Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, reports to shareholders and other information about the Fund, including the statement of additional information, online at www.artisanpartners.com/prospectus. You can also get this information at no cost by calling 1.800.344.1770 or by sending an e-mail request to DL-FundAdmin@artisanpartners.com. The Fund's current prospectus and statement of additional information, both dated 1 February 2026, each as supplemented from time to time, are incorporated by reference into this summary prospectus.

Investment Objective

The Fund seeks long-term capital growth.

Fees and Expenses of the Fund

This table describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund. **The table and expense example do not reflect any transaction fees or commissions that may be charged by a shareholder's financial intermediary when buying or selling shares.**

Shareholder Fees (fees paid directly from your investment)

	Investor	Advisor	Institutional
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None
Exchange Fee	None	None	None
Redemption Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor	Advisor	Institutional
Management Fees	0.94%	0.94%	0.94%
Distribution (12b-1) Fees	None	None	None
Total Other Expenses ¹	0.27	0.13	0.04
Total Annual Fund Operating Expenses	1.21	1.07	0.98

¹ "Other Expenses" include "Acquired Fund Fees and Expenses," which were less than 0.01% of the average net assets of the Fund. "Acquired Fund Fees and Expenses" are indirect expenses the Fund incurred from the Fund's investment in one or more money market funds (acquired funds). To the extent that the Fund invests in acquired funds, Total Annual Fund Operating Expenses in the table above may not match the ratios of expenses to average net assets shown in the "Financial Highlights" in the Fund's prospectus, since the Financial Highlights reflect the operating expenses of the Fund and do not include fees and expenses of acquired funds.

Expense Example

The example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes a 5% return each year, and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor	\$123	\$384	\$665	\$1,466
Advisor	\$109	\$340	\$590	\$1,306
Institutional	\$100	\$312	\$542	\$1,201

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 62.54% of the average value of its portfolio.

Principal Investment Strategies

The Fund's investment team employs a fundamental investment process to construct a diversified portfolio of US mid-cap growth companies. The team seeks to invest in companies that it believes possess franchise characteristics, are benefiting from an accelerating profit cycle and are trading at a discount to its estimate of private market value. The Fund's investment process focuses on two distinct elements—security

selection and capital allocation. The team overlays its investment process with sustainability considerations and broad knowledge of the global economy.

- **Security Selection**—The team seeks to identify companies that have franchise characteristics (e.g., low cost production capability, possession of a proprietary asset, dominant market share or a defensible brand name), are benefiting from an accelerating profit cycle and are trading at a discount to the team's estimate of private market value. The team looks for companies that are well positioned for long-term growth, which is driven by demand for their products and services at an early enough stage in their profit cycle to benefit from the increased cash flows produced by the emerging profit cycle.
- **Capital Allocation**—Based on the team's fundamental analysis of a company's profit cycle, it divides the portfolio into three parts. **GardenSM** investments are small positions in the early part of their profit cycle that may warrant more sizeable allocations as their profit cycle accelerates. **CropSM** investments are positions that are being increased to a full weight because the team believes they are moving through the strongest part of their profit cycles. **HarvestSM** investments are positions that are being reduced as they near the team's estimates of full valuation or their profit cycles begin to decelerate.
- **Sustainability Considerations**—The team employs a framework in assessing material sustainability exposures factors that informs its security selection and capital allocation process.
- **Broad Knowledge**—The team overlays the security selection and capital allocation elements of its investment process with a desire to invest opportunistically across the entire global economy. The team seeks broad knowledge of the global economy in order to position it to find growth wherever it occurs.

The Fund invests primarily in US companies and, under normal circumstances, the Fund invests no less than 80% of its net assets plus any borrowings for investment purposes at market value at the time of purchase in the common stocks of medium-sized companies. The Fund defines a medium-sized company as one with a market capitalization greater than the market capitalization of the smallest company in the Russell Midcap[®] Index and less than three times the weighted average market capitalization of companies in the Russell Midcap[®] Index. Under normal circumstances, the Fund generally maintains a weighted average market capitalization of not more than 1.5 times the weighted average market capitalization of the companies included in the Russell Midcap[®] Index or Russell Midcap[®] Growth Index, whichever is greater.

The Fund may invest up to 15% of its total assets at market value at the time of purchase in common stocks and other securities of non-US companies (including depositary receipts). The Fund's investments in non-US securities may include investments in developed markets, as well as emerging and less developed markets.

