A Fund may engage in active and frequent trading of its portfolio securities. High portfolio turnover may result in increased transaction costs to a Fund, including brokerage commissions, dealer mark-ups and other transaction costs on the sale of the securities and on reinvestment in other securities. The sale of Fund portfolio securities may result in the realization and/or distribution to shareholders of higher capital gains or losses as compared to a fund with a less active trading strategy. These effects of higher than normal portfolio turnover may adversely affect Fund performance.
- **Growth Investing Risks (*all Funds, except Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund, Artisan Global Value Fund, Artisan High Income Fund, Artisan International Explorer Fund and Artisan International Value Fund*)**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth that a Fund's investment team anticipated.
- **Value Investing Risks (*Artisan Focus Fund, Artisan Global Value Fund, Artisan International Explorer Fund, Artisan International Value Fund and Artisan Select Equity Fund*)**—Value stocks may fall out of favor with investors and underperform other asset types during given periods. The price of a company's stock may never reach the level that a Fund's investment team considers its intrinsic value.
- **Non-Diversification Risks (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Focus Fund, Artisan Global Unconstrained Fund, Artisan International Explorer Fund and Artisan Select Equity Fund*)**—As a non-diversified fund under the 1940 Act, each Fund may invest a larger portion of its assets in securities of a smaller number of issuers than a diversified fund, which means a single issuer's performance may affect Fund performance more than if the Fund were invested in a larger number of issuers. Although each Fund is non-diversified under the 1940 Act, each Fund intends to qualify as a "regulated investment company" accorded special tax treatment under the Internal Revenue Code of 1986, as amended (the "Code"), which imposes its own diversification requirements that are less restrictive than the requirement applicable to "diversified" investment companies under the 1940 Act. Compliance with the diversification requirements applicable to regulated investment companies under the Code could limit the investment flexibility of a Fund.
- **Credit Risks (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Focus Fund, Artisan Global Unconstrained Fund, Artisan Global Value Fund, Artisan High Income Fund, Artisan International Small-Mid Fund, Artisan International Value Fund and Artisan Select Equity Fund*)**—An issuer or counterparty may fail to pay its obligations to a Fund when they are due. Financial strength and solvency (or the perceived financial strength or solvency) of an issuer are the primary factors influencing credit risk. Changes in the financial condition of an issuer or counterparty, changes in specific economic, social or political conditions that affect a particular type of security or other instrument or an issuer, and changes in economic, social or political conditions generally can increase the risk of default by an issuer or counterparty, which can affect a security's or other instrument's credit quality or value and an issuer's or counterparty's ability to pay interest and principal when due. The values of lower quality debt, including loans, tend to be particularly sensitive to these changes. The values of investments also may decline for a number of other reasons that relate directly to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods and services, as well as the historical and prospective earnings of the issuer and the value of its assets. In addition, lack or inadequacy of collateral or credit enhancements for a debt obligation may affect its credit risk. Credit risk of an investment may change over time, and securities or other instruments that are rated by ratings agencies may be subject to downgrade. Ratings are only opinions of the agencies issuing them as to the likelihood of payment. They are not guarantees as to quality and they do not reflect market risk. If an issuer or counterparty fails to pay interest, a Fund's income might be reduced and the value of the investment might fall, and if an issuer or counterparty fails to pay principal, the value of the investment might fall and a Fund could lose the amount of its investment.
- **Private Placement and Restricted Securities Risks (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund, Artisan High Income Fund and Artisan Small Cap Fund*)**—A private placement involves the sale of securities that have not been registered under the Securities Act of 1933, or relevant provisions of applicable non-US law. In addition to the general risks to which all securities are subject, securities acquired in a private placement generally are subject to strict restrictions on resale, and there may be no liquid secondary market or ready purchaser for such securities, and a liquid secondary market may never develop. Therefore, a Fund may be unable to dispose of such securities when it desires to do so or at a favorable time or price. This potential lack of liquidity may make it more difficult for Artisan Partners to accurately value these securities. Issuers of private placements or other restricted securities may include special purpose vehicles ("SPVs") that hold underlying assets to which a Fund wants to gain exposure. A Fund may have the right to receive payments only from the SPV, and may not have direct rights against the issuer of the underlying assets. Investors in such SPVs generally pay their share of the SPV's administrative and other expenses, including management fees.
- **High Yield Securities ("Junk Bond") Risks (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Focus Fund, Artisan Global Unconstrained Fund, Artisan Global Value Fund, Artisan High Income Fund, Artisan International Small-Mid Fund, Artisan International Value Fund and Artisan Select Equity Fund*)**—Fixed income instruments rated below investment grade, or unrated securities that are determined by Artisan Partners to be of comparable quality, are high yield, high risk bonds, commonly known as "junk bonds." These bonds are predominantly speculative. They are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. These bonds have a higher degree of default risk and may be less liquid than higher-

rated bonds. These securities may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity, negative perceptions of junk bonds generally and less secondary market liquidity. This potential lack of liquidity may make it more difficult for Artisan Partners to accurately value these securities. In the event that a Fund disposes of a portfolio security after it is downgraded, the Fund may experience a greater loss than if such security had been sold prior to the downgrade.

- **Interest Rate Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Focus Fund, Artisan Global Unconstrained Fund, Artisan Global Value Fund, Artisan High Income Fund, Artisan International Small-Mid Fund, Artisan International Value Fund and Artisan Select Equity Fund*)—Interest rate risk is the risk that fixed income securities and other instruments in a Fund's portfolio will fluctuate in value because of changes, or the anticipation of changes, in interest rates. In particular, during periods of rising interest rates, the values of such securities may decline and may result in losses to a Fund. Factors including central bank monetary policy, rising inflation rates, and changes in general economic conditions may cause interest rates to rise, which could cause the value of a Fund's investments to decline.

In general, the values of debt securities fall in response to increases in interest rates and rise in response to decreases in interest rates. Interest rate changes can be sudden and unpredictable, and a Fund may experience losses as a result of movements in interest rates. A Fund may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile in response to changing interest rates. Duration is a measure of the expected life of a bond that is used to determine the sensitivity of a security's price to changes in interest rates. For example, the price of a bond fund with an average duration of three years generally would be expected to fall approximately 3% if interest rates rose by one percentage point. Inverse floaters, interest-only and principal-only securities are especially sensitive to interest rate changes, which can affect not only their prices but can also change the income flows and repayment assumptions for those investments. Floating and other adjustable rate loan and debt instruments also react to interest rate changes in a similar manner, although generally to a lesser degree (depending, however, on the characteristics of the reset terms, including the index chosen, frequency of reset and reset caps or floors, among other things). Because rates on certain floating rate loans and floating rate debt instruments reset only periodically, changes in prevailing interest rates (and particularly sudden and significant changes) can be expected to cause fluctuations in the Fund's NAV. Because the Fund invests primarily in floating rate loans and floating rate debt securities, a decrease in interest rates will typically reduce the amount of income the Fund receives from such loans. The risks associated with rising interest rates may be heightened if the Federal Reserve raises interest rates in the future. In that situation, funds that hold bonds may face an increased exposure to the risks associated with an increased rate environment.

As interest rates rise, repayments of principal on certain debt securities, including loans, may occur at a slower rate than expected and the expected length of repayment of those securities could increase as a result (i.e., extension risk). Securities that are subject to extension risk generally have a greater potential for loss when prevailing interest rates rise, which could cause their values to fall sharply. Prepayment risk results from borrowers paying debt securities prior to their maturity date. When a prepayment happens, all or a portion of the obligation will be prepaid. A borrower is more likely to prepay an obligation which bears a relatively high rate of interest. This means that in times of declining interest rates, a portion of a Fund's higher yielding securities are likely to be prepaid and a Fund will probably be unable to reinvest those proceeds in an investment with as high a yield. A decline in income received by a Fund from its investments is likely to have a negative effect on the yield and total return of a Fund's shares.

- **Derivatives Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Focus Fund, Artisan Global Unconstrained Fund and Artisan High Income Fund*)—A derivative is a financial contract whose value depends on changes in the value of one or more underlying assets, reference rates or indexes. These instruments include, among others, participation certificates, credit default swaps, currency forward contracts, currency swap contracts and other swap agreements and similar instruments. A Fund's use of derivatives may involve risks different from, or greater than, the risks associated with investing in more traditional investments, such as stocks and bonds. Derivatives can be highly complex and may perform in ways unanticipated by Artisan Partners.

In addition to the risks of an adverse change in the value of the underlying reference asset, a Fund's use of derivatives, including, but not limited to, over-the-counter ("OTC") derivatives, involves the risk that the other party to the derivative contract will fail to make required payments or otherwise to comply with the terms of the contract. Derivatives transactions can create investment leverage and may be highly volatile, and a Fund could lose more than the amount it invests, especially in unusual or extreme market conditions. Derivatives may be difficult to value and highly illiquid, and a Fund may not be able to close out or sell a derivative position at a particular time or at an anticipated price.

US and non-US legislative and regulatory reforms, including those related to the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), have resulted in, and may in the future result in, new regulation of derivative instruments and a Fund's use of such instruments. New regulations could, among other things, restrict a Fund's ability to engage in derivative transactions (for example, by making certain types of derivative instruments or transactions no longer available to the Fund) and/or increase the costs of such transactions, and a Fund may as a result be unable to execute its investment strategies in a manner Artisan Partners might otherwise choose. The Funds rely on certain exemptions in Rule 18f-4 to enter into derivatives transactions and certain other transactions notwithstanding the restrictions on the issuance of "senior securities" under Section 18 of the 1940 Act. In addition, Rule 18f-4 could restrict the Funds' abilities to engage in certain derivatives transactions and/or increase the costs of such derivatives transactions, which could adversely affect the value or performance of the Funds.

- **Counterparty Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Focus Fund, Artisan Global Unconstrained Fund and Artisan High Income Fund*)—A Fund will be subject to credit risk with respect to the counterparties to the derivative contracts and other instruments entered into by the Fund. If a counterparty becomes bankrupt or insolvent or otherwise fails to perform its obligations to a Fund due to financial difficulties, the Fund may experience significant losses or delays in obtaining any recovery (including recovery of any collateral it has provided to the counterparty) from the counterparty. Counterparty risk with respect to certain exchange-traded and over-the-counter derivatives may be further complicated by US financial reform legislation.
- **Valuation Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund and Artisan High Income Fund*)—A Fund's investments are valued in accordance with Artisan Partners' valuation policies. The valuation of any investment involves inherent uncertainty and a Fund's specific valuation risks depends on the facts and circumstances of the investments a Fund makes from time to time, which may include, but are not limited to, the proportion of a Fund's investments that are fair valued and their contribution to the Fund's returns, reliance on third party service providers as part of Artisan Partners' fair valuation process and the risk that the methods for determining and calculating fair value are inappropriate or that such methods are not being applied consistently or correctly. In addition, certain investments in which a Fund may invest, including, for example, high yield bonds, loans, derivatives, complex securities and thinly-traded or illiquid investments, may be more difficult to value accurately, especially during periods of market disruption or extreme market volatility. Accordingly, the value of a security determined in accordance with Artisan Partners' valuation policies may differ materially from the value that could have been realized in an actual sale or transfer.
- **Leverage Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Focus Fund, Artisan Global Unconstrained Fund and Artisan High Income Fund*)—A Fund may use or create investment leverage in seeking to achieve its investment objective. Certain transactions can result in leverage and may expose the Fund to greater risk and increased costs. These transactions can include the use of certain derivatives (for example, swap transactions and options), entering into certain loan transactions that entail an obligation by the Fund to extend credit in the future (for example, revolving credit facilities) and the purchase of when-issued and delayed-delivery securities. In addition, a Fund may achieve investment leverage by borrowing money. Leverage generally has the effect of increasing the amounts of loss or gain the Fund might realize and creates the likelihood of greater volatility of the value of the Fund's investments. In transactions involving leverage, a relatively small market movement or change in other underlying indicator can lead to significantly larger losses to the Fund. There is generally the risk of loss in excess of invested capital. The use of leverage may cause the Fund to liquidate portfolio positions when it may not be advantageous to do so to satisfy its contractual obligations or to ensure compliance with applicable legal and regulatory requirements. Borrowing for investment purposes will also result in leverage. The costs of borrowing, such as interest on borrowed funds, may increase the Fund's expenses.
- **LIBOR Replacement Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund and Artisan High Income Fund*)—The coupons on variable and floating rate investments in which the Fund may invest are not fixed and may fluctuate based upon changes in market rates. The coupon on a floating rate investment is generally based on an interest rate, such as the Secured Overnight Financing Rate ("SOFR"). Some floating or variable rate obligations or investments of a Fund may have previously referenced the London Interbank Offered Rate ("LIBOR"). As a result of benchmark reforms, publication of all LIBOR settings has ceased. Public and private sector actors have worked to establish alternative reference rates, like SOFR or Term SOFR (a forward-looking measurement of market expectations of SOFR implied from certain derivatives markets), to be used in place of LIBOR, but it remains uncertain which alternative benchmarks will ultimately emerge as the most prevalent successors and the transition process may lead to an increase in market, operational and valuation uncertainties and volatility.
- **Loan Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund, Artisan High Income Fund, Artisan International Explorer Fund and Artisan International Value Fund*)—A Fund may make loans directly to borrowers or may acquire an interest in a loan by means of either an assignment or a participation. Investments in loans are generally subject to the same risks as investments in other types of debt obligations, including, among others, credit risk, interest rate risk, prepayment risk and extension risk. In addition, in many cases loans are subject to the risks associated with below investment grade securities. This means loans are often subject to significant credit risks, including a greater possibility that the borrower will be adversely affected by changes in market or economic conditions and may default or enter bankruptcy. This risk of default will increase in the event of an economic downturn or a substantial increase in interest rates (which will increase the cost of the borrower's debt service). Opportunities to invest in loans or certain types of loans may be limited.

A Fund may invest in loans made in connection with highly leveraged transactions. These transactions may include operating loans, leveraged buyout loans, leveraged capitalization loans and other types of acquisition financing. Those loans are subject to greater credit and liquidity risks than other types of loans. A Fund may invest in loans of borrowers that are experiencing, or are likely to experience, financial difficulty.

Loans in which a Fund may invest typically pay interest at floating rates. It is possible that the borrower may have the ability to change or to adjust the interest rate on a loan under circumstances or in ways that are unfavorable to a Fund, or that the timing or calculation of scheduled changes in the interest rate on a loan held by a Fund may delay, or prevent, the Fund from realizing the effects of favorable changes in interest rates.

Although the loans in which a Fund invests may be secured by specific collateral, there can be no assurance that liquidation of such collateral would satisfy the borrower's obligation in the event of nonpayment of scheduled interest or principal, or that such collateral could be readily liquidated. In the event of the bankruptcy of a borrower, a Fund could experience delays or limitations in realizing the benefits of

the collateral securing a loan or could recover nothing of what it is owed on the secured loan. If the terms of a secured loan do not require the borrower to pledge additional collateral in the event of a decline in the value of the already pledged collateral, a Fund will be exposed to the risk that the value of the collateral will not at all times equal or exceed the amount of the borrower's obligations under the loan. To the extent that a loan is collateralized by stock in the borrower or its subsidiaries, such stock may lose all of its value in the event of the bankruptcy of the borrower. Uncollateralized (i.e., non-secured) loans are subject to greater risk of loss (i.e., nonpayment) in the event of default than secured loans since they do not afford a Fund recourse to collateral. The claims of holders of unsecured loans may be subordinated, and thus lower in priority, to claims of creditors holding secured indebtedness and possibly other classes of creditors holding unsecured debt.

A Fund may invest in bridge loans, which may be designed to provide temporary or "bridge" financing to a borrower pending the purchase of identified assets or the arrangement of longer-term loans or the issuance and sale of debt obligations. If a Fund enters into a commitment with a borrower regarding a delayed draw term loan or bridge loan, a Fund may be obligated on one or more dates in the future to lend funds to the borrower (up to an aggregate stated amount) if called upon to do so by the borrower, which may have the effect of requiring a Fund to increase its exposure to a company at a time when it might not otherwise be desirable to do so (including a time when the company's financial condition makes it unlikely that such amounts will be repaid or which a Fund needs to sell other assets to raise cash to satisfy its obligor). As long as a Fund has a reasonable belief, at the time it enters into an unfunded commitment agreement, that it will have sufficient cash and cash equivalents to meet its obligations with respect to all of its unfunded commitment agreements, such commitments will not be subject to certain limitations on leverage under the 1940 Act, although such commitments may nonetheless result in a form of leverage.