Principal Risks

Like all mutual funds, the Fund takes investment risks and it is possible for you to lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value. The Fund's principal risks include:

- **Market Risks**—Markets may perform poorly and the securities in which the Fund invests may underperform the general securities markets. Securities markets may experience periods of high volatility and reduced liquidity in response to governmental actions, intervention and/or policies, economic or market developments, or other external factors. The value of a company's securities may rise or fall in response to company, market, economic, political, regulatory or other news.
- **Active Management Risks**—The success of the Fund is dependent on the team's investment decisions, which are based, in part, on the research process employed by the team. The portfolio securities selected by the team may decline in value or not increase in value when the market indices, including relevant benchmark indices, are rising, in which case the Fund could experience losses regardless of the performance of the market indices. When the team considers material sustainability exposures in its research process, the Fund may forgo certain investment opportunities and underperform funds that do not consider similar factors.
- **Small and Medium-Sized Company Risks**—Securities of small and medium-sized companies tend to be more volatile and less liquid than securities of large companies. Compared to large companies, small and medium-sized companies typically may have analyst coverage by fewer brokerage firms – meaning they may trade at prices that reflect incomplete or inaccurate information. Smaller companies may have a shorter history of operations, less access to financing and a less diversified product line – making them more susceptible to market pressures and more likely to have volatile security prices. During some periods, securities of small and medium-sized companies, as an asset class, have underperformed the securities of larger companies.
- **Growth Investing Risks**—Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated.
- **Foreign Investing Risks**—Foreign securities may underperform US securities and may be more volatile than US securities. Risks relating to investments in foreign securities (including, but not limited to, depositary receipts) and to securities of issuers with significant exposure to foreign markets include currency exchange rate fluctuation; less available public information about the issuers of securities; less stringent regulatory standards; lack of uniform accounting, auditing and financial reporting standards; and country risks, including less liquidity, high inflation rates, unfavorable economic practices, political instability and expropriation and nationalization risks.
- **Risks of Emphasizing a Region, Country, Sector or Industry**—If the Fund has invested a higher percentage of its total assets in a particular region, country, sector or industry, changes affecting that region, country, sector or industry may have a significant impact on the performance of the Fund's overall portfolio.

- **Currency Risks**—Foreign securities usually are denominated and traded in foreign currencies and the exchange rates between foreign currencies and the US dollar fluctuate continuously. The Fund’s performance will be affected by its direct or indirect exposure, which may include exposure through US dollar denominated depositary receipts and participation certificates, to a particular currency due to favorable or unfavorable changes in currency exchange rates relative to the US dollar. The Fund’s direct or indirect exposure to a particular currency may be hedged to mitigate currency volatility or because the Fund believes a currency is overvalued. There can be no guarantee that any hedging activity will be successful. Hedging activity and/or use of forward foreign currency contracts may reduce or limit the opportunity for gain and involves counterparty risk, which is the risk that the contracting party will not fulfill its contractual obligation to deliver the currency contracted for at the agreed upon price to the Fund.
- **Impact of Actions by Other Shareholders**—The Fund, like all mutual funds, pools the investments of many investors. Actions by one investor or multiple investors in the Fund may have an adverse effect on the Fund and on other investors. For example, shareholder purchase and redemption activity may affect the per share amount of the Fund’s distributions of its net income and net realized gains, if any, thereby increasing or reducing the tax burden on the Fund’s shareholders subject to income tax who receive Fund distributions.
- **Operational and Cybersecurity Risks**—Operational failures, cyber-attacks or other disruptions that affect the Fund’s service providers, the Fund’s counterparties, other market participants or the issuers of securities held by the Fund may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations.

Performance

This section provides some indication of the risks of investing in the Fund. The following bar chart shows how the performance of the Fund’s Investor Shares has varied over time.

Past performance (before and after taxes) is not necessarily an indication of how any class of the Fund will perform in the future.

Calendar Year by Year Total Returns (%)

Highest/Lowest Quarter Returns (%)

During the time period shown in the bar chart.

Highest Quarter	37.29	June 30, 2020

Average Annual Total Returns—(For Periods Ended 31 December 2025)

The following table shows the average annual total returns (before and after taxes) and the change in value of three broad-based market indices over various periods ended 31 December 2025. The index information is intended to permit you to compare the Fund’s performance to broad measures of market performance.

After-tax returns are shown only for Investor Shares, and the after-tax returns for Advisor Shares and Institutional Shares will vary from Investor Shares. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes.

Your actual after-tax returns depend on your own tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares in a tax-advantaged account, or to investors who are tax-exempt.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, except when you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. If you invest through such tax-advantaged arrangements, you may be subject to tax upon withdrawal from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, the investment adviser and/or the distributor may pay the financial intermediary for the services provided to the Fund and its shareholders. The investment adviser and/or the distributor may also pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