Investments in loans may be difficult to value and may be illiquid for reasons including legal or contractual restrictions on resale. The secondary market for loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods, which may cause a Fund to be unable to realize the full value of its investment in the loan, resulting in a material decline in a Fund's net asset value.

Transactions in many loans settle on a delayed basis, and a Fund may not receive the proceeds from the sale of a loan for a substantial period after the sale. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or meet redemption obligations until a substantial period after the sale of the loans.

In a loan participation, a Fund purchases a participating interest in a portion of the rights of a lending institution in a loan. In such case, a Fund will generally be entitled to receive from the lending institution amounts equal to the payments of principal, interest and premium, if any, on the loan received by the institution, but generally will not be entitled to enforce its rights directly against the agent bank or the borrower, and must rely for that purpose on the lending institution.

If a Fund holds a loan through another financial intermediary, as is the case with a participation, or relies on another financial intermediary to administer the loan, as is the case with most multi-lender facilities, the Fund's receipt of principal and interest on the loan and the value of the Fund's loan investment will depend at least in part on the credit standing of the financial intermediary and therefore will be subject to the credit risk of the intermediary. A Fund will be required to rely upon the financial intermediary from which it purchases a participation interest to collect and pass on to the Fund such payments and to enforce the Fund's rights and may not be able to cause the financial intermediary to take what it considers to be appropriate action. As a result, an insolvency, bankruptcy or reorganization of the financial intermediary may delay or prevent a Fund from receiving principal, interest and other amounts with respect to the Fund's interest in the loan. In addition, if a Fund relies on a financial intermediary to administer a loan, the Fund is subject to the risk that the financial intermediary may be unwilling or unable to demand and receive payments from the borrower in respect of the loan, or otherwise unwilling or unable to perform its administrative obligations. A Fund may be subject to heightened or additional risks by investing in mezzanine and other subordinated loans due to increased credit risk. A Fund may be subject to potential liabilities or costs, including liabilities and costs arising under bankruptcy, fraudulent conveyance, equitable subordination, lender liability, environmental, the Foreign Corrupt Practices Act, the Office of Foreign Assets Control and other laws and regulations, and risks and costs associated with debt servicing and taking foreclosure actions associated with the loans.

Investments in loans through a direct loan may involve additional risks to a Fund. For example, if a loan is foreclosed, a Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. In addition, it is conceivable that under emerging legal theories of lender liability, a Fund could be held liable as co-owner. It is unclear whether certain loans and other forms of direct indebtedness offer securities law protections against fraud and misrepresentation.

- **Liquidity Risks (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund, Artisan High Income Fund and Artisan International Explorer Fund*)**—A Fund may invest in securities that trade in lower volumes and may be less liquid than other investments. Additionally, the market for certain investments may become illiquid under actual or perceived adverse market or economic conditions (e.g., if interest rates rise or fall significantly, if there is significant inflation or deflation, or increased selling of debt securities generally across other funds, pools and accounts) independent of any specific adverse changes in the conditions of a particular issuer. In such cases, shares of a Fund, due to limitations on investments in illiquid securities and the difficulty in purchasing and selling such securities or instruments, may decline in value or a Fund may be unable to achieve its desired level of exposure to a certain issuer or sector. When there is no willing buyer and investments cannot be readily sold or closed out, a Fund may have to sell at a lower price than the price at which a Fund is carrying the investments or may not be able to sell the investments at all, each of which would have a negative effect on a Fund's performance. It is possible that a Fund may be unable to sell a portfolio investment at a desirable time or at the value a Fund has placed on the investment or that a Fund may be forced to sell large amounts of securities more quickly than it normally

would in the ordinary course of business. In such a case, the sale proceeds received by a Fund may be substantially less than if a Fund had been able to sell the securities in more-orderly transactions, and the sale price may be substantially lower than the price previously used by a Fund to value the securities for purposes of determining a Fund's net asset value. In addition, if a Fund sells investments with extended settlement times, the settlement proceeds from the sales may not be available to meet a Fund's redemption obligations, or for reinvestment in other securities, for a substantial period of time. The values of illiquid investments are often more volatile than the values of more liquid investments. It may be more difficult for a Fund to determine a fair value of an illiquid investment than that of a more liquid comparable investment.

- **Stressed and Distressed Instruments Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund and Artisan High Income Fund*)—Investments in the securities of financially stressed or distressed issuers involve substantial risks, including the risk that all or a portion of principal will not be repaid. These securities may present a substantial risk of default or may be in default at the time of investment. A Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal or interest on its portfolio holdings. In any reorganization or liquidation proceeding relating to an investment, the Fund may lose its entire investment or may be required to accept cash or securities with a value substantially less than its original investment. Among the risks inherent in investments in a troubled issuer is that it frequently may be difficult to obtain information as to the true financial condition of such issuer. As with any issuer, the team's judgments about the credit quality of a financially stressed or distressed issuer and the relative value of its securities may prove to be wrong.

- **Futures Contracts Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund and Artisan High Income Fund*)—A Fund may buy and sell futures contracts. A futures contract provides for the future sale by one party and purchase by another party of a specified amount of a financial instrument or money at a specified time and price.

A Fund may use futures contracts for hedging, risk management or portfolio management purposes, including to offset changes in the value of securities held or expected to be acquired or be disposed of, to minimize fluctuations in foreign currencies, or to gain exposure to a particular market or instrument.

The market value of a futures contract is equal to the gains or losses on the contract, which are marked to market at least daily. Variation margin payments equal to the amount of mark-to-market gains or losses on futures contracts are made to, or from, the account of the holder each day generally through the clearinghouse. Because of the daily marking to market and payment of variation margin of futures contracts, a position begins each day with "zero" market value.

There are risks associated with futures contracts, including that the success of such an investment strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; there may be an imperfect or no correlation between the changes in market value of the securities held by a Fund and the prices of futures; there may not be a liquid secondary market for a futures contract; trading restrictions or limitations may be imposed by an exchange; and Rule 18f-4 under the 1940 Act and other government regulations may limit trading in futures contracts.

- **Risks of When-Issued and Delayed-Delivery Securities** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund and Artisan High Income Fund*)—The Funds may purchase securities on a when-issued or delayed-delivery basis. When-issued and delayed-delivery purchases involve a risk of loss if the value of the securities declines prior to the settlement date. The risk is in addition to the risk that a Fund's other assets will decline in value. Therefore, these transactions may result in a form of leverage and increase the Fund's overall investment exposure. Typically, no income accrues on securities a Fund has committed to purchase prior to the time delivery of the securities is made.

- **Investment in Exchange-Traded Funds ("ETF") Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Focus Fund and Artisan Global Unconstrained Fund*)—ETFs generally expose their shareholders to the risks associated with the assets in which the ETF invests. Additionally, as exchange-traded investment vehicles, ETFs may involve market risk, management risk and (for index funds) tracking risk. If a Fund acquires shares of an ETF, shareholders bear both their proportionate share of expenses in a Fund (including management and advisory fees) and, indirectly, the expenses of the ETF.

- **Government Securities Risks** (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund and Artisan Global Unconstrained Fund*)—A Fund invests in securities issued or guaranteed by the US Government or its agencies and instrumentalities (such as the Government National Mortgage Association ("Ginnie Mae"), the Federal National Mortgage Association ("Fannie Mae"), or the Federal Home Loan Mortgage Corporation ("Freddie Mac")). Unlike Ginnie Mae securities, securities issued or guaranteed by US Government-related organizations, such as Fannie Mae and Freddie Mac, are not backed by the full faith and credit of the US Government and no assurance can be given that the US Government would provide financial support.

- **Sustainable Investing Risks** (*Artisan Sustainable Emerging Markets Fund*)—When the team considers certain ESG metrics as part of its sustainability assessment and when making investment decisions, there is a risk that the Fund may forgo otherwise attractive investment opportunities and, therefore, may underperform funds that do not consider such ESG metrics or perform such sustainability assessments. For example, the team may decide not to purchase, or underweight its investment in, certain securities when they otherwise would have decided to purchase or make a more significant investment in such securities on account of other investment considerations. It is also possible that the team may decide to purchase, or overweight its investment in, certain securities based on its sustainability assessment when it might be otherwise disadvantageous to do so based on other investment considerations. Data or information from third-party research providers utilized by the team in connection with its sustainability assessments may differ from data or information provided by

other third-party research providers and may be unreliable and/or inaccurate. In addition, there is a risk that the companies that the team identifies as having sustainable growth potential do not operate or perform as expected. There is no guarantee that such companies will achieve their sustainable growth potential.

- **Options Risks (*Artisan Focus Fund*)**—An option is an agreement that, for a premium payment or fee, gives the option holder (the purchaser) the right but not the obligation to buy (in the case of a “call option”) or sell (in the case of a “put option”) the underlying asset (or settle for cash an amount based on an underlying asset, rate, or index) at a specified price during a period of time or on a specified date. Investments in options are considered speculative. When the Fund purchases an option, it may lose the premium paid for it if the price of the underlying security or other assets decreased or remained the same (in the case of a call option) or increased or remained the same (in the case of a put option). Investments in options may also have the effect of creating leverage, in that they may expose the Fund to greater gains and losses than the amount of associated capital invested. Options held by the Fund may be more volatile than other types of assets. If a put or call option purchased by the Fund were to expire without being sold or exercised, its premium paid would represent a loss to the Fund. To the extent that the Fund writes or sells an option, it will be exposed to the risk that it may be required to buy or sell the underlying security at a disadvantageous price on or before the option’s expiration date. The Fund may face substantial losses in connection with any options that it writes. Options are types of derivatives. See “Derivatives Risk.”
- **REIT Risks (*Artisan Focus Fund*)**—Investing in REITs may subject the Fund to certain risks associated with a REIT’s direct investment in real property and real-estate related loans. A REIT that invests in real estate-related loans may be affected by the quality of the credit extended and interest rate risk, is dependent on specialized management skills, is subject to risks inherent in financing a limited number of properties, and may be subject to defaults by borrowers and to self-liquidations. In addition, a REIT may be affected by its failure to qualify for favorable tax treatment under the Code or failure to maintain exemption from registration under the 1940 Act.
- **Repurchase Agreement Risks (*Artisan Global Unconstrained Fund*)**—The Fund may enter into repurchase agreements, which are transactions in which the Fund purchases a security from a bank or recognized securities dealer and simultaneously commits to resell that security to the bank or dealer at an agreed upon price, date and market rate of interest unrelated to the coupon rate or maturity of the purchased security. To the extent that the proceeds from any sale of collateral upon a default in the obligation to repurchase were less than the repurchase price, the Fund would suffer a loss. If the financial institution that is party to the repurchase agreement petitions for bankruptcy or otherwise becomes subject to bankruptcy or other liquidation proceedings, there may be restrictions on the Fund’s ability to sell the collateral and the Fund could suffer a loss. In addition, to the extent that the Fund enters into repurchase agreements, the ability of the Fund to meet its objective may be limited.
- **Short Position Risks (*Artisan Emerging Markets Debt Opportunities Fund, Artisan Focus Fund and Artisan Global Unconstrained Fund*)**—A Fund may borrow an instrument from a broker or other institution and sell it to establish a short position in the instrument. A Fund may also enter into a derivative transaction in order to establish a short position with respect to a reference instrument. A Fund may make a profit or incur a loss depending upon whether the value of the position decreases or increases, respectively, between the date the Fund established the short position and the date on which the Fund must replace the borrowed instrument or otherwise close out the transaction. An increase in the value of an instrument with respect to which a Fund has established a short position will result in a loss to the Fund, and there can be no assurance that a Fund will be able to close out the position at any particular time or at an acceptable price. The potential loss to a Fund from a short position is unlimited.

Short exposure with respect to securities or market segments may also be achieved through the use of derivative instruments, such as forwards, futures or swaps on indices or on individual securities. To the extent a Fund engages in a short sale or short position on a security or other instrument, it may borrow the security or other instrument sold short and deliver it to the counterparty. There is the risk that the counterparty to a short position may fail to honor its contractual terms, causing a loss to a Fund. In addition, the Funds will ordinarily have to pay a fee or premium to borrow the security and will be obligated to repay the lender of the security any dividends or interest that accrue on the security during the period of the loan. Short sales and short positions expose the Funds to the risk that it will be required to cover its short position at a time when the securities underlying the short position or exposure have appreciated in value, thus resulting in a loss to a Fund.

- **Credit Default Swaps Risks (*Artisan Emerging Markets Debt Opportunities Fund and Artisan Global Unconstrained Fund*)**—A credit default swap enables an investor to buy or sell protection against a credit event with respect to an issuer. Credit default swaps may have as reference obligations one or more securities that are not currently held by a Fund. The protection “buyer” may be obligated to pay the protection “seller” an upfront payment or a periodic stream of payments over the term of the contract, provided generally that no credit event on a reference obligation has occurred. When a Fund acts as a buyer of a credit default swap, it may lose its investment and recover nothing should no credit event occur and the swap is held to its termination date. When a Fund acts as a seller of a credit default swap, it must pay a buyer the full notional value of the reference obligation, and the Fund may not be profitable if no secondary market exists or the Fund is otherwise unable to close out these transactions at advantageous time. Although a Fund may seek to realize gains by selling credit default swaps that increase in value, to realize gains on selling credit default swaps, an active secondary market for such instruments must exist or the Fund must otherwise be able to close out these transactions at advantageous times. In addition to the risk of losses described above, if no such secondary market exists or a Fund is otherwise unable to close out these transactions at advantageous times, selling credit default swaps may not be profitable for a Fund.

In addition, the market for credit default swaps has become more volatile as the creditworthiness of certain counterparties has been questioned and/or downgraded. A Fund will also be subject to credit risk with respect to the counterparties to the credit default swap

contract (whether a clearing corporation or another third party). If a counterparty's credit becomes significantly impaired, multiple requests for collateral posting in a short period of time could increase the risk that a Fund may not receive adequate collateral. A Fund may exit its obligations under a credit default swap only by terminating the contract and paying applicable breakage fees, or by entering into an offsetting credit default swap position, which may cause the Fund to incur more losses. Credit default swaps involve special risks because they are difficult to value, are highly susceptible to liquidity and credit risk, and generally pay a return to the party that has paid the premium only in the event of an actual default by the issuer of the underlying obligation (as opposed to a credit downgrade or other indication of financial difficulty).

- **Foreign Sovereign Debt Risks (*Artisan Emerging Markets Debt Opportunities Fund and Artisan Global Unconstrained Fund*)**—Each Fund may invest in sovereign debt securities, which are issued or guaranteed by foreign governmental entities. Investment in sovereign debt can involve a high degree of risk. The governmental entity that controls the repayment of sovereign debt may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt. A governmental entity's willingness or ability to repay principal and interest due in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the governmental entity's policy towards the International Monetary Fund, and the political constraints to which a governmental entity may be subject. Governmental entities may also be dependent on expected disbursements from foreign governments, multilateral agencies and others abroad to reduce principal and interest arrearages on their debt. The commitment on the part of these governments, agencies and others to make such disbursements may be conditioned on a governmental entity's implementation of economic reforms and/or economic performance and the timely service of such debtor's obligations. Failure to implement such reforms, achieve such levels of economic performance or repay principal or interest when due may result in the cancellation of such third parties' commitments to lend funds to the governmental entity, which may further impair such debtor's ability or willingness to service its debts in a timely manner. Consequently, governmental entities may default on their sovereign debt. Holders of sovereign debt may be requested to participate in the rescheduling of such debt and to extend further loans to governmental entities. There is no bankruptcy proceeding by which sovereign debt on which governmental entities have defaulted may be collected in whole or in part.
- **Mortgage-Related and Other Asset-Backed Instruments Risks (*Artisan Emerging Markets Debt Opportunities Fund and Artisan Global Unconstrained Fund*)**—Mortgage-related and other asset-backed instruments directly or indirectly represent a participation in, or are secured by and payable from, loans on real property. Mortgage-related securities are created from pools of residential or commercial mortgage loans, including mortgage loans made by savings and loan institutions, mortgage bankers, commercial banks and others. These securities typically provide a monthly payment which consists of both principal and interest. In times of declining interest rates, there is a greater likelihood that a Fund's higher yielding securities will be pre-paid with the Fund being unable to reinvest the proceeds in an investment with as great a yield. The rate of prepayments on underlying mortgages will affect the price and volatility of a mortgage-related security, and may have the effect of shortening or extending the effective duration of the security relative to what was anticipated at the time of purchase. Interest-only and principal-only securities are especially sensitive to interest rate changes, which can affect not only their prices but can also change the income flows and repayment assumptions about those investments. Pools created and guaranteed by non-governmental issuers, including government-sponsored corporations, may be supported by various forms of insurance or guarantees, but there can be no assurance that private insurers or guarantors can meet their obligations under the insurance policies or guarantee arrangements.

Many of the risks of investing in mortgage-related securities secured by commercial mortgage loans ("CMBS") reflect the effects of local and other economic conditions on real estate markets, the ability of tenants to make lease payments, and the ability of a property to attract and retain tenants. These securities may be less liquid and may exhibit greater price volatility than other types of mortgage-related or other asset-backed securities. The Funds may invest in any level of the capital structure of an issuer of mortgage backed or asset-backed securities, including the equity or "first loss" tranche.

Organization, Management and Management Fees

Organization. Each Fund is a series of Artisan Partners Funds, Inc. ("Artisan Partners Funds"). Each Fund consists of three classes of shares: Investor Shares, Advisor Shares and Institutional Shares. Artisan International Explorer Fund's Investor Shares are not being offered at this time.

Management. Each Fund is managed by Artisan Partners, which selects the Fund's investments and handles its business affairs under the direction of Artisan Partners Funds' board of directors. Artisan Partners is a limited partnership organized under the laws of Delaware. Artisan Partners provides investment management services to, among others, pension and profit sharing plans, trusts, endowments, foundations, charitable organizations, governmental entities and investment companies and similar pooled investment vehicles, and also provides administrative services to each series of Artisan Partners Funds. Artisan Partners is managed by its general partner, Artisan Investments GP LLC, a Delaware limited liability company wholly-owned by Artisan Partners Holdings LP ("Artisan Partners Holdings"). Artisan Partners Holdings is a limited partnership organized under the laws of Delaware whose sole general partner is Artisan Partners Asset Management Inc., a publicly traded Delaware corporation. Artisan Partners was founded in March 2009 and succeeded to the investment management business of Artisan Partners Holdings during 2009. Artisan Partners Holdings was founded in December 1994 and began providing investment management services in March 1995. Artisan Partners' principal address is 875 East Wisconsin Avenue, Suite 800, Milwaukee, Wisconsin 53202.

Portfolio Managers

The portfolio managers of each Fund are identified below. Each portfolio manager is responsible for management of the designated Fund as well as other Artisan Partners client portfolios. Each Fund is managed by a portfolio manager or team of portfolio managers. Each portfolio manager or team of portfolio managers, as applicable, develops investment strategies for the Fund in order to achieve the Fund's investment objective and is supported by the managing director, as applicable, and a staff of research analysts and traders. The portfolio managers of each Fund are primarily responsible, jointly when the Fund is managed by a team of portfolio managers, for overall management of the Fund, including making buy and sell decisions for the Fund (except as otherwise noted in the table below).

The Statement of Additional Information ("SAI") provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of Fund shares.

¹ Mr. Kamm will step down as Portfolio Manager of the Funds effective 31 December 2026. Mr. Kamm will remain an active member of the Artisan Partners Growth Team in an advisory capacity as a Managing Director.

² Mr. Herrick does not have direct management responsibilities or final decision-making authority with respect to the applicable Fund's investments.

Michael A. Ciriame, CFA—Mr. Ciriame is a Managing Director of Artisan Partners. He joined Artisan Partners in September 2021 and has been Portfolio Manager of Artisan Global Unconstrained Fund and Artisan Emerging Markets Debt Opportunities Fund since their inception in March 2022 and April 2022, respectively. Prior to joining Artisan Partners, Mr. Ciriame was a portfolio manager for Eaton Vance Management from August 2010 until September 2021. Mr. Ciriame holds a B.S. degree in Economics from University of Mary Washington and M.B.A. from University of Rochester, William E. Simon Graduate School of Business Administration.

James D. Hamel, CFA—Mr. Hamel is a Managing Director of Artisan Partners. He joined Artisan Partners in May 1997 as an analyst working on Artisan Mid Cap Fund. Prior to becoming Portfolio Manager of Artisan Mid Cap Fund in July 2006, Mr. Hamel had been Associate Portfolio Manager of Artisan Mid Cap Fund since October 2001. Prior to becoming Co-Lead Portfolio Manager of Artisan Global Opportunities Fund in February 2026, Mr. Hamel had been Lead Portfolio Manager of the Fund since September 2013 and he served as Portfolio Manager of the Fund since its inception in September 2008. He also has been Portfolio Manager of Artisan Small Cap Fund since October 2009. He has been Portfolio Manager of Artisan Global Discovery Fund since its inception in August 2017. Mr. Hamel holds a B.S. in Finance from the University of Minnesota – Minneapolis.

Charles-Henri Hamker—Mr. Hamker is a Managing Director of Artisan Partners. He joined Artisan Partners in August 2000 as an analyst working with Mr. Yockey on Artisan International Fund. He has been Associate Portfolio Manager of Artisan International Fund since February 2012 and Portfolio Manager of Artisan Global Equity Fund since January 2013. Mr. Hamker holds a B.A. with a specialization in Finance and Economics from The European Business School in Paris.

Benjamin L. Herrick, CFA—Mr. Herrick joined Artisan Partners in December 2015 as an analyst working with Mr. Samra on the International Value team and became an Associate Portfolio Manager in July 2022. Mr. Herrick holds a bachelor's degree in economics from Claremont McKenna College and a master's degree in business administration from the UCLA Anderson School of Management.

Matthew H. Kamm, CFA—Mr. Kamm is a Managing Director of Artisan Partners. He joined Artisan Partners in May 2003 as an analyst working on Artisan Mid Cap Fund. Prior to becoming Co-Lead Portfolio Manager of Artisan Mid Cap Fund in January 2025, Mr. Kamm had been Lead Portfolio Manager of the Fund since September 2013, Portfolio Manager of the Fund since September 2012 and Associate Portfolio Manager of the Fund since January 2010. In addition, prior to becoming Portfolio Manager of Artisan Global Opportunities Fund and Artisan Small Cap Fund in September 2013, Mr. Kamm had been Associate Portfolio Manager of Artisan Global Opportunities Fund and Artisan Small Cap Fund since January 2010. He has been Portfolio Manager of Artisan Global Discovery Fund since its inception in August 2017. Mr. Kamm will step down as Portfolio Manager of the Funds effective 31 December 2026. Mr. Kamm will remain an active member of the Artisan Partners Growth Team in an advisory capacity as a Managing Director. Mr. Kamm holds a B.A. in Public Policy from Duke University and an M.B.A. in Finance and Operations Management from New York University.

Rezo Kanovich—Mr. Kanovich is a Managing Director of Artisan Partners. He joined Artisan Partners in October 2018 and has managed Artisan International Small-Mid Fund since that time. Prior to joining Artisan Partners in October 2018, Mr. Kanovich was a portfolio manager for OppenheimerFunds, where he managed the International Small-Mid Cap strategy from January 2012 to September 2018. Before that, Mr. Kanovich worked as an analyst with Boston Biomedical Consultants, as an investment banker with the Lehman Brothers mergers & acquisitions team and as a consultant at PricewaterhouseCoopers. Mr. Kanovich holds a bachelor's degree and a master's degree in international economics and finance from Brandeis University and a master's degree in business administration, dual concentration in finance and health care systems, from the Wharton School, University of Pennsylvania.

Lewis S. Kaufman, CFA—Mr. Kaufman is a Managing Director of Artisan Partners and portfolio manager of Artisan Developing World Fund since its inception in June 2015. Prior to joining Artisan Partners, Mr. Kaufman was a managing director and portfolio manager for Thornburg Investment Management, where he managed the developing world strategy from its inception in 2009 through January 2015. Mr. Kaufman also co-managed the international ADR strategy from 2007 to 2013, after joining Thornburg in 2005 as an associate portfolio manager. Mr. Kaufman graduated cum laude with a bachelor's degree in English from Colgate University and holds a master's degree in Business Administration from Duke University's Fuqua School of Business.

Bryan C. Krug, CFA—Mr. Krug is a Managing Director of Artisan Partners. He joined Artisan Partners in December 2013 and has managed Artisan High Income Fund since its inception in March 2014 and Artisan Floating Rate Fund since its inception in December 2021. Prior to joining Artisan Partners in 2013, Mr. Krug was the portfolio manager of Ivy High Income Fund at Waddell & Reed Investment Management Company from February 2006 to November 2013. He holds a B.S. degree in Finance from Miami University, Richard T. Farmer School of Business.

Ian P. McGonigle, CFA—Mr. McGonigle is a Managing Director of Artisan Partners. He joined Artisan Partners in June 2009 as an analyst for the International Value team. Prior to becoming Portfolio Manager of Artisan International Value Fund in February 2026, Mr. McGonigle was a Co-Portfolio Manager of Artisan International Value Fund from October 2018 until January 2026 and an Associate Portfolio Manager of Artisan Global Value Fund and Artisan International Value Fund from November 2015 until September 2018. Mr. McGonigle holds a bachelor's degree in Business from Franklin & Marshall College.

Michael J. McKinnon, CFA—Mr. McKinnon is a Managing Director of Artisan Partners. He joined Artisan Partners in February 2010 as an analyst working with Messrs. O'Keefe and Samra. He has been Portfolio Manager of Artisan Global Value Fund since October 2018 and Artisan Select Equity Fund since its inception in February 2020. Mr. McKinnon was an Associate Portfolio Manager of Artisan Global Value Fund and Artisan International Value Fund from January 2017 until September 2018. Mr. McKinnon holds a bachelor's degree in economics and Asian studies from Tufts University, a master's degree in public administration from Harvard Kennedy School and a master's degree in business administration from Columbia Business School.

Maria Negrete-Gruson, CFA—Ms. Negrete-Gruson is a Managing Director of Artisan Partners. She joined Artisan Partners in April 2006 and has managed Artisan Sustainable Emerging Markets Fund since its inception in June 2006. Prior to joining Artisan Partners in 2006, Ms. Negrete-Gruson was the portfolio manager for DuPont Capital Management's emerging markets equity portfolios for more than five years. She holds a B.A. degree from Universidad Externado de Colombia and an M.B.A. degree from Columbia Business School.

Daniel J. O'Keefe—Mr. O'Keefe is a Managing Director of Artisan Partners. He joined Artisan Partners in May 2002 as an analyst working with Mr. Samra on Artisan International Value Fund. He has been the Lead Portfolio Manager of Artisan Global Value Fund since its inception in December 2007 and Artisan Select Equity Fund since its inception in February 2020. He was Portfolio Manager of Artisan International Value Fund from October 2006 until September 2018. Mr. O'Keefe holds a B.A. from Northwestern University.

Sarah C. Orvin, CFA—Ms. Orvin is a Managing Director of Artisan Partners. She joined Artisan Partners in September 2021 and has been a Portfolio Manager of Artisan Global Unconstrained Fund and Artisan Emerging Markets Debt Opportunities Fund since their inception in March 2022 and April 2022, respectively. Prior to joining Artisan Partners, Ms. Orvin was a portfolio manager at Eaton Vance Management from December 2016 until September 2021. Ms. Orvin holds a B.A. degree in Political Science and History from Boston College.

N. David Samra—Mr. Samra is a Managing Director of Artisan Partners. He joined Artisan Partners in May 2002 and has been the Portfolio Manager of Artisan International Value Fund since its inception in 2002 and was Portfolio Manager of Artisan Global Value Fund from its inception in 2007 until September 2018. Mr. Samra is also Managing Director of the International Explorer investment strategy. Mr. Samra holds a B.S. degree from Bentley College and an M.B.A. from Columbia Business School.

Christopher P. Smith—Mr. Smith is a Managing Director of Artisan Partners. He joined Artisan Partners in October 2016 as the founding portfolio manager of the Antero Peak Group and has been portfolio manager of Artisan Focus Fund since its inception in April 2017. Mr. Smith holds a bachelor's degree in finance from the Wharton School at the University of Pennsylvania (summa cum laude).

Anand Vasagiri—Mr. Vasagiri is a Co-Portfolio Manager of Artisan International Explorer Fund since its inception in May 2022. Prior to returning to Artisan Partners in September 2020, Mr. Vasagiri was co-head and portfolio manager for the Paradise Global Small Cap Strategy from 2010 to 2019. Before that, Mr. Vasagiri was an analyst for the Artisan International Value Fund and Artisan Global Value Fund from 2007 to 2010. Mr. Vasagiri holds a Bachelor of Engineering in Mechanical Engineering from M.N. National Institute of Technology, India, an MIM from the Thunderbird School of Global Management (ASU) and an MBA from The University of Chicago Booth School of Business.

Jay C. Warner, CFA—Mr. Warner is a Managing Director of Artisan Partners. He joined Artisan Partners in May 2003 as an analyst working on the Growth team and became an Associate Portfolio Manager in February 2019. He became Lead Portfolio Manager of Artisan Small Cap Fund in January 2025 after being Co-Lead Portfolio Manager of the Fund since July 2023, and prior thereto, he was Portfolio Manager of the Fund since January 2022. He has also been Portfolio Manager of Artisan Global Discovery Fund, Artisan Global Opportunities Fund and Artisan Mid Cap Fund since January 2022. Mr. Warner holds a bachelor's degree in accounting and a master's degree in finance, investment and banking from the University of Wisconsin-Madison. Mr. Warner was a Certified Public Accountant.

Jason L. White, CFA—Mr. White is a Managing Director of Artisan Partners. He joined Artisan Partners in June 2000 as an analyst working on Artisan Mid Cap Fund. Prior to becoming Co-Lead Portfolio Manager of Artisan Mid Cap Fund in January 2025, Mr. White had been Portfolio Manager of the Fund since January 2025 and Associate Portfolio Manager of the Fund since January 2011. In addition, prior to becoming Portfolio Manager of Artisan Global Opportunities Fund and Artisan Small Cap Fund in January 2016, he had been Associate Portfolio Manager of Artisan Global Opportunities Fund and Artisan Small Cap Fund since January 2011. He has been Lead Portfolio Manager of Artisan Global Discovery Fund since its inception in August 2017. Mr. White holds a B.S. in History from the United States Naval Academy.

Angela S. Wu—Ms. Wu is a Managing Director of Artisan Partners. She joined Artisan Partners in October 2022 as an analyst working with the Growth team and became Associate Portfolio Manager in February 2025. She became Co-Lead Portfolio Manager of Artisan Global Opportunities Fund in February 2026. She has also been Portfolio Manager of Artisan Mid Cap Fund, Artisan Global Discovery Fund and Artisan Small Cap Fund since February 2026. Prior to joining Artisan Partners, she was head of corporate strategy with Snap Inc. (Snapchat) from May 2017 until October 2022. Ms. Wu holds a bachelor's degree in economics and history from Yale University.

Seth B. Yeager, CFA—Mr. Yeager joined Artisan Partners in May 2018 as a credit analyst working with Mr. Krug and has managed Artisan Floating Rate Fund since its inception in December 2021. Prior to joining Artisan Partners in 2018, Mr. Yeager was a high yield credit analyst at UBS Asset Management supporting multiple portfolios in the US and Europe from March 2015 to May 2018. Previously, Mr. Yeager worked at Jefferies in high yield research. He holds a bachelor's degree in information systems from Michigan State University and a master's degree in business administration from Oakland University.

Mark L. Yockey, CFA—Mr. Yockey is a Managing Director of Artisan Partners. He joined Artisan Partners in December 1995 and has been Portfolio Manager of Artisan International Fund since its inception in December 1995 and Artisan Global Equity Fund since its inception in March 2010. Mr. Yockey holds B.A. and M.B.A. degrees from Michigan State University.

Beini Zhou, CFA—Mr. Zhou is a Co-Portfolio Manager of Artisan International Explorer Fund since its inception in May 2022. Prior to returning to Artisan Partners in September 2020, Mr. Zhou was a portfolio manager at Matthews Asia where he managed the Emerging Markets Equity and Asia Value Strategies and co-managed the Asia Small Companies Strategy. Before that, Mr. Zhou was an analyst for the Artisan International Value Fund and Artisan Global Value Fund from 2005 to 2012. Mr. Zhou holds a BA in Applied Mathematics from Harvard College and a MS in Computer Science from University of California-Berkeley.

Management Fees

Each Fund pays a management fee to Artisan Partners for serving as its investment adviser and providing administrative services. The annual fee is determined as a percentage of average daily net assets and is accrued daily and paid monthly. For the fiscal year ended 30 September 2025, the management fees paid by the Funds were at the following effective annual rates as a percentage of average daily net assets:

Artisan Developing World Fund	1.02%
Artisan Emerging Markets Debt Opportunities Fund	0.75%
Artisan Floating Rate Fund	0.68%
Artisan Focus Fund	1.00%
Artisan Global Discovery Fund	0.97%
Artisan Global Equity Fund	0.90%
Artisan Global Opportunities Fund	0.89%
Artisan Global Unconstrained Fund	0.95%
Artisan Global Value Fund	0.98%
Artisan High Income Fund	0.67%
Artisan International Fund	0.94%
Artisan International Explorer Fund	1.05%
Artisan International Small-Mid Fund	1.03%
Artisan International Value Fund	0.93%
Artisan Mid Cap Fund	0.94%
Artisan Select Equity Fund	0.55%
Artisan Small Cap Fund	0.97%
Artisan Sustainable Emerging Markets Fund	0.85%

Artisan Partners has contractually agreed to bear certain expenses and waive its management fees to the extent necessary to cause total annual fund operating expenses (excluding taxes, interest, all commissions and other normal charges incident to the purchase and sale of portfolio securities, acquired fund fees and expenses, borrowing costs such as dividends or interest on securities sold short, and extraordinary

charges such as litigation costs, but including management fees paid to Artisan Partners) not to exceed the percentages of average daily net assets indicated below. This contract continues through 31 January 2027.

Fund	Expense Limit as a % of Average Daily Net Assets
Artisan Emerging Markets Debt Opportunities Fund – Investor Shares	1.25%
Artisan Emerging Markets Debt Opportunities Fund – Advisor Shares	1.15%
Artisan Emerging Markets Debt Opportunities Fund – Institutional Shares	1.10%
Artisan Floating Rate Fund – Investor Shares ¹	1.05%
Artisan Floating Rate Fund – Advisor Shares ¹	0.95%
Artisan Floating Rate Fund – Institutional Shares ¹	0.90%
Artisan Focus Fund – Investor Shares	1.50%
Artisan Global Discovery Fund – Investor Shares	1.40%
Artisan Global Discovery Fund – Advisor Shares	1.30%
Artisan Global Discovery Fund – Institutional Shares	1.25%
Artisan Global Equity Fund – Investor Shares	1.35%
Artisan Global Equity Fund – Advisor Shares	1.25%
Artisan Global Equity Fund – Institutional Shares	1.20%
Artisan Global Unconstrained Fund – Investor Shares	1.24%
Artisan Global Unconstrained Fund – Advisor Shares	1.14%
Artisan Global Unconstrained Fund – Institutional Shares	1.09%
Artisan International Explorer Fund – Advisor Shares	1.40%
Artisan International Explorer Fund – Institutional Shares	1.35%
Artisan Select Equity Fund – Investor Shares ²	0.75%
Artisan Select Equity Fund – Advisor Shares ²	0.65%
Artisan Select Equity Fund – Institutional Shares ²	0.60%
Artisan Sustainable Emerging Markets Fund – Investor Shares	1.15%
Artisan Sustainable Emerging Markets Fund – Advisor Shares	1.05%
Artisan Sustainable Emerging Markets Fund – Institutional Shares	1.00%

¹ Effective as of 1 December 2025. Prior to 1 December 2025, the expense limit, as a percentage of average daily net assets, was 1.20%, 1.10% and 1.05% for Investor Shares, Advisor Shares and Institutional Shares, respectively.

² Effective as of 1 September 2026. Prior to 1 September 2026, the expense limit, as a percentage of average daily net assets, was 1.25%, 1.15% and 1.10% for Investor Shares, Advisor Shares and Institutional Shares, respectively.

The management fee and other expenses related to a Fund's operations are reflected in its net asset value.

A discussion regarding the basis for the approval by the board of directors of the investment advisory contract for each Fund is available in Artisan Partners Funds' Form N-CSR for the fiscal year ended 30 September 2025.

Additional Information

Artisan Partners Funds enters into contractual arrangements with various parties, including, among others, the Funds' investment adviser, distributor, custodian, transfer agent and financial intermediaries, who provide services to the Funds. Shareholders are not parties to, or intended (or "third-party") beneficiaries of, those contractual arrangements. The contractual arrangements are not intended to create in any individual shareholder or group of shareholders any right to enforce them against the service providers or to seek any remedy under the arrangement against the service providers, either directly or on behalf of a Fund.

This prospectus provides information concerning Artisan Partners Funds and the Funds that you should consider in determining whether to purchase shares of a Fund. None of this prospectus, the SAI or any contract that is an exhibit to Artisan Partners Funds' registration statement, is intended to, nor does it, give rise to an agreement or contract between Artisan Partners Funds or the Funds and any investor, or give rise to any contract or other rights in any individual shareholder, group of shareholders or other person other than any rights conferred explicitly by federal or state securities laws that may not be waived.

Investing with Artisan Partners Funds

Share Price

Each Fund is open for business every day the New York Stock Exchange (NYSE) is open for regular session trading. Shares are not priced on days when the NYSE is closed. Each Fund buys and sells its shares each day the NYSE is open, at the net asset value per share ("NAV") next calculated after a purchase or redemption order is received and accepted by the Fund or its authorized agent.

The NAV of each class of shares of each Fund is determined by dividing the value of each Fund's securities and other assets attributable to that class, less its liabilities attributable to that class, by the number of outstanding shares of that class of the Fund. For purposes of calculating the NAV, securities transactions and shareholder transactions are accounted for no later than one business day after the trade date. The NAV is normally computed as of the NYSE regular session closing time – usually 4:00 p.m. Eastern Time on each day the NYSE is open for regular session trading.

In determining a Fund's NAV, each equity security and ETF traded on a securities exchange and over-the-counter securities are valued at the closing price on the exchange or market designated by the Funds' accounting agent or pricing vendor as the principal exchange (each, a "principal exchange"). The closing price provided by the pricing vendor for an exchange may differ from the price quoted elsewhere and may represent information such as last sales price, an official closing price, a closing auction price or other information, depending on exchange or market convention. Absent closing price information for an equity security from the principal exchange as of the date of valuation, the security is valued using (i) the closing price on another exchange or over-the-counter on which the security is traded (if such price is made available by a pricing vendor) or (ii) the most recent bid quotation on the principal exchange, or, if such bid is not available, from a secondary exchange or in the over-the-counter market. Equity-linked securities, such as participation certificates, participation notes or access notes, are valued by referencing the underlying security. Repurchase and reverse repurchase agreements are valued at cost plus accrued interest. Exchange traded option contracts are valued at the mid-price (average of the bid price and ask price) as provided by the pricing vendor at the close of trading on the contract's principal exchange. Exchange traded futures contracts and exchange-traded options on futures are valued at the settlement price as provided by the pricing vendor at the close of trading on the principal exchange. Other derivatives (including total return swaps, over-the-counter options on total return swaps, and certain other derivatives) are valued using prices provided by the Funds' pricing vendors. Prices obtained from independent pricing services may use various observable and unobservable inputs, including, but not limited to, information provided by broker-dealers, pricing formulas, estimates of market values obtained from data relating to investments or securities with similar characteristics and/or discounted cash flow or spread curve models that might be applicable. Shares of open-end registered investment companies are valued at the latest NAV reported by the investment company.

Fixed income instruments, including loan participation notes, for which evaluated prices from the Funds' pricing vendors are available shall be fair valued using such vendor prices.

Artisan Partners has been designated by Artisan Partners Funds' board of directors as the valuation designee for the Funds pursuant to Rule 2a-5 under the 1940 Act. In its capacity as valuation designee, Artisan Partners, among other things, is responsible for establishing fair valuation methodologies and determining, in good faith, the fair value of all of the assets of the Funds for which there are no readily available market quotations. Securities or other assets for which market quotations are not readily available are valued by Artisan Partners, as valuation designee, in accordance with Artisan Partners' Procedures for Valuation of Portfolio Securities Held by Artisan Partners Funds, Inc. and under the general oversight of Artisan Partners Funds' board of directors. A market quotation will be considered not readily available, and a Fund may therefore use fair value pricing, if there are not quoted prices (unadjusted) in active markets for identical investments that a Fund can access at the measurement date, and/or any such quotation is not reliable.

When fair value pricing is employed, the value of a security or asset used by a Fund to calculate its NAV may differ from quoted or published prices for the same security or asset. Estimates of fair value utilized by the Funds as described above could differ from the value realized on the sale of those securities or assets in the future and the differences may be material to the NAV of the applicable Fund. Values of foreign securities are translated from local currencies into US dollars using current exchange rates.

Each Fund has the ability to invest in securities that are principally traded in markets outside the US. The foreign markets in which the Funds may invest are sometimes open on days when the NYSE is not open and the Funds do not calculate their NAVs, and sometimes are not open on days when the Funds do calculate their NAVs. Even on days on which both the foreign market and the NYSE are open, several hours may pass between the time when trading in the foreign market closes and the time as of which the Funds calculate their NAVs. That is generally the case for markets in Europe, the Middle East, Asia, Australia and other Far Eastern markets. The regular closing time of foreign markets in North and South America is generally the same as the closing time of the NYSE and the time as of which the Funds calculate their NAVs. So, the value of a Fund's portfolio may be affected on days when the Fund does not calculate its NAV and you cannot purchase or redeem Fund shares.

Each Fund relies on various service providers and data sources to calculate its NAV. The ability of each Fund to calculate its NAV per share is subject to operational risks associated with processing or human errors, systems or technology failures, cyber-attacks and errors caused by third party service providers, data sources, or trading counterparties. Such failures may result in delays in the calculation of a Fund's NAV and/or the inability to calculate NAV over extended time periods and may make it necessary for the Funds to use alternative procedures to determine a Fund's NAV. The Funds may be unable to recover any losses associated with such failures.

Who Can Invest in Artisan Partners Funds?

In general, to invest in the Funds, you should be an adult US citizen or resident or a US entity with a US tax identification (social security or employer identification) number. You or the person authorized to place transactions on your behalf may not place transactions in your account for the benefit of any person other than yourself (except for a transfer of shares to another account). If the Funds determine that the registered owner of an account has permitted another person or entity who is not the registered or beneficial owner of the account to hold shares through that account, the Funds may reject future purchases in that account and any related accounts.

As of the date of this prospectus, shares of the Funds are qualified for sale in the US and its territories and possessions. Residents of Guam may purchase shares of the Funds only through approved financial intermediaries, and only to the extent that financial intermediary is otherwise eligible to sell mutual fund shares in Guam. The Funds sell shares to investors residing outside the US only in limited circumstances. Any sale to an investor residing outside of the US requires prior approval of the Funds. Some of the Funds are closed to most new investors. To find out if you're eligible to invest in a closed Fund, see "– Who is Eligible to Invest in a Closed Fund?"

Financial intermediaries must contact the Funds for approval before opening an omnibus account.

Who is Eligible to Invest in a Closed Fund?

Artisan High Income Fund and Artisan International Value Fund are closed to most new investors. From time to time, other Funds may also be closed to most new investors. The Funds do not permit investors to pool their investments in order to meet the eligibility requirements, except as otherwise noted below.

If you have been a shareholder in a Fund continuously since it closed, you may make additional investments in that Fund and reinvest your dividends and capital gain distributions in that Fund, even though the Fund has closed, unless Artisan Partners considers such additional purchases to not be in the best interests of the Fund and its other shareholders. An employee benefit plan that is a Fund shareholder may continue to buy shares in the ordinary course of the plan's operations, even for new plan participants.

You may open a new account in a closed Fund only if that account meets the Fund's other criteria (for example, minimum initial investment) and:

- you beneficially own shares of the closed Fund at the time of your application;
- you beneficially own shares in the Funds with combined balances of \$250,000 and with respect to Artisan International Value Fund only, the Funds or Artisan Partners Distributors LLC has notified you, in writing, that you may invest in the Fund;
- you receive shares of the closed Fund as a gift from an existing shareholder of the Fund (additional investments generally are not permitted unless you are otherwise eligible to open an account under one of the other criteria listed);
- you are transferring or "rolling over" into a Fund IRA account from an employee benefit plan through which you held shares of the Fund (if your plan doesn't qualify for rollovers you may still open a new account with all or part of the proceeds of a distribution from the plan);
- you are purchasing Fund shares through a sponsored fee-based program and shares of the Fund are made available to that program pursuant to an agreement with the Funds or Artisan Partners Distributors LLC and the Funds or Artisan Partners Distributors LLC has notified the sponsor of that program in writing that shares may be offered through such program and has not withdrawn that notification;
- you are an employee benefit plan and the Funds or Artisan Partners Distributors LLC has notified the plan in writing that the plan may invest in the Fund and has not withdrawn that notification;
- you are an employee benefit plan or other type of corporate, charitable or governmental account sponsored by or affiliated with an organization that also sponsors or is affiliated with (or is related to an organization that sponsors or is affiliated with) another employee benefit plan or corporate, charitable or governmental account that is a shareholder of the Fund at the time of application;
- you are a client, employee or associate of an institutional consultant or financial intermediary and the Funds or Artisan Partners Distributors LLC has notified that consultant or financial intermediary in writing that you may invest in the Fund and has not withdrawn that notification;
- you are a client of a financial advisor or a financial planner, or an affiliate of a financial advisor or financial planner, who has at least:
 - \$2,500,000 of client assets invested with the closed Fund at the time of your application; or
 - \$5,000,000 of client assets invested with the Funds or under Artisan Partners' management at the time of your application and, with respect to Artisan International Value Fund only, the Funds or Artisan Partners Distributors LLC has notified such financial advisor or financial planner, or affiliate of such financial advisor or financial planner, in writing, that that you may invest in the Fund and has not withdrawn that notification;
- you are an institutional investor that is investing at least \$5,000,000 in the Fund and the Fund or Artisan Partners Distributors LLC has notified you in writing that you may invest in the Fund and has not withdrawn that notification (available for investments in Artisan International Value Fund only);
- you are a client of Artisan Partners or are an investor in a product managed by Artisan Partners, or you have an existing business relationship with Artisan Partners, and in the judgment of Artisan Partners, your investment in a closed Fund would not adversely affect Artisan Partners' ability to manage the Fund effectively; or
- you are a director or officer of the Funds, or a partner or employee of Artisan Partners or its affiliates, or a member of the immediate family of any of those persons.

A Fund may ask you to verify that you meet one of the guidelines above prior to permitting you to open a new account in a closed Fund. A Fund may permit you to open a new account if the Fund reasonably believes that you are eligible. A Fund also may decline to permit you to open a new account if the Fund believes that doing so would be in the best interests of the Fund and its shareholders, even if you would be eligible to open a new account under these guidelines.

The Funds’ ability to impose the guidelines above with respect to accounts held by financial intermediaries may vary depending on the systems capabilities of those intermediaries, applicable contractual and legal restrictions and cooperation of those intermediaries.

Call us at 800.344.1770 if you have questions about your ability to invest in a closed Fund.

Minimum Investments

Minimum Investments	Investor	Advisor	Institutional
To open an account	\$1,000	\$250,000	\$1,000,000
To add to an account	No minimum	No minimum	No minimum

A Fund will waive the initial minimum investment of \$1,000 for Investor Shares if you invest through the Automatic Investment Plan. See “Buying Shares – Automatic Investment Plan (AIP).”

A Fund will waive its minimum investment requirements on (1) certain employee benefit plans that hold their shares through plan-level or omnibus accounts on behalf of participants; or (2) investors who purchase shares through financial intermediaries where (i) the intermediary has entered into an agreement with Artisan Partners Funds or Artisan Partners Distributors LLC and (ii) the intermediary holds shares through an omnibus account, although the intermediary maintaining such an account may impose its own minimum investment requirements (see “Other Information – Financial Intermediaries.”).

A Fund may, at its discretion, accept a smaller initial investment or waive the minimum initial investment requirement for investment if:

- you are already a shareholder (in your name or as beneficial owner of shares held in someone else’s name) (for example, a nominee or a custodian holding shares for the benefit of an investor would not be eligible to open a new account for its own benefit or for the benefit of another customer, but the investor would be eligible to open a new account) of Advisor Shares or Institutional Shares of that Fund;
- you, together with any affiliated organizations or related persons, will hold two or more accounts in your own or the affiliated organization’s or related person’s name or as beneficial owner of shares held in someone else’s name of Advisor Shares or Institutional Shares of that Fund and such accounts, in the aggregate, exceed the minimum initial investment requirement for that Fund; or
- Artisan Partners determines that your investment would not have a material adverse impact on the Fund.

Minimum Balances

INVESTOR SHARES

If you purchase Investor Shares directly from the Funds, the Funds reserve the right to close your account and redeem your shares if the value of your account falls below \$1,000. However, before closing a small account, the Funds will notify you and give you at least 30 days to bring your account’s value up to the minimum.

The Funds will waive the \$1,000 minimum balance requirement if an account value has declined below \$1,000 due solely to investment performance.

If you discontinue an AIP before your account reaches \$1,000, that account also may be closed and the Funds may redeem your shares.

If you participate in systematic withdrawal and your account has insufficient funds to meet a withdrawal, the amount remaining will be completely redeemed.

In addition, each Fund may convert your Investor Shares of any account held directly with such Fund to that Fund’s Advisor Shares or Institutional Shares, upon periodic review of the account’s share balances. The Funds will generally notify you in writing before any such conversion to another class. Artisan Partners does not expect such conversion between classes of shares of the same Fund to result in recognition of gain or loss for US federal income tax purposes, provided that the transaction is undertaken and processed as a conversion transaction.

ADVISOR SHARES

If you purchase Advisor Shares directly from the Funds, the Funds reserve the right to automatically convert Advisor Shares in your account to Investor Shares, or to close your account and redeem your shares, if the value of your account falls below \$250,000, unless the reduction in value is due solely to investment performance. The Funds will notify you and allow you at least 30 days to bring your account’s value up to the applicable minimum before converting your shares to Investor Shares or closing your account and redeeming your shares.

In addition, each Fund may convert your Advisor Shares of any account held directly with such Fund to that Fund’s Institutional Shares, upon periodic review of the account’s share balances. The Funds will generally notify you in writing before any such conversion to Institutional Shares. Artisan Partners does not expect such conversion between classes of shares of the same Fund to result in recognition of gain or loss for US federal income tax purposes, provided that the transaction is undertaken and processed as a conversion transaction. If your shares are

converted, the conversion will have no effect on the value of your investment in Advisor Shares of the Fund at the time of conversion. However, the number of shares you own after the conversion may be greater or lower than the number of shares you owned before the conversion, depending on the net asset value of the respective share classes.

INSTITUTIONAL SHARES

If you purchase Institutional Shares directly from the Funds, the Funds reserve the right to automatically convert Institutional Shares in your account to Investor Shares or Advisor Shares or close your account and redeem your shares if the value of your account falls below \$1 million, unless the reduction in value is due solely to investment performance. The Funds will notify you and allow you at least 30 days to bring your account's value up to the applicable minimum before converting your shares to Investor Shares or Advisor Shares or closing your account and redeeming your shares. If your shares are converted, the conversion will have no effect on the value of your investment in Institutional Shares of the Fund at the time of conversion. However, the number of shares you own after the conversion may be greater or lower than the number of shares you owned before the conversion, depending on the net asset value of the respective share classes.

Buying Shares

Important Information about Opening an Account

Federal law requires all financial institutions, including mutual funds, to obtain, verify and record information that identifies each person who opens an account. Consequently, when you open an Artisan Partners Funds account, you will be asked to provide certain identifying information on your account application. If you fail to provide the appropriate information to the Funds, the Funds may try to contact you to obtain the necessary information. For more information, see "Other Information – Anti-Money Laundering Compliance."

How to Open an Account

If you meet the applicable share class minimum investment requirements and the applicable Fund's other criteria, you may be able to purchase shares of the Fund by contacting your financial intermediary. You can also open an account and purchase shares of the Funds by contacting the Funds' transfer agent, SS&C Global Investor and Distribution Solutions, Inc., at 800.344.1770 and completing a new account application. See "Investing with Artisan Partners Funds – Who Can Invest in Artisan Partners Funds?" "- Who is Eligible to Invest in a Closed Fund?".

By Mail—Complete and sign a new account application. Mail the application, along with your check for the applicable purchase amount to the address listed below (use the address that matches the delivery mechanism you are using – regular mail or overnight delivery). All checks must be made payable to "Artisan Partners Funds" or to the name of the Fund in which you are investing. ***Artisan Partners Funds will not accept cash, money orders, traveler's checks, credit card payments, credit card checks, third-party checks, starter checks or checks drawn on non-US financial institutions.***

For regular mail delivery:

Artisan Partners Funds
P.O. Box 219322
Kansas City, MO 64121-9322

For overnight mail delivery:

Artisan Partners Funds
801 Pennsylvania Ave., Suite 219322
Kansas City, MO 64105-1307
800.344.1770

All investment checks must be delivered to one of the addresses above. Artisan Partners Funds and Artisan Partners Distributors LLC do not accept shareholder investment checks at their corporate offices; checks received at those offices will be forwarded to the Funds' transfer agent, and purchases will not be effective until the order is received and accepted by the Funds' transfer agent. A purchase by check is priced at the NAV next calculated after the Funds' transfer agent receives the check and accepts the order.

By Wire—You may purchase shares by instructing your financial institution to wire money pursuant to the wire transfer instructions included below. Your financial institution may charge you a fee to send (or receive) funds by wire. Wire transfers from a bank outside the US generally will not be accepted. A purchase by wire is priced at the NAV next calculated after the Fund receives your wire. Therefore, if your wire is received after the time as of which the NAV is calculated for the day, your funds may be held by the Fund until the next business day. **If you are opening a new account by wire transfer, a new account application must be received in proper form at the Funds' transfer agent prior to the receipt of the wire.** Artisan Partners Funds will not be responsible for the consequences of delays, including delays in the banking or Federal Reserve wire systems.

Wire transfer instructions are:

State Street Bank and Trust Company
Attn: Mutual Funds
Boston, MA 02110
Routing #011000028
Credit to: Artisan Partners Funds
Deposit DDA 99050882
Further credit: [your account registration]
[your account number]

If the proper account information is not included, the wire order may be rejected.

By Exchange—You may open a new account in Investor Shares or Advisor Shares of a Fund by telephone by calling 800.344.1770 with an exchange of \$1,000 or more for Investor Shares, \$250,000 or more for Advisor Shares or \$1,000,000 or more for Institutional Shares from your identically registered account in another series of Artisan Partners Funds. See "– Telephone Exchange Plan." A purchase by exchange is priced at the NAV next calculated after your call; the redemption of shares of Artisan Floating Rate Fund or Artisan High Income Fund may be subject to a redemption fee. See "Redeeming Shares - Redemption Fee."

By Automatic Investment Plan (AIP)—You may purchase Investor Shares or Advisor Shares of Artisan Partners Funds through an AIP. Complete and sign the account application, including the AIP section. See "– Automatic Investment Plan (AIP)."

By Purchases in Kind—You may, subject to Artisan Partners Funds' approval, purchase Investor Shares, Advisor Shares or Institutional Shares of the Funds with securities that are eligible for purchase by the Fund (consistent with the Fund's investment process, goal and philosophy)

and that have values that are readily ascertainable in accordance with the Artisan Partners' valuation policies. Call Artisan Partners Funds at 800.344.1770 if you would like to purchase shares of the Funds with other securities.

How to Add to an Account

If you opened an account directly with a Fund in accordance with the previous section, you may make subsequent investments by wire transfer using the instructions provided, or by submitting a check, along with either the stub from your Fund account statement or a letter indicating the amount of the purchase, your account number and the name in which your account is registered. All checks must be made payable to "Artisan Partners Funds" or to the name of the Fund in which you are investing. Please print your account number on your check.

Artisan Partners Funds will not accept cash, money orders, traveler's checks, credit card payments, credit card checks, third-party checks, starter checks or checks drawn on non-US financial institutions.

To make additional purchases of shares of a Fund, you may also add from \$50 to \$50,000 to your account by telephone. You may elect the telephone purchase option on your application or by completing the shareholder account options form after your account has been opened. A telephone purchase with funds to be drawn from your bank account is generally effective on the business day of your call if you call before the time as of which the Fund calculates its NAV, or on the next business day after your call if you call after the time as of which the Fund's NAV has been calculated for the day. See "Investing with Artisan Partners Funds – Share Price." Your financial institution may impose a fee for wire or electronic funds transfer ("EFT").

You may exchange between identically registered accounts within the same share class by telephone. Telephone exchanges are subject to a minimum exchange of \$50 and other limits. See "– Telephone Exchange Plan."

You may also add AIP to your existing account in Investor Shares or Advisor Shares of Artisan Partners Funds. Please call 800.344.1770 or visit www.artisanpartners.com for a shareholder account options form. Your financial institution may charge you a fee for electronic transfers of funds. See "– Automatic Investment Plan (AIP)" for more information.

Telephone Exchange Plan

You may open a new account in a Fund by exchange from your identically registered account in the same share class of another Artisan Partners Fund. To open the new account, your exchange must meet the applicable share class minimum. You also may transfer investments between already existing identically registered accounts by exchanging at least \$50.

Telephone exchanges are subject to these restrictions:

- Both accounts must be registered in the same name, with the same address and taxpayer identification (social security or employer identification) number.
- Your exchange will be processed on the business day on which you call if you call before the time as of which each Artisan Partners Fund calculates its NAV, or on the next business day after your call if you call after the time as of which an Artisan Partners Fund's NAV has been calculated for the day. See "Investing with Artisan Partners Funds – Share Price."
- If your account is subject to backup withholding, you may not use the telephone exchange plan.
- Artisan Floating Rate Fund and Artisan High Income Fund may charge you a 2% redemption fee on exchanges of shares owned for 90 days or less. See "Redeeming Shares – Redemption Fee."

Automatic Investment Plan (AIP)

The AIP allows you to make regular, systematic investments into Investor Shares or Advisor Shares of Artisan Partners Funds. You purchase shares by transferring money from your designated checking or savings account directly into your Fund account. Simply designate your monthly investment amount (the monthly minimum is \$50) and the day (between the 3rd and the 28th) you want the transfer to take place. If you do not select a day, the withdrawal from your account will be made on the 15th of the month. If a withdrawal date falls on a weekend or holiday, your payment will be transferred from your bank account on the business day prior to the date you selected. It may take up to 10 days to establish your AIP once your instructions have been received. Artisan Partners Funds will not be responsible for non-sufficient funds fees. If your AIP does not clear, your purchase will be cancelled. You will be liable for any resulting losses or fees a Fund or its transfer agent incurs. If your purchase through the AIP fails to clear on two consecutive occasions, the Fund will terminate your AIP.

If you choose the AIP when you open your account, the minimum initial investment for Investor Shares will be waived. However, your Investor Shares may be redeemed and your account closed if you discontinue the AIP before your account reaches the minimum initial investment size. See "Investing with Artisan Partners Funds – Minimum Balances." To change an AIP, please notify us at least 14 days prior to the next scheduled investment date. For complete instructions on changing an AIP, please visit www.artisanpartners.com or contact a customer service representative at 800.344.1770.

Purchases—General Information

- Your purchases must be in US dollars.
- If your check or telephone purchase order does not clear, your purchase will be cancelled. You also will be liable for any resulting losses or fees a Fund or its transfer agent incurs.
- You may not change or cancel a purchase request once it has been received in good order.

- An order typically is accepted when the Fund or its authorized agent has received a completed application or appropriate instruction along with the intended investment, if applicable, and any other required documentation. An order is not binding until accepted and entered on the books of the Fund.
- Artisan Partners Funds reserves the right to reject any order deemed inappropriate or not to be in the best interests of existing Fund shareholders, to limit exchanges or to take such other actions as the Funds deem appropriate. Further, the Funds reserve the right to reject any purchase order in its sole discretion. For example, a Fund may reject an order that appears so large that it would disrupt management of the Fund or an order from someone ineligible to invest. The Fund also may reject orders as described below under “Other Information – Anti-Money Laundering Compliance” and “Other Information – Inappropriate Trading.” The Fund and its transfer agent will not be responsible for any loss, liability, cost or expense resulting from rejecting any purchase order.
- A holiday, weekend or other interruption can affect the normal processing of an investment.
- Artisan Partners Funds cannot accept a purchase order specifying a specific purchase date or price per share. Purchase checks greater than \$50,000 that are post-dated or have a partial date or no date will be rejected. However, if a purchase check is less than \$50,000, it will not be held for processing on the designated date, but will be processed upon acceptance.
- Artisan Partners Funds may terminate your ability to make automatic investments and telephone purchases if an item is not paid by your financial institution on two consecutive occasions.
- To prevent unauthorized transactions in your account, Artisan Partners Funds will take precautions designed to verify that information communicated by telephone is genuine. Artisan Partners Funds and its transfer agent may record a call, request identifying information and send written confirmation of telephone transactions. Artisan Partners Funds and its transfer agent will not be responsible for any loss, liability, cost or expense resulting from acting upon instructions furnished by telephone if we follow reasonable procedures designed to verify the identity of the caller. We recommend that you take precautions to keep confidential your personal information, including your account number and tax identification (social security or employer identification) number. You should verify the accuracy of each telephone transaction as soon as you receive your confirmation statement.

Redeeming Shares

If you invest through a financial intermediary, you can redeem shares of the Fund by contacting your financial intermediary. See “Other Information – Financial Intermediaries.” You may redeem some or all of your shares by telephone or written request sent to the Fund by mail on any day that the NYSE is open for regular session trading. You may also redeem Investor Shares or Advisor Shares of Artisan Partners Funds by systematic withdrawals on any day that the NYSE is open for regular session trading. Your redemption will be processed on the business day that your order is accepted by the Fund or its authorized agent if it is received before the time as of which the Fund calculates its NAV (NYSE closing time – usually 4:00 p.m. Eastern Time). If your order is received after that time, your order will be processed on the next business day. The Fund will redeem your shares at the NAV per share next calculated after your redemption order is received in good order by the Fund or its authorized agent. The Fund may reject your redemption order under certain circumstances, which are discussed below. Artisan Partners Funds will generally wire transfer the proceeds of your redemption to the bank account designated in your purchase application or on a telephone authorization form. **Some redemptions require Medallion signature guarantees. See “– Medallion Signature Guarantees.”**

How to Redeem Shares

By Mail

Non-IRA Accounts—To redeem shares in an account other than an IRA, complete the Non-IRA Redemption form or mail a letter of instruction including: the Fund’s name; your account number; the dollar amount or number of shares to be sold; and the signature of the shareholder(s) as it appears on the account or by a duly authorized agent of the shareholder(s). **Some redemptions require Medallion signature guarantees. See “– Medallion Signature Guarantees.”** The letter of instruction should be sent to the address shown below (use the address that matches the delivery mechanism you are using – regular mail or overnight delivery).

For regular mail delivery:

Artisan Partners Funds
P.O. Box 219322
Kansas City, MO 64121-9322

For overnight mail delivery:

Artisan Partners Funds
801 Pennsylvania Ave., Suite 219322
Kansas City, MO 64105-1307
800.344.1770

IRA Accounts—To redeem shares in an Artisan Partners Funds IRA account, you may send a letter of instruction or complete the IRA Distribution Request Form. Call 800.344.1770 or visit www.artisanpartners.com for instructions. **Some redemptions require Medallion signature guarantees. See “– Medallion Signature Guarantees.”** We encourage you to consult your tax advisor regarding the tax consequences and tax reporting requirements of your redemptions prior to redeeming shares in an IRA account. For further instructions, documents or the IRA Disclosure Statement and Custodial Agreement, please call 800.344.1770 or visit www.artisanpartners.com.

By Telephone

You automatically have the telephone redemption option unless you decline it on your account application. If you decline this option, but would like to add it at a later date, call 800.344.1770 or visit www.artisanpartners.com for a shareholder account options form. That form must be signed by a person authorized to act on behalf of the registered owner of an account and may require a form of signature validation.

To redeem shares by telephone, call the Funds’ transfer agent at 800.344.1770. If you redeem shares by telephone, any amount of shares may be redeemed if a bank account was designated on your account application, or updated on a shareholder account options form after your account was opened, to receive the proceeds by wire transfer or EFT. If you have not designated a bank account to receive the proceeds by wire or EFT, telephone redemptions will be limited to \$100,000 each and will be sent by check to your mailing address of record. Your bank may charge you a fee for an incoming wire or EFT; Artisan Partners Funds reserves the right to charge fees for these services in the future. Payment by EFT usually will arrive at your bank two banking days after your redemption is processed. Payment by wire usually is credited to your bank account on the next banking day after your redemption is processed.

To reduce the risk of loss from a fraudulent instruction, we will send your redemption proceeds only to the bank account designated in your application or telephone authorization form or letter signed by an authorized person and with a Medallion signature guarantee. See “– Medallion Signature Guarantees.” A request to change your existing US bank account must be submitted in writing or on a shareholder account options form and may require a form of signature validation.

The Fund and its transfer agent will not be responsible for the authenticity of instructions provided by telephone, nor for any loss, liability, cost or expense for acting upon instructions furnished by telephone, if we follow reasonable procedures designed to identify the caller. We may record a call, request identifying information or send written confirmation of telephone transactions. Please verify the accuracy of each telephone transaction as soon as you receive your confirmation statement. We recommend that you take precautions to keep confidential your account information, including your account number and tax identification number.

During periods of volatile economic and market conditions, you may have difficulty making a redemption request by telephone, in which case you should make your redemption request in writing.

Systematic Withdrawals

This service lets you withdraw a set amount from your account in Investor Shares or Advisor Shares of the Funds at regular intervals. To be eligible for systematic withdrawal, you must have at least \$5,000 in your Artisan Partners Fund account and must withdraw at least \$50 per transaction.

If you would like to add this option, please call us at 800.344.1770 or visit www.artisanpartners.com for a shareholder account options form. You must use the IRA Distribution Request Form to request systematic withdrawals from your IRA account.

If you select the systematic withdrawal option, you may choose to have the Fund send payment: (i) by mail to the address of record; (ii) by EFT to a pre-authorized US bank account; or (iii) to your pre-authorized US bank account by wire transfer. In order to receive funds by EFT or wire transfer, you must identify your US bank account on your application, or if you are changing your US bank account or adding this feature after your account is open, on a shareholder account options form. Your request to change your US bank account or add options must be submitted in writing and may require a form of signature validation. Your bank may charge you a fee for the incoming wire or EFT; Artisan Partners Funds reserves the right to charge fees for these services in the future. Payment by EFT usually will arrive at your bank two banking days after your redemption is processed. Payment by wire usually is credited to your bank account on the next banking day after your redemption is processed.

Redemptions—General Information

Normally, payment of redemption proceeds is made as soon as practicable and typically within two business days after receipt and acceptance of your redemption request. Redemption proceeds may be withheld or delayed as required or permitted by applicable law, but must be made no later than seven days after receipt of your redemption request.

Subject to applicable law, a Fund may reject your redemption request if:

- the identification information you provided in your account application cannot be verified;
- your identification information matches information on a government list of suspicious persons; or
- the Fund believes that you may be involved in suspicious activity.

Further documentation may be requested to evidence the authority of the person or entity making a written redemption request. Please call 800.344.1770 with questions.

If you recently have made a purchase by check or EFT, the Fund may withhold redemption proceeds until it is reasonably satisfied that it has received good funds. This confirmation process can take up to 15 days. To reduce such delays, Artisan Partners Funds recommends that your purchase be made by federal funds wire through your financial institution.

You may not change or cancel a redemption request once it has been received in good order.

A Fund cannot accept a redemption request that is post-dated, specifies a particular date for processing, specifies a price for redemption or contains any other special conditions. All redemptions will be processed upon acceptance.

Redemptions may be suspended or payment dates postponed when the NYSE is closed, its trading is restricted or as permitted by the SEC.

Each Fund intends to pay all redemptions in cash. During any 90-day period for any one shareholder, a Fund is obligated to redeem shares solely in cash up to the lesser of \$250,000 or 1% of the Fund's net assets. Redemptions in excess of these limits may be paid wholly or partly by an in-kind distribution of securities. Redemption payments are typically paid in cash held by the Fund. During periods of significant redemptions or stressed market conditions, the Fund may meet redemption requests by selling securities, borrowing under Artisan Partners Funds' line of credit, or, in limited circumstances, redeeming certain shareholders through an in-kind distribution consistent with the limitation described above.

The redemption price you receive depends upon the NAV per share of a class of a Fund at the time of redemption. It may be more or less than the price you originally paid for the shares and may result in a realized capital gain or loss.

Shares in any account you maintain with Artisan Partners Funds may be redeemed to the extent necessary to reimburse Artisan Partners Funds for any loss it sustains that is caused by you (such as losses from uncollected checks or any Fund liability under the backup withholding provisions of the Code relating to your account).

If a Fund sends you a check for a redemption, systematic withdrawal payment or cash distribution that is returned "undeliverable" or remains uncashed for at least six months, the Fund may cancel the check and reinvest the proceeds in your Fund account at the NAV per share on the date of reinvestment and, if applicable, the Fund may (a) cancel your systematic withdrawal payments, honoring redemptions only by request and (b) automatically reinvest your future dividends and capital gains, even if you had elected cash payment. If you hold your investment in an IRA, or other circumstances exist such that reinvesting the proceeds is not in your or the Fund's best interest, your check will not be cancelled and the Fund may attempt to contact you to obtain further instruction.

Before submitting your redemption request, please call 800.344.1770 if you have any questions about requirements for a redemption.

Redemption Fee

If you redeem or exchange shares of Artisan Floating Rate Fund and Artisan High Income Fund that you have held for 90 days or less, the Funds will charge you a redemption fee of 2% of the redemption proceeds. The redemption fee will be deducted from your redemption proceeds and retained by that Fund.

Artisan Floating Rate Fund and Artisan High Income Fund reserve the right to waive or reduce the 2% redemption fee on shares held 90 days or less at its discretion when the Funds believe such waiver is in the best interests of the Fund, including but not limited to when it determines that imposition of the redemption fee is not necessary to protect the Fund from the effects of short-term trading.

For example, the following transactions for direct shareholders of shares of Artisan Floating Rate Fund and Artisan High Income Fund (if known by the Fund) would not be subject to redemption fees:

- Redemptions of shares purchased through reinvestment of dividends and distributions;
- Redemptions of shares pursuant to certain automatic rebalancing programs;
- Redemptions requested following the death of a registered shareholder on an account or the settler of a living trust that is the registered shareholder of an account, for shares held in the account at the time of death;
- Redemptions of shares that were purchased as participant contributions through an employer-sponsored retirement plan;
- Transaction activity due to processing errors; or
- Shares exchanged from one share class to another within a Fund.

This list is not exclusive. To request a waiver or if you have any questions about whether your transaction will be subject to the redemption fee, please call us at 800.344.1770.

Artisan Floating Rate Fund and Artisan High Income Fund will waive the redemption fee on redemptions of shares held by certain retirement or profit-sharing plans, shares purchased through certain financial intermediaries and shares purchased in connection with the ReFlow and/or other similar redemption in-kind programs ("RIK Programs"). Further discussion about the Funds' participation in RIK Programs, as applicable, is available in the SAI. In those cases where a financial intermediary passes the redemption fee through to underlying investors, the amount of the fee and the holding period generally will be consistent with the Funds' criteria. However, due to differences in operational capacities, the financial intermediaries' methods for tracking and calculating the fee may be different in some respects from the methods employed by the Funds. If you purchase Fund shares through a financial intermediary, you should contact the intermediary for more information on how redemption fees will be applied to your shares.

Waivers of redemption fees are reported to the board of directors of Artisan Partners Funds.

Medallion Signature Guarantees

To protect you and the Funds from fraud, the following transaction requests must be submitted in writing and include a medallion signature guarantee for each account owner:

- If you wish to redeem more than \$100,000 where proceeds are requested to be sent by check.
- If you ask that a check, wire transfer or EFT be delivered to an address or bank account not on record.
- If you ask that a check or wire transfer be made payable to someone other than the account owner.
- If you transfer or change the ownership of your account.
- If you request to redeem shares and your address (for redemptions by check) or bank account (for redemptions by wire transfer or EFT) has been changed within the last 15 calendar days.

The Funds may waive any of the above requirements in certain instances. In addition to the situations described above, the Funds and/or the transfer agent reserve the right to require a medallion signature guarantee or additional documentation in other instances based on the circumstances of the particular situation.

All medallion signature guarantees must use a STAMP2000 Medallion imprint appropriate for the nature and dollar amount of the transaction. Medallion signature guarantee is a bar-coded signature guarantee and must be executed by an eligible guarantor. Eligible guarantors include Commercial Banks, Trust Companies, Savings Associations and Credit Unions, as defined by the Federal Deposit Insurance Act. Member firms of a domestic stock exchange are also considered eligible guarantors. **Non bar-coded guarantees or stamps from a Notary Public are not acceptable.**

If you are signing on behalf of an entity, you must indicate your capacity beside or beneath your signature (for example, "Jane Doe, as Trustee"). If you are signing in a capacity, further documentation may be required by the guarantor. Prior to signing, inquire what documentation needs to be provided and the maximum transaction amount the guarantee will insure. Request that the guarantor provide a legible bar-coded medallion signature guarantee. A form or transaction request received without a valid STAMP2000 Medallion imprint may be rejected.

If you are redeeming shares through your financial intermediary, you should contact that intermediary to determine whether medallion signature guarantee requirements apply.

Exchanging Shares

If you meet the minimum investment requirements for opening a new account, and any other eligibility criteria described in this prospectus, you may exchange shares of a Fund for the same class of shares of any other Artisan Partners Fund that is open to new investors or any closed Artisan Partners Fund (if you also meet the requirements described under “Investing with Artisan Partners Funds – Who is Eligible to Invest in a Closed Fund?”). A fund exchange may be made by following the redemption procedures described under “Redeeming Shares – How to Redeem Shares.” The Funds will exchange your shares at the respective NAVs per share next calculated after your exchange order is received in good order by the Funds or their authorized agent. If you exchange shares of Artisan Floating Rate Fund or Artisan High Income Fund that you have held for 90 days or less for the same class of shares of another Fund, the Fund will charge you a redemption fee of 2% of the redemption proceeds. An exchange of shares of one Fund for shares of another Fund will be a taxable transaction. See “Distributions and Taxes – Taxes.”

Shareholders may also exchange shares of a Fund for a different class of shares offered by the same Fund, provided that the shareholder meets the minimum investment requirements for opening a new account in shares of the class into which the shareholder seeks to exchange. Such an exchange may be made by following the procedures described under “Redeeming Shares – How to Redeem Shares.” The Funds will exchange your shares at the respective NAVs per share next calculated after your exchange order is received in good order by the Funds or their authorized agent. If you exchange shares of Artisan Floating Rate Fund or Artisan High Income Fund that you have held for 90 days or less for a different class of shares offered by that Fund, generally the Fund will not charge you a redemption fee. For US federal income tax purposes, an exchange of shares of one Fund directly for shares of a different class of the same Fund generally is not expected to be a taxable event, or to result in recognition of a gain or loss by the exchanging shareholder. See “Distributions and Taxes – Taxes.”

Artisan Partners Funds reserves the right, without notice, to revise or terminate the exchange privilege, limit the amount of any exchange, or reject an exchange, at any time, for any reason.

Shareholder and Account Procedures

Account Option Changes

To further protect the Funds and their shareholders from fraud, some shareholder account changes may require additional signature validation. Please refer to our shareholder account options form for further information or call us at 800.344.1770.

Address Changes

You may change the address on your account by:

- sending a written request to the Funds' transfer agent signed by the registered owner(s) of the account (please note, if you wish to redeem shares within 15 days after a change of address in writing, each owner's signature must be guaranteed using a STAMP2000 Medallion. See "Redeeming Shares – Medallion Signature Guarantees"),
- calling us at 800.344.1770, or
- accessing your account through www.artisanpartners.com/accountaccess.

Artisan Partners Funds will send a written confirmation of the change to both your old and new addresses. Artisan Partners Funds will change your address in response to a US Postal Service notification, but will attempt to contact you at the new address so that you can confirm the address change.

If your address is changed in response to a US Postal Service notification, in writing without proper signature validation, by phone or through www.artisanpartners.com, we will not honor any redemption request for the following 15 days, unless that redemption is in writing with a Medallion signature guarantee. See "Redeeming Shares – Medallion Signature Guarantees." The Fund and its transfer agent will not be responsible for any loss, liability, cost or expense resulting from acting upon address changes if we follow reasonable procedures to verify the identity of the caller or website user.

If a piece of mail that we send to you is returned as undeliverable, we will attempt to resend the mail two more times. If it remains undeliverable after those three attempts, we will discontinue all mail to your mailing address of record until you notify us of a new address by one of the previously stated methods.

Statements and Reports

As a Fund shareholder, you will receive:

- Updated prospectuses.
- Confirmation statements.
- Quarterly account statements.
- Annual and semiannual reports.
- Privacy statements.
- Year-end tax statements.

Transactions made under certain periodic investment and withdrawal programs (including dividend reinvestment plans) will be confirmed on quarterly account statements. We suggest you keep each of your quarterly and year-end account and tax statements with your other important financial papers. You may need them for tax purposes.

If you need copies of statements, call 800.344.1770 or visit www.artisanpartners.com. Copies of this year's or last year's statements are free of charge; for earlier years, there is a per statement processing fee (currently \$10) for each year for which statements (account or tax) are requested. If more than one member of a household has an account with a Fund, we reduce the number of duplicate annual and semiannual reports your household receives by sending only one copy of each to the address shared by those accounts. If you hold more than one account in a Fund, we will only send one summary prospectus for that Fund, but your household may receive more than one copy if two or more members of your household hold accounts in the Fund. Call us at 800.344.1770 to request individual copies of these documents. We will begin sending individual copies within 30 days after receiving your request.

E-Delivery of Documents

If you hold your account directly with Artisan Partners Funds, and you prefer to view Fund documents and statements online rather than receiving paper documents, you may enroll in E-Delivery through www.artisanpartners.com/accountaccess. To enroll in E-Delivery, you will need to provide your social security number or employer identification number and a valid email address. All accounts associated with the social security or employer identification number you provide will be enrolled for E-Delivery.

When a Fund document or statement becomes available, you will receive an email notification that the document or statement is available. If the email we send to you is returned as undeliverable, we will attempt to resend the email two more times. If your email remains undelivered after those three attempts, your E-Delivery enrollment will be discontinued and paper copies of Fund documents and statements will be sent to your mailing address on record. There are risks to electronic delivery of Fund documents, including, but not limited to, delay or failure of delivery due to technical difficulties and other matters beyond the Funds' control. Artisan Partners Funds has no liability for the failure or disruption of the E-Delivery service due to circumstances beyond our reasonable control.

Abandoned Property

If your account is deemed “abandoned” or “unclaimed” under state law, Artisan Partners Funds may be required to “escheat” or transfer the assets in your account to the applicable state’s unclaimed property administration. The state may redeem escheated shares and, if you subsequently seek to reclaim your proceeds of liquidation from the state, you may only be able to recover the amount received when the shares were redeemed. It is your responsibility to ensure that you maintain a correct address for your account, keep your account active by contacting the Funds by mail or telephone or accessing your account through the Funds’ website at least once a year, and promptly cash all checks for dividends, capital gains and redemptions. The Funds’ transfer agent can be contacted by phone at 800.344.1770, by regular mail at Artisan Partners Funds, P.O. Box 219322, Kansas City, MO 64121-9322, or by express, certified or registered mail at Artisan Partners Funds, 801 Pennsylvania Ave., Suite 219322, Kansas City, MO 64105-1307.

Please check your state’s unclaimed or abandoned property website for specific information.

Other Information

Financial Intermediaries

The Funds may authorize certain financial services companies, broker-dealers, banks or other authorized agents, and in some cases, other organizations designated by an authorized agent (with their designees, collectively “authorized agents”), to accept purchase, exchange and redemption orders on the Funds’ behalf. An order properly received by an authorized agent will be deemed to have been accepted by the Funds. Some authorized agents directly charge their customers transaction fees, brokerage commissions, account fees and/or other fees. If you buy, exchange or redeem shares through an authorized agent, you will pay or receive the Fund’s NAV per share next calculated after receipt and acceptance of the order by the authorized agent, after giving effect to any transaction charge or brokerage commission imposed by the authorized agent and, for Artisan Floating Rate Fund and Artisan High Income Fund only, the application of a 2% redemption fee (if applicable). The authorized agent’s procedures will apply in lieu of purchase, exchange and redemption procedures described in this prospectus. The Funds, Artisan Partners, Artisan Partners Distributors LLC, the Funds’ transfer agent and each of their respective directors, trustees, officers, employees and agents are not responsible for the failure of any authorized agent to carry out its obligations to its customers.

If you attempt to purchase shares of the Funds through an unauthorized intermediary, your purchase request will be rejected. Please contact your financial intermediary or Artisan Partners Funds at 800.344.1770 to find out whether your financial intermediary is eligible to purchase Fund shares and, if so, how purchases, redemptions or exchanges may be made.

Some authorized agents charge a fee to the Funds for accounting and shareholder services that the agent provides to Fund shareholders on the Fund’s behalf. These services may include recordkeeping, transaction processing for shareholders’ accounts and other services. This fee may be based on the number of accounts or may be a percentage of the average value of accounts for which the authorized agent provides services. For Investor Shares or Advisor Shares of each Fund, the Fund pays all or a portion of this fee, which is intended to compensate the authorized agent for its provision of services of the type that would be provided by the Fund’s transfer agent or other service providers if the shares were registered on the books of the Fund. Institutional Shares of the Funds do not pay fees to intermediaries in connection with recordkeeping, transaction processing for shareholders’ accounts or any other services that an intermediary may provide to its clients.

Artisan Partners, at its own expense, pays certain authorized agents for accounting and shareholder services (to the extent those fees are not paid by a Fund), and for distribution and marketing services performed with respect to the Funds. This fee is generally based on a flat fee, a fee for each share class available at the authorized agent and/or a percentage of the average value of accounts for which the authorized agent provides services. Such payments for distribution and marketing services are generally made as compensation or reimbursement for one or more of the following: (1) expenses incurred by authorized agents for their sales activities with respect to the Funds, such as preparing, printing and distributing sales literature and advertising materials and compensating registered representatives or other employees of authorized agents for their sales activities; (2) marketing and promotional services by authorized agents, such as business planning assistance, educating personnel about the Funds and sponsoring sales meetings; (3) transaction or processing fees; and (4) conferences and events sponsored by the authorized agent. A number of factors may be considered in determining the amount of the payments associated with such services, including that authorized agent’s sales, client assets invested in the Funds and redemption rates, the quality of the authorized agent’s relationship with Artisan Partners, and the nature of the services provided by the authorized agent to its clients. Authorized agents that receive these types of payments may have a conflict of interest in recommending or selling Fund shares rather than other mutual funds, particularly where such payments exceed those associated with other funds. Although neither the Funds nor Artisan Partners pays for a Fund to be included in an authorized agent’s “preferred list” or other promotional program, some authorized agents that receive compensation as described above may have such programs in which the Funds may be included.

Please contact your authorized agent for details about payments it may receive from the Funds, Artisan Partners or their affiliates.

Artisan Partners Funds reserves the right to waive or reduce the minimum investment requirements as described under “Investing with Artisan Partners Funds – Minimum Investments.” Artisan Floating Rate Fund and Artisan High Income Fund reserve the right to waive or reduce the 2% redemption fee on shares held for 90 days or less for any account held through an authorized agent or other financial intermediary and currently waives the redemption fee on redemptions of shares held by certain retirement or profit-sharing plans, shares purchased through certain authorized agents or financial intermediaries and shares purchased in connection with RIK Programs offered by one or more financial intermediaries. Further discussion about the Funds’ participation in RIK Programs, as applicable, is available in the SAI. In those cases where a financial intermediary passes the redemption fee through to underlying investors, the amount of the fee and the holding period generally will be consistent with Artisan Floating Rate Fund’s and Artisan High Income Fund’s criteria. However, due to differences in operational procedures and policies, the financial intermediaries’ methods for tracking and calculating the fee may be different in some respects from the methods employed by the Funds. If you purchase shares of Artisan Floating Rate Fund and Artisan High Income Fund through a financial intermediary, you should contact the financial intermediary for more information on how redemption fees will be applied to your shares.

Anti-Money Laundering Compliance

Artisan Partners Funds is required to comply with various anti-money laundering laws and regulations. Federal law requires all financial institutions, including mutual funds, to obtain, verify and record information that identifies each person who opens an account. Consequently, when you open an Artisan Partners Funds account, you must provide certain identifying information on your account application. If you are transferring the ownership of your account, you also will need to provide identification information about the transferee. If you fail to provide

the appropriate information to the Funds, the Funds may try to contact you to obtain the necessary information. If you are unable to provide the requested information, the Funds are unable to contact you within the period of time Artisan Partners Funds considers appropriate, or Artisan Partners Funds believes that the nature of the information needed is such that follow-up contact is not appropriate, your application will be rejected and the monies received to establish your account will be returned to you. For some investors and types of accounts, this could have adverse consequences. For example, an IRA holder with a limited amount of time to accomplish a rollover of IRA assets could suffer unfavorable tax consequences as a result of the Funds' inability to process an application. As a result, it is very important that the application be filled out completely. If you have questions about completing your application, please call 800.344.1770.

After your account is established, the Funds also may take other actions or ask to see other identifying documents to verify your identity. These actions may include checking your identifying information against various databases and requesting identifying documents, such as a business license, for an entity, or a driver's license or other state identification card, for an individual, to verify your identity. If Artisan Partners Funds is unable to verify your identity from the information you provide, your account will be closed and the redemption proceeds will be paid to you (unless Artisan Partners Funds is required to "freeze" your account as described below). You will receive the share price next calculated after Artisan Partners Funds determines that it is unable to verify your identity (so your redemption proceeds may be more or less than the amount you paid for your shares and the redemption may be a taxable transaction).

If at any time Artisan Partners Funds believes you may be involved in suspicious activity or if your identifying information matches information on government lists of suspicious persons, the Funds may choose not to establish a new account or may be required to "freeze" your account. The Funds also may be required to provide a governmental agency with information about your attempt to establish a new account or about transactions that have occurred in your account.

The Funds also may be required to transfer monies received to establish a new account, transfer an existing account or transfer the proceeds of an existing account to a governmental agency. In some circumstances, the law may not permit a Fund to inform you that it has taken the actions described above.

Inappropriate Trading

Artisan Partners Funds attempts to identify investors who appear to engage in trading Artisan Partners Funds considers inappropriate, which may include frequent or short-term trading, and to take reasonable steps to deter such activity.

The Funds cannot always identify or reasonably detect frequent, short-term or other inappropriate trading. In particular, it may be difficult to identify frequent, short-term or other inappropriate trading in certain omnibus accounts and other accounts traded through financial intermediaries (which may include broker-dealers, retirement plan administrators, insurance company separate accounts, bank trust departments or other financial services organizations), some of which may be authorized agents of the Funds. By their nature, omnibus accounts conceal from the Funds the identity of individual investors and their transactions. Artisan Partners Funds complies fully with applicable federal rules requiring it to reach an agreement with each of its financial intermediaries pursuant to which certain information regarding purchases, redemptions, transfers and exchanges of Fund shares by underlying beneficial owners through financial intermediary accounts will be provided to the Funds upon request, but there can be no guarantee that all frequent, short-term or other trading activity the Funds may consider inappropriate will be detected, even with such agreements in place. If Artisan Partners Funds is unsuccessful in reaching such an agreement with any financial intermediary, Artisan Partners Funds will terminate that financial intermediary's ability to purchase shares of the Funds for its customers.

Artisan Partners Funds' board of directors has adopted policies and procedures to address frequent or short-term trading. Artisan Partners Funds attempts to deter frequent or short-term trading through various methods, which include:

- monitoring trading activity as described below;
- fair valuation of securities as described under "Investing with Artisan Partners Funds – Share Price"; and
- redemption fees on Artisan Floating Rate Fund and Artisan High Income Fund as described under "Redeeming Shares - Redemption Fee."

The nature of the efforts undertaken and the resulting action by Artisan Partners Funds depends, among other things, on the type of shareholder account. Trading activity is monitored selectively on a daily basis in an effort to detect frequent, short-term or other inappropriate trading. If Artisan Partners Funds believes that an investor has engaged in frequent, short-term or other inappropriate trading, it may reject future purchases of Fund shares in that account or related accounts, or by that investor, with or without prior notice; reject a particular purchase order; limit exchanges among Artisan Partners Funds; and/or refuse to open an account. If inappropriate trading is detected in an account registered in the name of a financial intermediary or plan sponsor (as applicable), Artisan Partners Funds may request that the financial intermediary or plan sponsor (as applicable) take action to prevent the particular investor or investors from engaging in that trading. Investments in a Fund by ReFlow Fund, LLC ("ReFlow") or similar institutional investors in connection with the RIK Programs are exempt from Artisan Partners Funds' policies and procedures to address frequent or short-term trading because they generally do not raise market timing or excessive trading concerns. Further discussion about the Funds' participation in the RIK Programs, as applicable, is available in the SAI.

Rejection of future purchases by a retirement plan because of inappropriate trading activity by one or more plan participants is likely to impose adverse consequences on the plan and on other participants who did not engage in inappropriate trading. To avoid those collateral consequences, for retirement plans, Artisan Partners Funds generally will communicate with the financial intermediary or plan sponsor and request that the financial intermediary or plan sponsor take action to cause the inappropriate trading activity to cease. If inappropriate trading

activity recurs, Artisan Partners Funds may refuse all future purchases from the plan, including those of plan participants not involved in the inappropriate activity.

A financial intermediary through which you may purchase shares of a Fund may also independently attempt to identify trading it considers inappropriate, which may include frequent or short-term trading, and take steps to deter such activity. In some cases, the financial intermediary may require the Funds' consent or direction to undertake those efforts. In other cases, Artisan Partners Funds may elect to allow the financial intermediary to apply its own policies with respect to inappropriate trading in lieu of seeking to apply Artisan Partners Funds' policies to shareholders investing in the Funds through such financial intermediary, based upon Artisan Partners Funds' conclusion that the financial intermediary's policies sufficiently protect shareholders of the Funds. In either case, the Funds may have little or no ability to modify the parameters or limits on trading activity set by the financial intermediary. As a result, a financial intermediary may limit or permit trading activity of its customers who invest in Fund shares using standards different from the standards used by the Funds and discussed in this prospectus. The Funds' ability to impose restrictions on trading activity with respect to accounts traded through a particular financial intermediary may also vary depending on the system capabilities, applicable contractual and legal restrictions and cooperation of the particular financial intermediary. **If you purchase Fund shares through a financial intermediary, you should contact the financial intermediary for more information about whether and how restrictions or limitations on trading activity will be applied to your account.**

Artisan Partners Funds expects direct investors in Institutional Shares of the Funds who do not trade through a financial intermediary that trades electronically to engage in relatively few transactions. Artisan Partners Funds considers more excessive transactions (purchase or redemption) in Institutional Shares by such a direct investor inappropriate.

The identification of inappropriate trading involves judgments that are inherently subjective and the above actions alone or taken together with the other means by which Artisan Partners Funds seeks to discourage certain types of inappropriate trading (through the use of short term redemption fees on Artisan Floating Rate Fund and Artisan High Income Fund and fair value pricing, for example) cannot eliminate the possibility that inappropriate trading activity in the Funds will occur. Trading activity, appropriate or inappropriate, may affect the Funds and other shareholders (see "Risks You Should Consider").

Portfolio Security Holdings Disclosure

A complete list of each Fund's portfolio holdings, except Artisan Emerging Markets Debt Opportunities Fund and Artisan Global Unconstrained Fund, as of the close of each calendar quarter, will be made publicly available on Artisan Partners Funds' website on the applicable Disclosure Date (as defined herein), provided that the list of portfolio holdings of Artisan International Value Fund will generally be comprised of only those portfolio holdings representing more than 1% of the net asset value of Artisan International Value Fund that are required to be disclosed in an SEC filing as of the close of such calendar quarter. The Disclosure Date for each calendar quarter shall be the 30th day of the following calendar quarter for Artisan International Explorer Fund and Artisan International Value Fund and the 15th day of the following calendar quarter for each other Fund (except for Artisan Emerging Markets Debt Opportunities Fund and Artisan Global Unconstrained Fund, as noted above). Artisan Partners Funds, from time to time, authorizes an alternative Disclosure Date for publishing the lists of Fund portfolio holdings on Artisan Partners Funds' website (www.artisanpartners.com). A list of portfolio holdings is also included in reports each Fund files with the SEC after the end of each quarter. A Fund may disclose its top ten holdings or a partial list of its holdings, or discuss one or more portfolio holdings provided that the holdings have been made publicly available on Artisan Partners Funds' website at least one day prior to disclosure of such information or has been included in an SEC filing that is required to include the information. A discussion of one or more portfolio holdings also may be made available, provided that the substance of such discussion has been made publicly available on Artisan Partners Funds' website at least one day prior to disclosure of such information or is otherwise publicly available. Any such list of holdings or discussion of one or more portfolio holdings will remain available on Artisan Partners Funds' website at least until the date on which each Fund files a report with the SEC that includes a list of portfolio holdings and is for the period that includes the date as of which such information is current. Portfolio holdings information can be found on Artisan Partners Funds' website at www.artisanpartners.com/individual-investors/news-insights/research-data/holdings.html. Further discussion about the Funds' policies and procedures in connection with the disclosure of portfolio holdings is available in the SAI.

Cost Basis Reporting

Upon the redemption or exchange of your shares in a Fund, the Fund or, if you purchase your shares through a financial intermediary, your financial intermediary generally will be required to provide you and the IRS with cost basis and certain other related tax information about the Fund shares you redeemed or exchanged. If you do not select a particular cost basis reporting method, the Fund or financial intermediary will apply its default cost basis reporting method to your shares. If you hold your shares directly in a Fund account, the Fund's default method of average cost (or the method you have selected by notifying the Fund) will apply; if you hold your shares in an account with a financial intermediary, the intermediary's default method (or the method you have selected by notifying the intermediary) will apply. Please see Artisan Partners Funds' website (www.artisanpartners.com) or call Artisan Partners Funds at 800.344.1770, or consult your financial intermediary, as applicable, for more information regarding available methods for cost basis reporting and how to select or change a particular method. Please consult your tax advisor to determine which available cost basis method is best for you.

Distributions and Taxes

Each Fund intends to distribute substantially all of its net income and net realized capital gains to investors at least annually. Artisan Emerging Markets Debt Opportunities Fund and Artisan Global Unconstrained Fund typically declare and pay income distributions monthly, and distribute net realized capital gains no less frequently than annually. Artisan Floating Rate Fund and Artisan High Income Fund typically declare income distributions daily and pay income distributions monthly, and distribute net realized capital gains no less frequently than annually. Artisan International Value Fund typically declares and pays income distributions quarterly, and distributes net realized capital gains no less frequently than annually. Each Fund's investment decisions generally are made without regard to tax consequences to shareholders. As a result, each Fund may be less tax-efficient than other mutual funds that take tax consequences into account in the investment process. The "Fund Summaries" section of this prospectus includes information on each Fund's after-tax returns.

Distribution Options

When you open an account, you may specify on your application how you want to receive your distributions. If you later want to change your selection, you may submit a written request to the Funds' transfer agent, call us at 800.344.1770 or visit www.artisanpartners.com.

Each Fund offers the following options, which you may select on your application:

Reinvestment Option—Your income dividends and capital gain distributions will be reinvested in additional shares of the Fund. If you do not indicate a choice on your application, we will automatically reinvest your distributions.

Income-Only Option—We will automatically reinvest your capital gain distributions, but send income dividends to you by check or to your predesignated US bank account by EFT.

Capital Gains-Only Option—We will automatically reinvest your income dividends, but send capital gain distributions to you by check or to your predesignated US bank account by EFT.

Cash Option—We will send all distributions to you by check or to your predesignated US bank account by EFT.

In IRA accounts, all distributions are automatically reinvested because payments in cash likely would be subject to income tax and penalties. After you are 59 ½, you may request payment of distributions in cash. Distributions paid in cash, even after you are 59 ½, likely will be subject to income tax.

When you reinvest, the reinvestment price is the Fund's NAV per share of a class of a Fund at the close of business on the reinvestment date.

Distribution checks usually will begin to be mailed promptly after the payment date.

Taxes

The following discussion is a summary of some important US federal income tax considerations generally applicable to investments in the Funds. Your investment in a Fund may have other tax implications. For example, if your investment is held through a tax-advantaged account such as an employee benefit plan or if you are a foreign person (defined below), other results may be obtained and other considerations may apply. Please consult your tax advisor about US federal, state, local or foreign tax laws applicable to you.

When you sign your account application, you are asked to furnish your Social Security or taxpayer identification number and certify that your Social Security or taxpayer identification number is correct, that you are a US person and that you are not subject to backup withholding for failing to report income to the Internal Revenue Service (IRS). If you fail to comply with this procedure, the Fund is required to withhold a percentage of your taxable dividends, distributions and proceeds from redemptions.

Each Fund has elected (or intends to elect) and intends to qualify each year to be treated as a "regulated investment company." A regulated investment company is not subject to US federal income taxes at the fund level on income and gains that are distributed to shareholders in a timely manner.

Taxes on Redemptions—When you redeem shares in a Fund, you will generally recognize a capital gain or loss if there is a difference between the basis of your shares (typically, their cost) and the price you receive when you redeem them. Capital gain or loss realized from a redemption of shares held for more than one year will generally be treated as long-term capital gain or loss. Otherwise, the gain or loss will generally be treated as short-term capital gain or loss. However, if you realize a loss from a redemption of Fund shares held for six months or less, such loss will be treated as long-term, rather than short-term, to the extent of capital gain dividends you have received (or are deemed to have been received) with respect to those shares.

Whenever you redeem shares of a Fund, you will receive a confirmation statement showing how many shares you sold and at what price. Shareholders holding shares in taxable accounts also may receive a year-end statement early in the following year. This will allow you or your tax preparer to determine the tax consequences of each redemption. (See also "Other Information – Cost Basis Reporting" above.) However, be sure to keep your regular account statements and tax forms; that information will be essential in verifying the amount of your capital gains or losses.

Taxes on Exchanges of Fund Shares—An exchange of shares of one Fund for shares of another Fund will be a taxable transaction. Any gain or loss resulting from such an exchange will generally be treated as a capital gain or loss for US federal income tax purposes, and will be long-term or short-term capital gain or loss depending on how long you have held your shares. For US federal income tax purposes, an exchange

of shares of one Fund directly for shares of a different class of the same Fund generally is not expected to be a taxable event or to result in recognition of a gain or loss by the exchanging shareholder.

Taxes on Distributions—Distributions are generally subject to US federal income tax, and may be subject to state or local taxes. If you are a US citizen residing outside the United States, your distributions also may be taxed by the country in which you reside.

Your distributions are generally taxable in the year they are paid, whether you take them in cash or reinvest them in additional shares. For US federal income tax purposes, any distribution that is paid in January but that was declared in October, November or December of the prior calendar year with a record date in one of those months is taxable as if you received it on December 31 of the prior calendar year.

For US federal income tax purposes, a Fund's income and short-term capital gain distributions are generally taxed as ordinary income, whether paid in cash or in additional shares, except to the extent such distributions are attributable to "qualified dividend income," as described below.

Long-term capital gain distributions properly reported by a Fund as capital gain dividends will be taxable as long-term capital gains includible in net capital gains and taxed to individuals at reduced rates. Whether gains realized by a Fund are long-term or short-term depends on the length of time that the Fund held the asset it sold.

Net capital gains rates apply to distributions received by noncorporate shareholders that are attributable to "qualified dividend income," provided certain holding period and other requirements are satisfied. The amount of Fund dividends eligible to be taxed as qualified dividend income at the reduced rate generally is not permitted to exceed the amount of the aggregate qualifying dividends received by that Fund. To the extent a Fund distributes amounts of dividends that the Fund determines are eligible for the reduced rates, it will identify the relevant amounts in its annual tax information reports to its shareholders. Each of Artisan Emerging Markets Debt Opportunities Fund, Artisan Floating Rate Fund, Artisan Global Unconstrained Fund, Artisan High Income Fund and Artisan International Explorer Fund generally does not expect a significant portion of its distributions to be derived from qualified dividend income. Distributions from REITs generally do not qualify as qualified dividend income.

A 3.8% Medicare contribution tax is imposed on the "net investment income" of certain individuals, estates and trusts to the extent their income exceeds certain threshold amounts. Net investment income generally includes for this purpose dividends, including any capital gain dividends paid by a Fund, and net gains recognized on the sale, redemption or exchange of shares of a Fund.

A portion of each Fund's dividends also may be eligible for the dividends-received deduction generally available to corporations, provided certain holding period and other requirements are satisfied. The eligible portion may not exceed the aggregate dividends a Fund receives from US corporations. Funds with higher concentrations of securities other than stock of US corporations are generally not expected to designate a significant portion of their distributions as qualifying for the corporate dividends-received deduction.

A Fund's income or proceeds from investments in foreign securities may be subject to foreign withholding or other taxes, which, where applicable, will reduce the return on those securities. If more than 50% of the value of a Fund's total assets at the end of its taxable year is invested in stock or securities of foreign corporations, the Fund will be eligible to elect to permit shareholders to claim a credit or deduction with respect to foreign taxes incurred by the Fund. A Fund may choose not to make such an election, even if it is eligible to do so.

Early in each calendar year, each Fund will send you and the IRS a Form 1099 showing the amount and character of taxable distributions you received (including those reinvested in additional shares) in the previous calendar year. Certain shareholders may receive an annual statement and not a Form 1099.

A Fund's distributions are generally subject to tax as described herein even if such distributions are paid from income or gains earned by the Fund prior to a shareholder's investment and thus were included in the price paid for the shares. As a result, if you invest in a Fund shortly before it makes a distribution, the distribution will be taxable even though it may economically represent a return of your investment.

Artisan Partners Funds generally publishes estimates of their distributions in advance of the planned record and payment dates, except that Artisan Floating Rate Fund and Artisan High Income Fund do not publish estimates of daily income dividends, Artisan Emerging Markets Debt Opportunities Fund and Artisan Global Unconstrained Fund do not publish estimates of monthly income dividends and Artisan International Value Fund does not publish estimates of quarterly income dividends. There is no assurance that the Funds will publish such estimates in the future. Those estimates, if published, are for planning purposes and are subject to change.

Taxation of Certain Investments—Certain of a Fund's investment practices, including transactions in respect of foreign currencies, investments in certain debt obligations and derivatives can affect the amount, timing and character of distributions to shareholders, and may cause the Fund to recognize taxable income in excess of the cash generated by such investments. Thus, a Fund could be required at times to dispose of investments, including when it is not otherwise advantageous to do so, in order to satisfy distribution requirements for treatment as a regulated investment company. Such dispositions could increase the amount of short-term capital gain distributions (taxed at ordinary income rates) and capital gain dividends made to shareholders.

Tax rules are not entirely clear about certain issues relating to debt obligations that are in the lowest rating categories; each Fund will need to address these issues as they arise in order to seek to ensure that it continues to qualify as a regulated investment company.

Non-US Investors—Dividends paid by a Fund to shareholders that are not "United States persons" within the meaning of the Code ("foreign persons") and properly reported by the Fund as (i) capital gain dividends, (ii) "interest-related dividends" (i.e., dividends attributable to US-

source interest income that, in general, would not be subject to US federal income tax if earned directly by an individual foreign person) and (iii) “short-term capital gain dividends” (i.e., dividends attributable to net short-term capital gains in excess of net long-term capital losses) generally are not subject to withholding of US federal income tax. Dividends paid by a Fund to foreign persons other than capital gain dividends, interest-related dividends, and short-term capital gain dividends generally are subject to withholding of US federal income tax at a rate of 30% (or lower applicable treaty rate). Foreign persons should refer to the SAI for further information and should consult their tax advisors as to the tax consequences to them of owning Fund shares.

Financial Highlights

The financial highlights tables are intended to help you understand the Funds' financial performance for each share class for the past 5 years or, if shorter, for the period of a Fund's operations. The total returns in the tables represent the rate that an investor would have earned or lost on an investment in a Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the financial statements audited by Ernst & Young LLP, the Funds' independent registered public accounting firm, whose report, along with each Fund's financial statements, is included in the Funds' Form N-CSR, which is available upon request. Footnotes are presented on Pages [187-188.]

⁽¹⁾ Computed based on average shares outstanding.

⁽²⁾ Periods less than twelve months (where applicable) are not annualized. All total returns are calculated based upon the period end processing Net Asset Value per share (NAV), which may differ from the NAV reported in these statements.

Financial Highlights (continued)

⁽³⁾ Periods less than twelve months (where applicable) are annualized.

⁽⁴⁾ Includes the effect of expenses waived or paid by the Adviser, if applicable.

⁽⁵⁾ Amount is between \$0.005 and \$(0.005) per share.

⁽⁶⁾ Expense limit from October 1, 2023 to May 30, 2024 was 1.45% for Investor Shares, 1.35% for Advisor Shares and 1.30% for Institutional Shares. Expense limit was lowered effective May 31, 2024 to 1.24% for Investor Shares, 1.14% for Advisor Shares and 1.09% for Institutional Shares.

⁽⁷⁾ Adviser voluntarily waived expenses related to the proxy during the year.

⁽⁸⁾ Expense limit from October 1, 2021 to February 28, 2022 was 1.35% for Investor Shares and 1.20% for Institutional Shares. Expense limit was lowered effective March 1, 2022 to 1.15% for Investor Shares and 1.00% for Institutional Shares.

* Includes interest expense and dividend payments for securities sold short. The ratios excluding such expenses are listed below. Refer to 2(n) in Notes to Financial Statements for additional information

Glossary

- **ICE BofA 3 Month US Treasury Index**—an unmanaged index that comprises a single US Treasury issue with approximately three months to final maturity, purchased at the beginning of each month and held for one full month. An investment cannot be made directly in an index.
- **ICE BofA US Broad Market Index**—an index that tracks the performance of investment grade debt publicly issued in the major domestic and Eurobond markets, including sovereign, quasi-government, corporate, securitized and collateralized securities. An investment cannot be made directly in an index.
- **ICE BofA US High Yield Master II Index**—an index that tracks the performance of US dollar-denominated below investment grade corporate debt publicly issued in the US domestic market. An investment cannot be made directly in an index.
- **ICE BofA US Treasury Bill Index**—an index that tracks the performance of USD denominated sovereign debt publicly issued by the US Government in its domestic market. Bills, inflation-linked debt and strips are excluded from the Index. An investment cannot be made directly in an index.
- **JP Morgan (JPM) EMB Hard Currency / Local Currency 50/50 Index**—an unmanaged, blended index consisting of: 50% JPM Government Bond Index-Emerging Market Global Diversified (GBIEMGD), an index of local-currency bonds with maturities of more than one year issued by Emerging Markets governments; 25% JPM Emerging Markets Bond Index-Global Diversified (EMBIGD), an index of USD-denominated bonds with maturities of more than one year issued by Emerging Markets governments; and 25% JPM Corporate Emerging Market Bond Index-Broad Diversified (CEMBIBD), an index of USD-denominated Emerging Markets corporate bonds. An investment cannot be made directly in an index.
- **JP Morgan (JPM) EMBI Global Diversified Index**—an index that tracks liquid, US Dollar emerging market fixed and floating-rate debt instruments issued by sovereign and quasi-sovereign entities. An investment cannot be made directly in an index.
- **MSCI ACWI (All Country World Index) Index**—a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The index's returns include reinvested dividends but, unlike the Funds' returns, do not reflect the payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. MSCI Inc. is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **MSCI ACWI ex USA Index**—a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the US. The index's returns include reinvested dividends but, unlike the Funds' returns, do not reflect the payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. MSCI Inc. is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **MSCI ACWI ex USA Investable Market Index (IMI) Index**—an index that captures large, mid and small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the United States) and 24 Emerging Markets (EM) countries. With 6,323 constituents, the index covers approximately 99% of the global equity opportunity set outside the US. An investment cannot be made directly in an index.
- **MSCI ACWI ex USA SMID Index**—is a free float-adjusted market capitalization index that is designed to measure the equity market performance of small- and mid-cap companies in developed and emerging markets, excluding the US. The index's returns include reinvested dividends but, unlike the Fund's returns, do not reflect the payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. MSCI Inc. is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **MSCI ACWI ex USA Small Cap Index**—is a free float-adjusted market capitalization index that is designed to measure the equity market performance of small-cap companies in developed and emerging markets, excluding the US. The index's returns include reinvested dividends but, unlike the Fund's returns, do not reflect the payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. MSCI Inc. is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **MSCI ACWI Small Mid Cap Index**—is a free float-adjusted market capitalization index that is designed to measure the equity market performance of small-cap companies in developed and emerging markets. The index's returns include reinvested dividends but, unlike the Fund's returns, do not reflect the payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. MSCI Inc. is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **MSCI EAFE Index**—is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US and Canada. The index's returns include reinvested dividends but, unlike the Funds' returns, do not reflect the payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. MSCI Inc. is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.

- **MSCI Emerging Markets Index**—is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. The index's returns include reinvested dividends, but unlike the Funds' returns, do not reflect the payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. MSCI Inc. is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **Russell Midcap[®] Index**—an unmanaged, market capitalization-weighted index representing the smallest 800 companies in the Russell 1000[®] Index. The index's returns include reinvested dividends but, unlike the Funds' returns, do not reflect the payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. Russell Investments is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **Russell Midcap[®] Growth Index**—an unmanaged, market capitalization-weighted index of those medium-sized companies included in the Russell Midcap[®] Index with higher price-to-book and higher forecasted growth values. The stocks are also members of the Russell 1000[®] Growth Index. The index's returns include reinvested dividends but, unlike the Funds' returns, do not reflect payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. Russell Investments is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **Russell 1000[®] Index**—an unmanaged, market capitalization-weighted index of the 1,000 largest US companies in the Russell 3000[®] Index. The index's returns include reinvested dividends but, unlike the Fund's returns, do not reflect the payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. Russell Investments is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **Russell 2000[®] Index**—an unmanaged, market capitalization-weighted index of the 2,000 smallest US companies in the Russell 3000[®] Index. The index's returns include reinvested dividends but, unlike the Fund's returns, do not reflect the payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. Russell Investments is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **Russell 2000[®] Growth Index**—an unmanaged, market capitalization-weighted index of those small US companies included in the Russell 2000[®] Index with higher price-to-book ratios and higher forecasted growth values. The index's returns include reinvested dividends but, unlike the Funds' returns, do not reflect payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. Russell Investments is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **Russell 3000[®] Index**—a broad equity index composed of the 3,000 largest US listed stocks, representing more than 95% of the investable American stock market. Russell Investments is the owner of the trademarks, service marks and copyrights related to the index. An investment cannot be made directly in an index.
- **S&P 500 Index**—an unmanaged index measuring the performance of 500 US companies focused on the large-cap sector of the market. The index's returns include reinvested dividends but, unlike the Funds' returns, do not reflect payment of sales commission or other expenses incurred in the purchase or sale of the securities included in the index. An investment cannot be made directly in an index.
- **S&P UBS Leveraged Loan Index**—an index designed to measure the investable universe of the US dollar-denominated leveraged loan market. An investment cannot be made directly in an index.
- **Weighted average market capitalization**—the average of the market capitalizations of the companies in a portfolio weighted by the size of each company's position within the portfolio.

For more detail on the Funds, you may request the SAI, which is incorporated in this prospectus by reference. For purposes of any electronic version of this prospectus, the universal resource locators (URLs) referenced in this prospectus are not intended to incorporate the contents of any website referenced into this prospectus.

You can find more information about a Fund's investments in its annual and semiannual reports to shareholders and in Form N-CSR. The annual report contains a discussion of the market conditions and investment strategies that significantly affected each Fund's performance during its most recent fiscal period. In Form N-CSR, you will find each Fund's annual and semiannual financial statements.

To view or print the SAI, the annual and semiannual reports to shareholders, including the financial statements, and other information about Artisan Partners Funds, free of charge, visit **www.artisanpartners.com** or **www.artisanpartners.com/prospectus**. Call 800.344.1770 to receive a free copy of those documents or if you have a question or would like to receive other information about Artisan Partners Funds.

HTML and text-only versions of the Funds' documents can be viewed online or downloaded from the EDGAR database on the SEC's website at **www.sec.gov**. Copies may also be obtained, after mailing the appropriate duplicating fee, by e-mail request at publicinfo@sec.gov.
